Index

The dates of letters to and from Darwin’s correspondents are listed in the biographical register and are not repeated here. Darwin’s works are indexed under the short titles used throughout this volume and listed in the bibliography.

Abdelaziz, Sultan: meets Empress Eugénie, 445 & 446 n.3
Abutilon: self-sterility, 132; A. striatum (A. darwinii), F. Müller sends CD seeds and seeks to discover whether self-sterile, 322 & n.5, 437 & 439 n.3
Academy: aiming, xxii, 392 & n.2, 392 & 393 n.2; Descent, advance notice of publication, 443 n.1, 446 n.1, 447 n.2, 449 n.2, 450, 452, 456 & n.3, 533 & 534 n.12, 569 n.2, 570, 571 & n.3; to become fortnightly, 480; J.D. Hooker thinks Nature should not attempt to compete with, 479 & 480 n.14; T.H. Huxley, review of E. Haeckel, Natural history of creation, 433 n.1; J.L. Sinclair requests copies to be sent to New Zealand, 327 & 330 n.1
Académie des Sciences, 162 & 163 n.3, 354 & 555 n.3
Acclabies robors: stridulation, 336 & n.4
acclimatisation: potatoes, 341 & 342 n.1; J. Scott intends book on, 577 & n.8
Acer: A. callicicum, A. Reuter grafts cultivars with wild stock, 403 & 405 n.18; A. negundo, A. Reuter attempts to graft with A. n. var. californicum, 403 & 405 n.15; A. pseudoplatanus; variegated leaves, 323 & 328 n.3 & 4
Acetabula: piping annos F. Smith’s neighbours, 421
Acherontia atropos (death’s-head hawkmoth), 265 & 267 n.1
Acheta campestris: stridulation, 421 & n.3
Achila flavicornis. See Cymatophora or Acidalia incanaria (Idaea dilataria, silky wave), 265 & 267 n.26
Ardland, Thomas Dyke: J.D. Hooker visits, 362 & 363 n.6, 375 & 376 n.1
Axonstigma: A. alni; ratio of sexes, 266 & 268 n.41; A. ramicis; ratio of sexes, 266 & 268 n.42; A. tridens; ratio of sexes, 266 & 268 n.40
Adiantum tenellum. See Hymenophyllum tenellum
Aegopodium: early flowers differ from later, 523 & 4
Agassiz, Alexander: L. Agassiz introduces to CD, 306; converted to evolutionism by F. Müller’s Für Darwin, 511 & 512 n.; favourably inclined to Darwinism, 306 & n.2; J.D. Hooker enjoys meeting, 492; visit to Britain, 452 & n.5; visits Down House, 510 & n.7, 512 n.7, 579
Agassiz, Anna Russell: J.D. Hooker enjoys meeting 492; visit to Britain, 452 & n.5; visits Down House, 510 & n.7, 579
Agassiz, Louis: CD has never believed theory of origin of Amazonian formation, 405; chondrites, nesting habits, 394 & n.7; A. Gray passes question from CD to, 452 & n.4; introduces his son Alexander to CD, 306; Journey to Brazil, 5 & n.6; likely to be disappointed by CD’s forthcoming book, 333 & 334 n.12; must be dismayed by his son’s belief in evolution, 511; F. Müller ‘hits hard’, 319 & 320 n.3; ‘Nature never lied’, 214 & n.3; Origin, 4th edition, CD quotes on embryonic state evincing extinct forms of life, 298, 348 & 349–50 n.4; Origin, 5th edition, CD alters reference to, 349 & 349–50 n.4
Aglaothamnus pinguius (large tabby), 266 & 268 n.67
Agrisus consolidae. See Sphinx consolidae
Agnosia aurantia. See Hybernia aurantia
Agnotis, sexual ratios: A. exclamationis (heart and dart), 266 & 268 n.46; A. ripae (sand dart), 266 & 268 n.47; A. vegetum (turnip moth), 266 & 268 n.45
Aitchison, William, 258; cited in Descent, 273 n.2, 294 n.2; sheep, proportion of sexes, 272 & 273 n.1 & 3, 275 & 277 n.2, 287–8, 294
Alkalope (Triptesia). C.F. Claus hopes to study pupae of, 41 & n.9, 544 & n.9; CD offers C.F. Claus specimens of, 48 & n.10
Almbercht, Jean le Rond d’, 103 & 104 n.4, 551 & 552 n.4
Alexander II, tsar of Russia, 261 n.4; to attend International Horticultural Exhibition in St Petersburg, 123 & 124 n.4; presents, J.D. Hooker with a pair of jasper vases, 260–1, 279
Alglave, Emilie: requests permission to publish excerpts of Descent in Revue des cours scientifiques, 449 & n.3, 569 & n.3
Allen, Edward, 88 & 89 n.3
Allen, T., 109 & 110 n.3
Allman, George James: calcareous sponges, sends E. Haeckel samples from Edinburgh natural history collection, 345 & 347 n.1 & 3, 414 & 415 n.4
Acanthina sacifera (Duroia sacifera): ‘ant-houses’ on leaves, 165 & 166 n.4
Amata cerbera. See Synanthus cerbera
American Entomologist: CD admires articles on gall wasps and cicadas, 167 & nn.2 & 5; B.D. Walsh sends issues to CD, 167 n.2 & 168 n.9
American Journal of Science and Arts (‘Stillman’s Journal’): J. Orton, ‘Physical observations on the Andes and the Amazons’, 5 n.2
American Philosophical Society: presents diploma to CD, 380
Amphiphalus pseudomorpha (Biston statioria, oak beauty), 265 & 267 n.25
Amphizzia ornata: J. Orton finds, 4 & 5 n.3
Anaglypnum commutum (Prunus dulcis): graft with Prunus spinosa, 403-4 & 405 n.21
Anderson, John, 547 n.7
Anderson-Henry, Isaac, 158 & 160 n.3
Anderson, Nils Johan: CD would gladly subscribe 50 to expedition to Galápagos, 280 & 110 n.10; J.D. Hooker meets in Stockholm, 261 & 262 n.13; J.D. Hooker enthusiastic about proposed expedition, 286 & 287 n.1
Angelico, Fra: ‘Descent from the Cross’, J.L. Gray recommends CD study expressions in, 219 & 221 n.2
Angraecum sesquipedale: L. Rörolle’s revision of, 226 & n.5
Antakis simplex. See Ascaris simplex
Annuals and Magazine of Natural History, 14 n.5, 311 & n.9, 387 n.5; CD, letter introducing ‘Fertilization of orchids’, 357-8 & 358 n.2; drawing of Lepidocera used in Descent, 263 & n.4; J. Lobb, description of Lebidocera datenii, 349 & n.2; F. Müller, Facts and arguments for Darwin, review copy, 95
Anoplotherium: R. O. Cunningham finds, 215, 350 antelope: age at which horns develop, 102; J.D. Caton seeks to compare with elk, 208
Antheraea: A. pernyi. See Bombyx pernyi; A. yamamai. See Bombyx yamamai
Anthophora retusa: sexual differences, 371 & n.3
Ampylina pollination, 424 & n.3
Anticocyra americana (pronghorn): absence of secondary hooks, 245; hooks, compared with Palmatius gazelle, 208 & 210 n.11
Antilope spp.: age at which horns develop, 102 & 103 n.1
Antirrhinum: self-fertility, 424, 426 & n.5
ants: R. Spruce hypothesizes role in mutation in plants, 165 & 166 n.2, 166
Apalus canescens (Bombus (Psithyrus) canescens), cackoo bumble-bee, 371 & n.4
Appleton, Charles Edward Cutts Birchall: editor, Academy, 393 n.4
