<i>Preface</i>	<i>page</i> ix
<i>Acknowledgements</i>	xi
<i>Abbreviations for bibliographic references</i>	xiii
<b>1 Observations</b>	1
1.1 The definition of ‘observation’	1
1.2 Planning observations	5
<i>Notes on Chapter 1</i>	8
<i>References</i>	9
<b>2 Observatories</b>	10
2.1 History	10
2.2 National and multinational facilities	15
2.3 The ‘new’ observatories	19
<i>Notes on Chapter 2</i>	22
<i>References</i>	23
<b>3 Data</b>	24
3.1 The nature of data	24
3.2 Models and theories	26
3.3 Data in teaching	27
3.4 Types of data	27
3.5 Presentation of data	29
3.6 Units, errors and standard values	29
<i>Notes on Chapter 3</i>	33
<i>References</i>	34
<b>4 Archiving of observations</b>	35
4.1 History	35
4.2 Support media	37
4.3 Data archives	38
4.4 Why do we preserve data?	40
4.5 What should be preserved?	40
4.6 Types of data archives	42
<i>Notes on Chapter 4</i>	47
<i>References</i>	48

vi      *Contents*

<b>5</b>	<b>Presentation of astronomical data</b>	50
5.1	Data in research papers	50
5.2	Catalogues	52
5.3	Errors in printed catalogues	55
5.4	Computer-readable catalogues	56
	<i>Notes on Chapter 5</i>	57
	<i>References</i>	57
<b>6</b>	<b>Designation of astronomical objects</b>	58
6.1	Designation of stars	58
6.2	Designation of objects in general	61
6.3	Dictionary of synonyms	62
6.4	Designations and positions	62
6.5	Officially accepted designation practices	65
6.6	Designations and priority rights	69
	<i>Notes on Chapter 6</i>	71
	<i>References</i>	71
<b>7</b>	<b>Catalogues</b>	74
7.1	Surveys of catalogues	74
7.2	Data on stars	75
7.3	Non-stellar objects—general	80
7.4	Non-stellar objects in our Galaxy	80
7.5	Non-stellar objects outside our Galaxy	81
7.6	Availability of catalogues	83
7.7	Deficiencies of the present coverage	83
7.8	Inadequately-covered areas	85
	<i>Notes on Chapter 7</i>	86
	<i>References</i>	87
<b>8</b>	<b>The growth of data</b>	93
8.1	Growth characteristics	93
8.2	The growth of astronomical information	94
8.3	Incompleteness of our knowledge of the Universe	104
	<i>Notes on Chapter 8</i>	107
	<i>References</i>	108
<b>9</b>	<b>Data banks and data bases</b>	110
9.1	Storage of information	110
9.2	The establishment of a data bank	112
9.3	Requirements introduced by the use of computers	118
	<i>Notes on Chapter 9</i>	123
	<i>References</i>	124
<b>10</b>	<b>Data centres</b>	126
10.1	The establishment of data centres	126
10.2	Organizational aspects of a data centre	128

*Contents* vii

10.3	Integrated data bases	133
10.4	The future	141
	<i>Notes on Chapter 10</i>	141
	<i>References</i>	142
<b>11</b>	<b>The publication of scientific information</b>	144
11.1	Historical development	144
11.2	Forms of publication	155
11.3	The publication of data	156
11.4	How to search for relevant literature	158
	<i>Notes on Chapter 11</i>	160
	<i>References</i>	160
<b>12</b>	<b>The growth of scientific information</b>	162
12.1	The relative importance of different types of publications	162
12.2	How much of the information is useful?	166
12.3	The relative impact of journals: ‘Bradford’s law’	172
12.4	Publication and productivity: ‘Lotka’s law’	174
12.5	Evaluation of scientific activity	177
	<i>Notes on Chapter 12</i>	180
	<i>References</i>	182
<b>13</b>	<b>International data organizations</b>	183
13.1	The International Council of Scientific Unions (ICSU)	183
13.2	The International Astronomical Union (IAU)	184
13.3	The International Union of Geodesy and Geophysics (IUGG)	189
13.4	The Federation of Astronomical and Geophysical Services (FAGS)	190
13.5	Committee on Data for Science and Technology (CODATA)	190
13.6	Committee for Space Research (COSPAR)	192
13.7	International Council for Scientific and Technical Information (ICSTI)	192
13.8	Conclusion	193
	<i>Notes on Chapter 13</i>	194
	<i>Index</i>	195
