Introduction                                                xix

PART I

I  Some Facts and Figures                                    3
   Exports: long-term trends                                 5
   Commodity and area pattern, 1953–59                       7
   The changing U.K. share: by area                         9
   The changing U.K. share: by commodity groups             11

II  British Export Industries: A Comparative Survey          21
    Using the basic tables                                  21
    Textiles and clothing                                   22
    Machinery                                               25
    Chemicals and allied products                           31
    Iron and steel                                           33
    Rubber manufactures                                     34
    Conclusions                                             36

III  Direct Investment Overseas                             44
    Direct investment and exports                            44
    U.K. direct investment reviewed                          46
    The Sterling Commonwealth                               49
    Canada                                                  52
    Direct investment by the U.S.A.                         53
    The yield of direct investment                          55

IV  Comparative Export Prices                                58
    The problem of comparison                               58
    The U.K. and her competitors                             59
    Price flexibility                                        62

V  Domestic Economic Conditions and Export                  66
    Performance: The United Kingdom                         66
Table of Contents

VI Domestic Economic Conditions and Export Performance: Western Germany page 73

Costs and prices 73
Domestic policies 75
Export aids 78

VII Domestic Economic Conditions and Export Performance: Japan 85

Growth of the economy 85
The pattern of export trade 89
Wages, costs and productivity 91
Export aids 94

VIII Domestic Economic Conditions and Export Performance: Italy 99

Textiles 100
Engineering products and steel 102
Development of the south 104
Productivity and costs 106
France 107
The December reforms, 1958 108
Modernisation of the economy 110

PART II

IX Cars and Commercial Vehicles 117

The broad picture 117
Commonwealth markets and local manufacture 119
The United States market 124
Europe 126
Domestic restrictions and exports 128
Conclusions 135

X Electrical Engineering 142

Heavy electrical equipment 143
Radio and radio equipment 147
Domestic restrictions and radio exports 150
Refrigerators and other domestic equipment 151
Conclusions 156