D. Appleton & Co.: Orig, Orange Judd will not trespass on rights to publish, 187-8, 233; Orig, publishers of US edition, 188 & nn.4 & 5; offer CD ten per cent royalty on sales, 449; Orig, sales, 33 & 54 n.1; Orig, 5th edition, will publish, preferably from stereotypes, 501-2 & 502 n.2, 531; request stereotypes of Descent and Orig, 5th edition, 494 & 495 n.1
Aphyes spinosus. See Rhoes spinosus
Aranx diadema. See Epeira diadema
Arbutus: CD encourages J.T. Moggridge to publish paper on, 262 & 263 nn.2 & 3; 386; A. unedo, J.T. Moggridge observes, 520 & 521 n.4
Arnica foliosa (ruby hummer; ruby-throated humming-bird): development of plumage, 154
Arctica, sexual ratios: A. lubricipes (Spilosoma lubricipes, white ermine), 265 & 267 n.18; A. mendica (Daphona mendica, muslin moth), 265 & 267 n.17; A. urticae (Spilosoma urticae, water ermine), 265 & 267 n.19
Areca alba (Dipterophora alba; hurricane palm), 159 & 160 n.19
Arg galathaea (Melinargia galathaea, marbled white), 265 & 267 n.3
Argynnis euphrosyne (Boloria euphrosyne; pearl-bordered fritillary), 265 & 267 n.2
Arnobia moschatula: stridulation, 421 & n.2
Ascaris simplex (Antakis simplex): collected by CD in South America, 358 n.3
ascidians: relation of larvae to vertebrates, 2 & 3 n.6
Asplenium palustre (A. herniaria), A. scolopendrium, 105 & 107 n.5, 127
Astragalus tragacantha: seeding, 520
Astrotoma. See Hygrocosm
Athenarum, 111 n.2, 363 n.4, 376 nn.4 & 5; Academy founded as rival to, 392; CD corrects error calculating number of elephants, 275-6, 307-8; CD hopes J. Murray’s new Academy will damage, 392; F. Müller, Facts and arguments for Darwin, review copy, 95; F. Müller, Facts and arguments for Darwin, review, xx, 271 & 272 n.3; E.L. Garbett calculates number of elephants, 291-2, 330; hostility to CD and his supporters, 322; ‘Ponderer’ questions CD’s calculations of numbers of elephants, 259 & n.2, 275 nn.2 & 5, 277 n.3, 307 & 308 n.2, 356 n.13; H.M. Walmsley’s book on ruined cities
of Zululand, review of, 179 & 180 n.7
Akinston, Edward: vice chancellor, Cambridge University, 171 & 172 n.5
Ambus rubricollis. See Lathasa rubricollis
Audilia, 379 & n.1
Airaks: J.D. Hooker experiments with fertilisation of, 114 & n.10, 158; CD encourages J.D. Hooker to continue experiments, 135 & 136 n.4; A. japonica, secretion of nectar, 29 & 30 n.3
Audubon, John James: turkeys, description of, 209 & 210 n.15; turkeys, tuft of hair on breast of hens, 245 & n.3
Axell, John Sevier: F. Delpino admires work of, 459 & 460 n.14, 573 & n.14; fertilisation ofphanerogamous plants, 432 n.8
Ayres, Philip Burnard: geology of Gabriel Island, 159 & 161 n.22
Azara, Félix d', 24 & 25 n.10
Babbage, Charles, 97
Babbage, Charles Cardale: disappointed by J.D. Hooker's espousal of Darwinism, 16 & 17 n.4, 21
Balsington, Churchill, 44 & n.7
baboons: whether males fight for females, 486 & 488 n.4
Baer, Karl Ernst von, 260 & 262 n.8
Bain, Alexander: US royalties, 494
Baker, Charles Newcomb, 159 & 153 n.4
Baker, John Gilbert, 158 & 160 n.8
Balcan: C.F. Claus asks CD for specimens, 67, 547
Balfor, Arthur James: takes degree at Cambridge, 513 & nn.1 & 7
J. B. Bailleul et fils: publisher, Revue des cours scientifiques, 449 n.3, 569 & n.3
bamboo: uses of, 175 & 176 n.10; A. R. Wallace sees no cause to change opinions regarding, 185 & n.7
Barber, Mary Elizabeth: Duchess, CD recommends G. Benthem publish paper on, 215 & n.4, 224; snakes, CD and J.D. Hooker impressed by paper on, 310–11 & 311 n.8, 320 & n.9
Barber, Edmond, 53 n.1
Baring Brothers, 188 & n.6
Barky, Anne Maria, 160 & 161 n.27
Barky, Henry: flora and geology of Mauritius, 158–60; CD hopes J.D. Hooker will encourage him to collect, 163
Bart, J. G. R.: G. Cupples seeks information about sex ratios in dogs, 118 & 123 n.5, 122, 276 & 277 n.4
Barron, Archibald F., 201 & n.3
Bartlett, Abraham Dec: cassowary, nesting habits, 150 & 151 n.15; has seen tears of Macacus indoruttus, 187 n.4
Bate, Charles Spence: Carcinus maenas, mating habits, 344; cited in Descent, 54 n.1, 344 n.2; F. Muller, Facts and arguments for Darwin, presentation copy, 95, 113, 125, 126; observes prickly branch on smooth-leaved holly, 517–8, 517–18 & 518 n.1; sons observe crabs fighting, 54 & n.1; whether hybridism between fox and dog is possible, 101
Bates, Henry Walter, 5 & n.6; regrets his brother entomologists have no information about sexes of insects, 268 & n.1
Beagle voyage: CD finds Cryptophyllus, 48 n.9; CD collects silvery grebe, 6 n.7; and CD's development as a naturalist, 144 & 145 n.7, 145; CD and P.G. King as last relics of, 99 & n.4; CD recalls friendship with P.G. King with pleasure, 192; CD sends parasitic worms collected in South America to T.S. Cobbold, 357–8 & 358 nn., 372 & 372 n.2; R. FitzRoy, captain, 144; R.N. Hamond, lieutenant, 514 & 515 nn.3 & 4; J. Orton inspired by, 56 n.11
beards: CD seeks information on where different in colour from hair on head, 214, 253 & n.14, 370, 286 & 287 n.12; lighter than hair in Sikkim, 525 & 527 n.3; redder than hair on head among Arabs through use of henna, 301; redder than hair among Russians, 360
Beck, John: sends CD his ms. on the Real Presence, 230 & n.1
Richard & Joseph Beck, 38 & 39 n.4
Beckham: CD's postal address changes to, 169 & n.1, 256 & n.6, 413 n.1, 417 n.1, 593; trains shown as continuous on SER timetables separate at Beckham Junction, 423 & 424 n.1
Becker, Lydia Ernestina: admires Variation, 12–13; asks permission to quote CD on Lychnis in forthcoming article, 534 & 535 n.1; Lycoris daunia, paper on, 429–31 & 431 nn.1 & 2 & 5, 534 & 535 n.1; naturalised parrots in Norfolk, 13–14
Beddoe, John: cited in Descent, 367 n.7; increasing prevalence of dark hair in England, 365–6 & nn.1–2 & 367 nn.4 & 6, 367, 368
Beer, Gavin de, 578
bees: Euglossa, fertilisation of Corinophora by, 422 & 423 n.5, 459 & 459 n.2, 567–8 & 569 n.5; and fertilisation of flowers, 423–4, 475; Gongora fertilised by, 436 & 436 n.3, 572 & 573 n.3; Limaria cymbalaria, fertilisation of, 36 & n.3, 39; Passiflora caerulea, fertilisation of, 506, 584–5; orchids, pollination of, 422 & 423 n.5; sexual differences, 37; visit winter-flowering plants as late as November, 506
Begonia: F. Muller finds monstrous form in Brazil, 132–3 & 134 n.5, 271 & 272 n.8, 355 & n.12; CD arranges for F. Muller's letter describing

