
Contents

<i>Preface</i>	<i>page ix</i>
1 The edge-isoperimetric problem	1
1.1 Basic definitions	1
1.2 Examples	1
1.3 Application to layout problems	9
1.4 Comments	18
2 The minimum path problem	20
2.1 Introduction	20
2.2 Algorithms	21
2.3 Reduction of wirelength to minpath	24
2.4 Pathmorphisms	25
2.5 Comments	29
3 Stabilization and compression	32
3.1 Introduction	32
3.2 Stabilization	32
3.3 Compression	44
3.4 Comments	49
4 The vertex-isoperimetric problem	52
4.1 Definitions and examples	52
4.2 Stabilization and VIP	53
4.3 Compression for VIP	56
4.4 Optimality of Hales numbering	59
4.5 Applications to layout problems	61
4.6 Comments	66
5 Stronger stabilization	68
5.1 Graphs of regular solids	68
5.2 A summary of Coxeter theory	74

Cambridge University Press

978-0-521-18383-3 - Global Methods for Combinatorial Isoperimetric Problems

L. H. Harper

Table of Contents

[More information](#)

viii	<i>Contents</i>	
	5.3 The structure of stability orders	79
	5.4 Calculating stability orders	82
	5.5 Into the fourth dimension	85
	5.6 Extended stabilization	96
	5.7 Comments	100
6	Higher compression	103
	6.1 Additivity	103
	6.2 The MWI problem	107
	6.3 The Ahlswede–Cai theorem	109
	6.4 The Bezrukov–Das–Elsässer theorem	115
	6.5 Comments	125
7	Isoperimetric problems on infinite graphs	128
	7.1 Euclidean tessellations	129
	7.2 Comments	142
8	Isoperimetric problems on complexes	145
	8.1 Minimum shadow problems	146
	8.2 Steiner operations for MSP	152
	8.3 Scheduling problems	162
	8.4 Comments	166
9	Morphisms for MWI problems	169
	9.1 MWI-morphisms	169
	9.2 Examples	173
	9.3 Application I: The pairwise product of Petersen graphs	180
	9.4 Application II: The EIP on the 600-vertex	182
	9.5 The calculation for V_{600}	185
	9.6 Comments	194
10	Passage to the limit	196
	10.1 The Bollobas–Leader theorem	196
	10.2 The Kleitman–West problem	202
	10.3 VIP on the Hamming graph	208
	10.4 Sapozhenko’s problem	209
	10.5 Comments	213
	<i>Afterword</i>	217
	<i>Appendix: The classical isoperimetric problem</i>	219
	<i>References</i>	223
	<i>Index</i>	229
