7		eeping Flow – Two-Dimensional and Axisymmetric Problems	429
	A	Nondimensionalization and the Creeping-Flow Equations	430
	В	Some General Consequences of Linearity and the Creeping-Flow	47.4
		Equations	434
		I The Drag on Bodies That Are Mirror Images in the Direction of Motion	434
			434
		<ul><li>2 The Lift on a Sphere That is Rotating in a Simple Shear Flow</li><li>3 Lateral Migration of a Sphere in Poiseuille Flow</li></ul>	438
		<ul> <li>4 Resistance Matrices for the Force and Torque on a Body in</li> </ul>	
		Creeping Flow	439

# Contents

С	Representation of Two-Dimensional and Axisymmetric Flows in	
	Terms of the Streamfunction	444
D	Two-Dimensional Creeping Flows: Solutions by Means of	
	Eigenfunction Expansions (Separation of Variables)	449
	I General Eigenfunction Expansions in Cartesian and Cylindrical	
	Coordinates	449
	2 Application to Two-Dimensional Flow near Corners	45 I
Е	Axisymmetric Creeping Flows: Solution by Means of Eigenfunction	
	Expansions in Spherical Coordinates (Separation of Variables)	458
	I General Eigenfunction Expansion	459
	2 Application to Uniform Streaming Flow past an Arbitrary	
	Axisymmetric Body	464
F	Uniform Streaming Flow past a Solid Sphere – Stokes' Law	466
G	A Rigid Sphere in Axisymmetric, Extensional Flow	470
	I The Flow Field	470
	2 Dilute Suspension Rheology – The Einstein Viscosity	
	Formula	473
н	Translation of a Drop Through a Quiescent Fluid at Low Re	477
T	Marangoni Effects on the Motion of Bubbles and Drops	486
J	Surfactant Effects on the Buoyancy-Driven Motion	
	of a Drop	490
	I Governing Equations and Boundary Conditions for a	
	Translating Drop with Surfactant Adsorbed at the Interface	493
	2 The Spherical-Cap Limit	497
	3 The Limit of Fast Adsorption Kinetics	503