More information
Begonia, cont.
monstrous form to be read to Linnean Society, 223 & n.6; F. Müller experiments with inheritance of monstrousity, 436, 523; B. frigida, CD describes monstrous form in Variation, 152 & 134 n.3; B. frigida, cultivated at Kew, 356a, 378; B. frigida, J.D. Hooker describes in relation to natural selection, 355 & 355-6 n.12; B. sempervirens, arrival at Kew, 223 n.7
Bell, Charles: fear and expansion of neck muscles, 243-4 n.5; physiology of weeping, 373 & n.3, 373-4 & 374 n.2
Bellocc, Louise Swanton, 53 n.1
Bengal Sporting Magazine, 102
Bennet, Charles August, 6th Earl of Tankerville, 440 n.6
Bennett, Alfred William: fertilisation of winter-flowering plants, letter to Nature, 470; fertilisation of winter-flowering plants, sends CD notes on, 203-4 & 204 n.2; Parassma palustris sends CD paper on cross-fertilisation of, 196-7
Bentham, George: arid climates and concentration of species, 502-3 & 504 n.5 & 6; Australian and South African flora, 502-3 & 504 n.7; Cassia, revision of, 503-4 & 504 n.12; Cassia, revision of supports 'great principle that natural affinity results from community of descent', 164 & n.8; CD sends F. Müller's letter on monstrous form of Begonia frigida with seeds for Kew, 223; with J.D. Hooker, Genus plantarum, 390 & n.5, 507 n.3; Linnean Society anniversary address, 280 & n.7, 285-6 & 286 n.8; Linnean Society anniversary address, asks CD for corrections, 495; Linnean Society anniversary address, CD admires, 476 & 477 n.10, 495; Linnean Society anniversary address, CD comments on, 490-9, 501; R. Spruce's paper on Tinea, asks whether CD's endorses, 214-15, 223
Berberis vulgaris: 'Variegata', 324-6
Bernard, Claude: position in French science, 521-2 & 522 n.5, 576, 577 & n.5
Bernoulli, Carl Gustav: observes Coffea arabica, 523 & 525 n.7
Bethell, Richard, 1st Baron Westbury, 505 n.4
Betula nana: J. Price tries to grow from twigs, 192
Bidard, M.: self-fertilisation, Gramineae, 470 & n.6
Bingham, H., 170 & 180 n.8
Birkbeck, William Lloyd, 171 & 172 n.10
Bishop, Henry Rowley, 35 n.3
bison: battles between bulls, 207; whether manes are protective, 140, 207
Biston struttaria. See Amphidallis prodrumaria
blackbird. See Sylvia atricapilla
Blackwell, John: sexual differences in spiders, 358-9, 376-7
Blackwell, Antoinette Louisa Brown: CD thanks for her book and his citations, 471 & n.2 & 3
Bleeker, R. Spruce describes role of beetles in fertilisation of, 176-7
blushing, 199 & n.3, 214, 243 & 244 n.12
Blyth, Edward: cited in Descent, 103 n.9; CD only read Land and Water for his articles, 385; Indian antelope, age at which horns develop, 102; mandrills in Antwerp zoo, faces not visible, 178-9 & 179 n.2; primates, sexual differences, 193; writes for the Field rather than Land and Water, 383 & n.3
Boa rubra (Hypomecus ruboraria, great oak beauty), 265 & 267 n.26
Boardman, Alexander E.: describes chimneyzee, 281-2
boars: white, 501. See also wild boar
Bob (CD's dog), 77 & n.9
Boccardo, Gerolamo: sends CD his Stomopologia, 270 & n.2, 559 & 560 n.2
Bodinius, Heinrich, 191 & 192 n.3
Bojer, Wenzel, 156 & 160 n.9 & 10
Boloria euphronia. See Argynnis euphronia
Bombus (Pisaterius campestris). See Apatanus campestris
Bombylex, proportion of sexes: B. castrensis (Malauwana castrensis), 484 & n.3; B. pennis (Antheura pennis), 316 & n.3; B. yamanai (Antheura yamanai), 316 & n.3; B. trifoliis (Lasciocampa trifoliis), 265 & 267 n.23
Boner, Charles: cited in Variation, 2nd edition, 510 n.3; feral sheep, 508-9 & 510 n.2; sends CD account of family afflicted by hereditary blindness, 300
Bonney, Thomas George, 171 & 172 n.13
Boraxia: CD germinates seed sent by F. Müller, 130 & 131 n.8
Borthwick, Thomas C.: sheep breed, 257 n.3
Bory de Saint-Vincent, Jean Baptiste Georges Marie, 159 & 161 n.21
Bo: descent of Chillingham cattle, 440 & n.6; B. longifrons, J. F. von Brandt fails to recognise as distinct species, 260 & 261 n.5; B. sondaicus (B. jardini), age at which horns develop, 102 & 103 n.5; B. sondaicus, A.R. Wallace misspells, 150 & 151 n.11; B. usus not present in historic times, 440 & 441 n.9

© in this web service Cambridge University Press  www.cambridge.org
calcareous sponges: CD seeks specimens for E. Haacke, 298, 312, 316, 319, 340–1, 342, 348; E. Haacke’s study of, 297, 561; A.M. Norman sends specimens to E. Haacke, 345–7 & 347 nn.6–20
Calliphora vomitoria. See Musca vomitoria
Callitarsis pudibunda. See Ogyia pudibunda
Calliphrys rubi. See Thera rubi
Callimastoma dromunculosis: sexual dimorphism with C. lyra, 397 & 398 n.5
Cambridge Museum of Zoology: seeks funds to display its collections, 170–1
Cambridge Philosophical Society, 96 & n.3; collections donated to Cambridge Museum of Zoology, 171 & 172 n.3
Cambridge University: E. Atkinson, vice chancellor, 171 & 172 n.5; W. Cavendish, chancellor, 171 & 172 n.4
Cambridge, Octavius Pickard, 335 & n.8
Cameron, Julia Margaret: photograph of CD, 515 & 516 n.10
Campbell, Dudley: CD renews subscription to Westminster Review, 342
Campbell, George Douglas, 8th duke of Argyll: J.D. Hooker describes natural theology of as false science, 365 n.4; requests that J.D. Hooker superintends Flora sylvestria of India, 362 & 363 n.4; J. Lubbock responds to criticisms at British Association meeting, 375 & 376 n.3; Prometal man, 456 & n.5, 571 & n.5; Reign of law, 106 & 107 n.10; Reign of law, A.R. Wallace’s review of, 185 & n.7; as secretary of state for India, approached to honour J.D. Hooker, 480
Canaries: hybrids, whether sterile, 246 & n.4, 247
Candolle, Alphonse de: Cassia, G. Bentham verifies species, 303 & 304 n.12; CD sends letter and seeds to J.D. Hooker, 419 & n.2, 426–7; CD thanks for account of experiments, 426–7; isolation in dry climates, 498 & 504 n.12; sends CD seeds from his extensive travels to observe effect of climate, 410–12, 563–4
Candolle, Augustin Pyramus de: Prodrumus (with A. de Candolle), 504 n.12; Umbelliferae, classification of in Genus plantarum, 19 & 20 n.9
Candolle, Casimir de: paper on phyllotaxy, 406 n.2
Canestrini, Giovanni: proposed Italian translation of Variation, 273 n.2, 283
Cannibals: alleged cave cannibals of South Africa, 44 & n.8
Capsa pyrenaica lasitanica: W.C. Tait observes, 110 & 111 n.7
Capsella bursa-pastoris: cross-fertilisation, 190–1 & 191 n.2
Cedrino baldus (Hoploderina baldus), 266 & 268 n.44
Caracass mimosus: fights Portuens puber, 54 & n.1; mating habits, 344
Cardamine pratensis: J. Price sketches, 193 & n.5
Cardew, Philip, success at RMA Woolwich, 504 & 505 n.4
Carpinus betulus: oak-leaved variety grown at Sans Souci, 402 & 405 n.9
Carpyoten pomonana (Cedyle pomonana, codling moth), 266 & 268 n.72
Carpenter, William Benjamin, 566
Carrière, Elie Abel: cited in Variation, 2nd edition, 84 n.2; selection of wild radish, 79–83 & 84 nn.2 & 6, 93 & n.2
Carus, Julius Victor: fails in application for chair of zoology at Leipzig, 453 & n.6, 456 & 457 n.2, 468 & n.2 & 459 n.3, 473, 570 n.6; CD offers choice to publish Descent with E. Koch, 473; CD invites to Down House, 450 & n.3; CD makes note to write to, 299; CD regrets he was not at home during Carus’s visit to England, 6; Descent, confirmed as translator of, 107 & 198 n.8, 443, 450, 454 & n.2, 458 & n.4, 484 & 495 n.2, 497–8, 571 & n.4; merino sheep, sends reports development of horns in Saxon breeds, 6, 33–5, 56, 321 n.5; Origin, translator of, 156; Origin, 5th edition, translation of, xx, 256, 273 & n.2, 560 & n.2; Origin, 5th edition, CD describes revisions, 204–5; Origin, 5th edition, CD offers option to work on corrected proofs or bound copies, 205, 256; Origin, 5th edition, CD sends bound copies, 256, 277, 281; Origin, 5th edition, CD sends additions, 490; Origin, 5th edition, requests list of additions, 197; Origin, 5th edition, will use bound edition, 256; C. Vogt meets at British Association meeting, 453 & n.7, 570 & 571 n.7; C. Vogt would not wish to offend if CD changes German publishers, 452–3
Cassell, Peter & Galpin: abortive plan for Russian illustrated Bible, 2 & 3 n.5
Cassia: G. Bentham’s revision of supports principle of descent, 164 & n.8; carpels, 524 & 525 n.14
cassowary. See Casuarius
Casuarina (cassowary): whether females sit on eggs, 150 & 151 n.15, 153
Caton, Charles Edward, 210 n.8
Caton, John Dean: cited in Descent, 209 nn.3 & 5, 210 n.8, 215 n.29; CD thanks for information, 245; deer, sexual selection, 193–40; observation on elk and deer, 206–9
cats: blue-eyed, whether deaf, 101 & n.2; CD thanks anonymous correspondent for information, 396; kittens of black cats show traces of stripes, 229; manx, 128, 173; G. Maw describes curious tor-

cirripedia: C.F. Claus compares morphology with copepods, 67 & 69 n.3; 547 & 548 n.3; CD offers specimens to C.F. Claus, xix, 41, 47–8, 138, 544, 552–3; larvae, 47; morphology, 47–8 & 48 nn.8 & 9

cius spp.: cultivation in Pottsdam, 328 & 329 n.26

Citrus densauma (C. maxima): F. Müller experiments with grafting, 322 & 323 n.8

Claparede, Edouard: comments on French translation of Origin, 431 n.5; CD makes note to refer in writing to F. Müller, 271 & 272 n.8; memoir on acarids, 378 & 379 n.9

Clark, Alexander Ross, 70 & n.4

Clark, John Willis, 170, 171 & 172 n.1

Clathrina: C. contorta. See Lecosolenia contorta; C. coriacea. See Lecosolenia coriacea

Clau, Carl Friedrich: asks CD for specimens of cirripedia, 41, 67, 544, 548; copepod fauna, differs from F. Müller, 68–9 & 69 n.9, 548 & 549 n.9; CD offers specimens of cirripedia, 47–8, 67 & 68 n.2, 198, 164 & n.1, 547 & 548 n.2, 552–3; critical of E. Haeckel, 41, 543: Lepidopora appendiculata, sends CD pamphlet on, 40 & 41 n.2, 543 & 544 n.2, 47–8; Lepadidae, researches development of, 41 & n.6, 67 & 68 n.3, 543–4 & 544 n.6, 547 & 548 n.3; research in Messina, 537 & 539 n.13

Clifford, William Kingdom, 77 & n.6

Williams Clowes & Sons: Origin, 5th edition, printing of, 60 & 61 n.4

Cobbe, Frances Power, 310 & 311 n.3

Cobbold, Thomas Spencer: CD offers parasitic worms collected in South America, 357–8 & 358 nn.2–6, thanks CD for specimens, 372

Cocos Islands: CD hopes N.J. Anderson can visit, 280; CD would expect to have unique flora and fauna, 280 n.10

Coeloglossum: hybrids with Platanastra, 457 n.2; C. viride. See Persicystis viride

Coelopa frigida: fertilises Epitaxis palustris, 308 n.2

Coffee arabicus: not dimorphic, 523

Colenso, William: article on Maori by, commended by J.D. Hooker, 320 & n.8; CD would like to read article on Maori by, 338

Coloeasia corsyi. See Demas corsyi

Coluber: parasitic worms collected by CD, 357 & 358 n.4

Colubra liva: descent of domestic pigeons from, 106 & 108 n.15, 127–8 & 129 n.6

Colvin, Walter Mytton, 71 & 72 n.6

Comte, Auguste: T.H. Huxley attacks R. Congreve for defense of, 351 n.6; T.H. Huxley concurs positively, 114 n.2, 125 & n.3, 126, 312 & n.4, 338–9 & 339 n.6; V. Lushington’s a red-hot
Index

Comte, Auguste, cont.
Comte’s, 114, 126
Concholopas: CD offers specimen to C.F. Claus, 48
& n.9
Congreve, Richard: T.H. Huxley delivers crushing response to, 351 & n.6
Conistra vaccinii. See Conistra vaccinii
Connovulosa obtusata: twining, 590
Cooke, Robert Francis: CD thanks for sending Quarterly Review, 265–7 & 297 n.2; F. Müller, Facts and arguments for Darwin, costs of publication, 91,
94 & 95 n.1 & 2, 95 & n.2; F. Müller, Facts and arguments for Darwin, CD specifies text for spine, 113, 125 & 126 n.9; F. Müller, Facts and arguments for Darwin, presentation and review copies, 95, 113, 125; Orchids, supplies electrolytes for French translation, 198 & n.1; Orchids, supplies woodcuts for French translation, 91 & n.3; returns drawings for Descent to CD, 460 & n.1; sends CD copy of Origin, 5th edition, 279, 416 n.2; suggests CD pursue payment for stereotypes for Italian translation of Variation, 283
Cope, Edward D.: paper on origin of genera, 201 & n.1
Copenhagen Prehistoric Museum: J.D. Hooker finds ‘perfectly wonderful’, 286
copesdids: C.F. Claus compares morphology with ciriopedia, 67 & 69 n.3, 547 & 548 n.3
Copyright Act 1814, 61 n.2
Copyright Act 1842, 61 n.2
Corynides, 48 & n.8
Corrie, George Elmes: master, Jesus College, Cambridge, 171 & 172 n.7
Corystesthes: pollination by Euglossa, 422 & 423 n.4
& 5, 438 & 459 n.2, 486, 507–8 & 506 n.4 & 5; CD advises F. Delpino to read H. Cruger’s study of, 431
Cosylus aestivus: fertilisation, 204 & n.10; variation in leaf shape and colour, 326 & 328 n.7 & 8
Corymbyferae: fertilisation of, 453 & n.2
Cosmio tropica: sexual ratios, 266 & 268 n.38
crabs: fighting, 54 & n.1
Cambessed: E. Haackel researches, 414 & 415 n.8,
565 & 566 n.8
Cambus sp.: sexual ratios, 266 & 268 n.74
Graven, William Augustus Frederick, Viscount Uffington, 336 n.8
Cresson, John Chapman, 580 & 581 n.5
Crichton-Browne, James: cited in Expression, 240–
1 nn.4–5, 9–10 & 15–19, 243 n.3, 251 n.3; CD thanks for information and asks further questions, 263–4; CD thanks for assistance and offers presentation copy of 5th edition of Origin, 243–
4 & 244 n.15, 251 & 252 n.8; photograph, 233;
sends CD notes on expression among the insane, 234, 235, 249–51 & 251 n.2
Croll, James: alternating glacial periods in northern and southern hemispheres, theory of, xvi–
xxvii, 51 & 52 n.4, 283 & 284 n.3; cited in Origin, 5th edition, 52 n.4, 283 & 284 n.2, 359–40 n.10; CD accepts findings of age of the earth in 5th edition of Origin, 205 n.4; CD asks whether position of axis of the earth ever changes, 51, 128 & 129 n.10; CD corresponds with subsaerial denudation, 452 n.10; CD impressed with ingenious theory of, 143 & n.2; CD more confident of Croll’s calculation of date of ice age than is A.R. Wallace, 174–5 & 175 n.3; CD returns book on climate change with gratitude, 51 & n.2; erosive power of rivers, 482 n.7; geological time, xvii, 62–3 & 64 n.6, 174–5 & 175 n.3; gravitation and heat, 62, 77 & nn.3 & 8; loss of solar energy, causes of, 61–3, 72 n.2; Origin, 5th edition, presentation copy, 283; physical cause of motion of glaciers, 78 & n.3, 96–7 & 97 n.2; views on subsaerial denudation anticipated by J. P. Lesley, 212; A.R. Wallace would have liked to devote more space to in Quarterly Review, 185
Crossopidion: early development of tail feathers, 157 & n.3
Crüger, Hermann: CD commends analysis of Corystesthes ‘bucket’, 231 & 232 n.2; CD sends paper on Corystesthes to F. Delpino, 458 & 459 n.2,
572 & 573 n.2; pollination by Euglossa, 422 & 423 n.3, 568 & 569 n.5
Cruickshank, Anthony: proportion of sexes of catle, 331
Crustacea: A. Dohrn’s revised classification of, 535–6 & 538–9 nn.2–8; sexual selection, 344 & n.2, 349 & n.3 & 350 n.6, 352
Cryptops asurius: See Scoparia asurius
Cryptopitllus: Concholopas formerly abounded with, 48 & n.9
cuckoo: Brazilian, nesting habits, 11 & 12 n.6; cuckoo-like behaviour of Truphais, 11; S.A. Merrill observes American cuckoo in a Jay’s nest, 54–
5; sub-breeds, plumage, 99, 180, 336 & 337 n.3, 370
Cucullula: C. falcata (Sharpgarcilla falcata), ratio of sexes, 266 & 268 n.61; C. scopuliferae (Sharpgarcilla scopuliferae), ratio of sexes, 266 & 268 n.60
Cunningham, Robert Oliver: finds Ampholitina, 350 & 351 n.1; naturalist, HMS Nassa, 215 & n.2
Cupules, Anne Jane: visits Down, 276 & 277 n.10
Cupules, George, xvii; acknowledged in Descent for providing information, 277 n.3; W. Aitchison sends data on sexes of lambs, 272 & 273 n.1 & 3, 275–6 & 277 n.2, 287–8, 294; cited in Descent,
Index

8 n.4, 32 n.4, 277 n.9; collects data about ratio of sexes in sheep and cattle for CD, 384 & n.2; CD reports findings on timing of appearance of sexually determined characteristics, 7 & n.1; CD thanks for assistance, 450 & n.1; deer, obtains information for CD, 8–9, 31; deer-hounds, publication on, 9 & n.3; deer-hounds, puppies, difference in size of sexes and sexual ratios, 117–
21, 463–4 & 464 nn.1–3; deer-hounds, six-toed puppy, 3 & 4 n.2; R. Elliot sends data on sexes of sheep, 278, 288–9, 257–8, 275–6; J. Graham confirms higher mortality of male lambs, 306–7; lambs, sends CD report on proportion of sexes, 252; A. McNell, sends CD information on horns of red deer from, 9 & n.3, 17–18, 42; J. Oliver confirms higher mortality of male lambs, 303–4 & 304 n.11; A.C. Pagan sends data on sexes of lambs, 317–18; plans to compile statistics for CD, 146–9; J. Rait sends data about ratio of sexes of cattle, 331–2; ratio of sexes in herds and flocks, writes to breeders, 258 nn.3–9, 275; rats, ratio of sexes, 383–4; reports six-toed Pyrenean deer-
hound, 324; J. Russell unable to supply data on sexes of lambs, 274 & n.1
Circumcisionidae: musical, 386 & n.5
Curvis's Botanical Magazine: drawing of Drosophyllum lusitanicum, 23
cut pages, CD's advocacy of, 111 & n.2
Cuvier, Clément: C. Lyell's meetings with, 213 n.2
Cuvier, Georges: correlation of parts, 27 n.7; illustration of snake-like lizard, 316–17 & n.4; C. Lyell attended soirees of, 211 & 213 n.2; A.R. Wallace quotes in Quarterly Review article on Lyell, 174 & 175 n.2, 206 & n.5
Cydia pomonella. See Carposopha pomonana
Cynophthala or (Achyta flavicornis): ratio of sexes, 266 & 268 n.39
Cymbalaria maritima. See Linaria cymbalaria
Cypris quadrucculata (gull wasp): one of two female forms of C. g. spicifrons, 167 & n.2
Cyphella: F. Müller finds self-sterile, 271 & n.6, 378
Cyrtodora norvegica (Vergula norvegica): A.M. Norman offers specimens of, 346 & 347 n.10
Cyprinodontidae: sexual differences, 407 & 408 n.7
Cytherea (Cythera), 345 & 347 n.9, 346
Dallas, William Sweetland: F. Müller, Facts and arguments for Darwin, translator, 61 n.3, 65 nn.1 & 2, 95; F. Müller, Facts and arguments for Darwin, publication, 93; F. Müller, Facts and arguments for Darwin, presentation copies, 93, 113, 185
Dalton, John: law of constant composition, 529 & 530 n.13
Dana, James Dwight: CD's acquaintance with, 336 & 337 n.6; F. Müller, Facts and arguments for Darwin, presentation copy, 193, in poor health, 511 & 512 n.10
Danielssen, Daniel Cornelius: admiration for CD, 414 & 415 n.14, 505 & 506 n.14
Daphne maximum: yellow-fruited, 336 & 338 n.9
Dareste, Camille: animal monstrosities, work on, 491 & n.2, 522 & n.7, 576–7 & n.7; asks for CD's testimonial in applying for chair of physiology in Paris, 485, 491, 575–6; candidature unsuccessful, 541–2, 576–7
Darwin, Charles Robert
AWARDS AND POSITIONS: American Philosophical Society, diploma, 380; Down Coal and Clothing Club, treasurer, 517 n.3; Down Friendly Club, treasurer, 435 n.2; Down National School, treasurer, 56 & n.1, 73 & n.1
FINANCES: N.J. Anderson's expedition to Galápagos, would gladly subscribe £50 to, 280 & n.10; Casile Morton tithes, share of bequeathed to by R.W. Darwin, 2 n.7; G.H. Darwin, advances £70 to prior to his departure for Paris, 96 & n.4; G.H. Darwin, pays £121.10. for G.H. Darwin's horses, 96 n.8; G.H. Darwin, pays £52 10. for his studying law with C.M. Tatham, 436 & n.1; W.E. Darwin manages investments, 1; Down village, projected panForge, will not subscribe more than £20, 437; Elliot & Fry, payment to for photographs, 506 n.6; Faraday Memorial Fund, contributes three guineas, 364; John Fox & Sons, payment to, 427 & 428 n.11; Journal of research, sales, 55; F. Müller, sale of 500 copies of Facts and arguments for Darwin will more than repay CD's outlay, 321; Origin, 3rd edition, pleased that J. Murray is printing 2000 copies at 144, 198; Origin, US royalties, 531 & n.2; Origin, US sales, 53 & 54 n.1; receives cheque for £50 from Orange Judd & Co., 188 & n.6, 253; G. Recht, payment of £3, 104 n.2, 552 n.2; sends WB. Tegetmeier ten guineas, 184; translation rights, may seek payment for, 450 & n.4, 450–1; US publishers offer ten per cent royalty on sales, 494; Westminster Review, pays annual subscription of £5, 342 & n.2
HEALTH: always 'a poor Devil' but able to work 2–3 hours daily, 93; asks his physician whether Pulvermacher's electric hands might relieve dyspepsia, 255 & n.3; A. Dohrn inquires after, xxiii, 337, 53; doubts his health will enable him to publish much more, 341; falls from his horse and suffers bruising, xxiii, 175 & 176 n.12, 178 & 179 n.1, 190 & n.2, 579; falls from horse prevents from going to greenhouse, 183; falls from horse, recovery quicker than expected, 198, 199, 206 &
Darwin, Charles Robert, cont.
n.8, 252–3; falls from horse, reports ‘wonderful recovery’ to J. Paget, 199; fall from horse, will spend two months in Wales recuperating, 262 & 263 n.7; fall from horse, J. Blackwell commiserates, 359 & n.9; fall from horse, A. Gray and J.L. Gray commiserates, 218; fall from horse, J.D. Hooker commiserates, 284; fall from horse, J.T. Moggridge commiserates, 388; fall from horse, J. Murray commiserates, 196, 392; fall from horse, A.R. Wallace commiserates, 185, 284; holiday in Wales fails to improve, 295, 320 & n.11, 321, 338, 342, 579; holiday in Wales, too weak to do anything on new book, 339, holiday in Wales, unable to walk so uses a pony, 289–90, 310 & 311 n.3; improved on return from Wales, helped by walking, 355; limits experiments as has little strength to spare, 496–7; F. Müller inquires after, 437; no strength after talking so much to Dr Hooker so unable to lunch at the Lubbocks, 406; Orchids, lacks strength to abstract all of F. Müller’s comments for addenda, 522; plans to resume horse-riding after recovery, 199; prevents from going to London to be photographed, 198; prevents from visiting grass experiments at Rothamsted, 257 & n.2; so bad that family is spending a month in Wales, 303; strength grows, gives way when he stops mental work, 279; through weak health, has decided not to pursue variation under domestication beyond correcting errors, 255; too weak to spend a whole day being photographed, 506; R. Trimen inquires after, 487; unable to invite W.C. Tait to Down as excitement of conversation would be too much for him, 294; unable to receive strangers at Down because too fatiguing, 290; will always be weak but better than a few years ago, 192; wishes he could accept T.H. Farrer’s invitation ‘for I am not by nature a savage’, 360; ‘with the life of a hermit’ can work some hours daily, xxii, 538; work much delayed by ill health, 294

OPPONENTS OF THEORIES: Athenanum, 302; Athenanum has abused CD and all who think with him, 322; Académie des Sciences and French scientific elite, 112 & n.6, 162 & 163 n.4; Anglican clergymen at British Association conference, 412 & 413 n.3; J.E. Gray ridicules natural selection, 179 n.3; J. McCann, xxii, 357 n.4; J.J. Murphy, 447 & 448 n.3; C.W. von Nägeli, 360 & n.4; R. Owen, 198 & n.2; 395 & n.3, 420 & n.2; P. Pflaff, 60 & n.7, 545 & 547 n.7; W. Thomson’s views of recent age of the world ‘one of my sorest troubles’, 175; S. Wilberforce, 198 & n.2

PUBLICATIONS:
— Autobiography, 48 n.9
— Climbing plants, 471 n.2; CD offers to send to W.C. Tait, 128; CD sends to L. Rerolle, 226 & n.7
— Coral reef; continental subsidence and formation of, 463 n.4
— Cross and self fertilisation; Abutilon, 322 n.5, 439 n.9; bees, increased frequency in visiting certain flowers, 30 n.3; Lycopus dioicus, sexual organs, 438 n.4; Euphorbiola californica, self-sterile in Brazil, 513 n.14 & 16
— Descent; Academy, advance notice of publication, 392 & n.3; 393, 433 & n.1, 446 & n.1, 447 & n.2, 448, 449 & n.2; 450, 452, 456 & n.3; 533 & 534 n.11; W. Atchison cited, 273 n.2, 294 n.2; Antilope bequaertiana, colour differences, 103 n.5; acridians, relation of larvae to vertebrates, 3 n.6; Aymara Indians, 72 & 73 n.3; C.S. Bate cited, 54 n.1, 344 n.2; beards, whether paler and redder than hair on head, 254 n.14, 287 n.12, 527 n.3; J. Bedloe cited, 367 n.7, bees, sexual differences, 371 n.3; E. Blyth cited, 103 n.9; C. Boner looks forward to, 509; W. Buckler cited, 263 n.2; butterfly, drawing of, 203 & n.5; Callitonymia lyra, sexual dimorphism, 398 n.5; A. Campbell cited, 356 n.13; J.V. Carus to translate into German, 205, 243, 465 & 466 n.2; celpillars, protective coloration and spines, 116 n.2; J.D. Caton cited, 209 n.3 & 5; 210 n.8, 245 n.29; Chamaeleon spp., horns, 408 n.11 & 12; characteristics acquired later in life transmitted to one sex only, 148 n.5; crabs fighting, 54 n.1; Crustacea, sexual difference, 332 n.4 & 5; G. Cupples acknowledged, 277 n.3; G. Cupples cited, 8 n.4, 32 n.4; Cypripedium, sexual differences, 408 n.7; CD completes chapters on sexual selection, xvi–xviii, 476 & n.6; 378; CD makes no progress with during stay in Wales, 339; CD sends plates to E.A. Smith, 292–3 & n.1; CD works on, 190 & 131 n.10, 205 & n.6, 206 & n.4; 321; CD’s ill health delays work on, 320 & n.11; W.B. Dawkins looks forward to, 441 n.11; deer, age at which horns develop, 32 n.4, 45 n.2; deer, battles between those with branching horns, 210 n.9; deer-hound puppies, weight, 464 n.3; deer-hounds, descent, 8 n.4; drawings, G.H. Ford preparcs, 397 & 398 n.2, 409; P.M. Grey Egerton cited, 85 n.1 & 2; elephants, polymorphy, 395 n.4; elk, difference in male and female colour, 209 n.3; R. Elliot cited, 258 n.2, 289 n.2; W. Elliot cited, 348 n.3, 254 n.1, 385 n.4; Entomotroca, males not bigger than females, 352 n.5; T.C. Eton cited, 45 n.2; fish, care for nests, 452 n.4; D. Forbes, CD

Trimen, drawing of butterfly, 293 n.5; illustrations, woodcuts, 204–5 & 293 n.2–3. 393 & 394 n.4; Indian wild boar, polygamy, 354 n.1; inherited sexual characters, 371 n.5; J. Johnston cited, 375 n.2; Jollos, sexual selection, 534 n.7; lambs, early mortality of males, 258 & n.2; H. Landis, drawings of, 293 & 293–4 n.6; Lapidocera, drawing of, 293 n.4; larval ascidians and vertebrates, relation between, 3 n.6; Lithobius, prehensile appendages, 352 n.4; lizards, difference in sexes, 408 n.13; J. Lubbock, drawing of Lapidocera, 293 n.4; A. McNeill cited, 43 n.2 & 4, 91 n.2; mandrills, barrenness of, 179 n.2; migratory birds, males arrive before females, 269 n.2; A. Milne-Edwards, drawing of a crab, 292 & 293 n.3; mortality of male lambs, 294 n.2; moths, males gathering around single female, 498 n.3; J.J. Moulujean keen to translate into French, 446; S. Nilsson cited, 7 n.1; A.C. Pagan cited, 318 n.1; parrots, acclimatisation, 14 n.5; Pavo spp., development of spurs, 192 n.2, 194 n.1, 381 n.3; polygamy in elephants, 375 n.1; polygamy, in relation to sexual selection, 354 n.1; W.T. Preyer cited, 146 n.1; proportion of sexes, 48 n.1; proportion of sexes, domestic animals, 153 nn.2, 3, 5 & 6; rabbits, fecundity of tame and wild, 216 n.1; rams, use base of horns as point of contact in a charges, 210 n.10; ratio of male and female human births, 278 n.1; ratio of sexes, horses, 278 n.2; ratio of sexes, Lepidoptera, 293 n.2; ratio of sexes, sheep, 273 n.1, 274 n.2, 277 n.3, 289 n.2, 318 n.2, 353 n.1; W.W. Read cited, 291 n.2; W.W. Read looks forward to, 534; red and fallow deer, mating rituals, 85 n.1 & 2, 91 n.2; reindere, age at which acquire antlers, 7 n.2; Reune des cours scientifiques, request to publish ex- cepts, 449 n.2–3, 506 & n.3; P. Robertson cited, 32 n.4; sexual selection, pheasants, 381 n.2; sexual selection, rats and moles, 384 n.2; sheep, development of horns in Badagry rams, 291 nn.2 & 3; sheep, proportion of sexes, 273 n.1, 274 n.2, 277 n.3, 289 n.2, 318 n.1, 353 n.1; E.A. Smith engraves woodcuts, 293 & n.2; 294, 473 & 474 n.2; E. Smith cited, 371 n.2, 392 n.2; Solenostoma, coloration, 408 n.8; spangled Hamburgh chickens, 100 n.4; stridulating insects, 386 nn.1–4 & 387 n.7, 421 nn.1 & 4–5, 467 n.2; P.E. Strzelcki’s assertion that intercalar unions lead to infertility with woman’s own race disproved, 337 n.4; supernumerary mammas, 146 n.1; G. Swansland cited, 269 n.1; R. Teebay cited, 100 n.1; W.B. Tegtmeyer cited, 182 n.4; R. Trimen, drawing of butterfly, 293 n.3; US edition, D. Appleton to publish, 496 & n.2, 502 & n.4, 531 n.3 & 5; R. Wallace anticipates enormous sales, 447; H.W. Weir cited, 133 nn.2, 3, 5 & 6; J.J. Weir cited, 116 n.2, 247 nn.2 & 3; wild boar, polygamy, 385 n.4; woodcuts, 204–5 & 295 nn.2–3, 393 & 394 n.4, 490, 473 & 474 n.4.

— Earthworms; D.T. Fish cited, 217 n.1
— Expression; under anaesthetic, 242–3 & 244 n.7; blushing, 244 n.12; J. Crichton-Browne cited, 240–1 nn.4–7, 9–10 & 15–19, 243 n.2, 251 n.3; CD decides to publish as separate work, 483 n.3; G.B.A. Duchene cited, 243 nn.4 & 5; F.F. Geach cited, 244 n.13; A. Gray and J.L. Gray’s assis- tance acknowledged, 220 n.2; J.L. Gray cited, 221 nn.10 & 12; grief muscles, 244 nn.6 & 9; hair standing on end, 251 n.3; of the insane, 240–1 nn.4–7, 9–10, 14–15 & 18–19; J. Paget cited, 244 n.12; platsyme myxides, 243 n.4; W.W. Read cited, 334 n.4; J. Scott cited, 302 nn.5–7 & 8.
— Fertilization of orchids’, 339 & 340 n.11, 396 n.1; Coryanthes fertilised by Euglossa bee, 459 n.2; CD completes, 578 & 579 n.3; CD sends to F. Müller, 378 & 379 n.10; Euglossa, pollination by, 423 n.5; T.H. Farrer cited, 90 n.1, 361 n.9; H. Müller cited, 397 & n.2; Herminium monorchis, fertilisation, 387 & 389 n.4; J.T. Moggridge acknowledges ci- tation, 387 & 389 n.3; H. Müller cited, 387 & 389 nn.4 & 5; presentation copy, H. Müller, 396–7; presentation copy, G. Henslow, 406; presentation copy, F. Delphin, 421–2 & 432 n.2, 567 & 568 n.2; publication, xx, 112 n.5; publication, letter to An- nals and Magazine of Natural History accompanying, 337 8 & 338 n.2.
— Forms of flowers; dioecism, 28 n.6; Oxalis,
Darwin, Charles Robert, cont.

heterozygous, 131 n.7; Ponderaria, heterozygous, 524 n.3

— ‘Formation of mould’, 222 n.3

— ‘Illegitimate offspring of dimorphic and trimorphic plants’, presentation to F. Delpino, 421 n.2 & 423 n.1, 576 & 578 n.2

— Insidious plants, 136 n.5; Drosohyllium laxan-
tium, 170 n.3, 183 n.3

— Journal of researches, 162 & 163 n.3, 187; CD presents to J.N. Hegg, 194, 195; expiration of copyright, 60 & 61 n.2; French translation, 52 & 53 n.1, 53 & 56 n.3, 112 & n.6; Malolothrus niger, 130 & 131 n.14, 132 & 134 n.3; J. Ortont treats as model, 5 & 6 n.10 & 11; Pupatio ferox, stridula-
tion, 378 & n.2; C.P. Haussollier seeks permission to translate, 52, 112 & n.6; publishing history, 56 n.3; uniform edition with Origin, 35

— Living Circumpedia, 41 n.8 & 9, 48 n.8 & 9, 69 n.5, 544 n.8 & 9, 549 n.5

— Movement in plants; Diosen mustafilla, lack of heliotropism, 314 n.3; Mirhos, n.1

— Orchids, 27 n.5, 30 n.3, 471 n.3; Cephalanthera, as degraded form of Epipactis, 222 n.2 & n.3; CD notes that information has invariably been gathered in most liberal spirit, 285; CD offers to send to W.C. Tait, 126, 321; Epipactis palustris, fertilisation by insects, 287 n.2, 304, 308 n.2; morphologi
cal features as adaptations revealing information about agents of fertilisation, 304, 349 n.4; M. Somerivlle uses illustrations in On molecular and microscopic science, 33 n.2, 41 n.2; R. Spruce thanks CD for presentation copy, 177

— Orchids, 2nd edition; Epipactis palustris, fertilisation by insects, 308 n.2, 315 n.2

— Orchids, French translation; CD addenda, 112 & n.5, 123, 226, 253 & n.8, 287 & n.4, 322; CD addenda published as ‘Fertilisation of orchids’, 337–8 & 338 n.1, 339 & 340 n.11; electrotypes supplied by J. Murray, 198 & n.1; E. Faivre re
tests request for publication of translation by L. Rôrole and will review, 85–6, 91, 123, 134, 198 n.1, 550, 552; F. Müller cited, 322; publication, 344 n.5; C. Reinwald will publish, 225–6 & 228 n.1; L. Rôrole sends CD chapters for review before publication, 343–4; woodcuts, 91 & n.3, 134 & n.3, 352 & n.3

— South America; CD welcomes C. Lyell’s interest in, 231; fossil gastropods, 51 n.3

— ‘Specific difference in Pinnula’, 309 n.5; presentation to F. Delpino, 421 & 423 n.1, 576 & 578 n.2

— ‘Three forms of Lythrum salicaria’; J.D. Hooker makes error in quoting, 26 & 27 n.11, 36

— Variation, 471 n.2, 485 n.4; L.E. Becker ad
mires, 12–13; Begonia frigida, 132 & 134 n.3; bud
variation, 263 n.4, 508 n.1; canary mules, fer
tility, of 247 n.4; Chillingham castle, descent, 440–1 n.6.5; correlation of growth, 417 n.7; W.B. Dawkins, altered view of descent of British cat
el, 440 & 441 n.10; deafness in blue-eyed cats, 101 & n.2; E.S. Delamer cited, 519 & n.3; dino
goes, 99 n.2; dogs, with pendant ears, 554 n.4; dogs, rudimentary fifth toe in some large breeds, 4 n.2; W. Elliot cited, 348 n.2; fertility, whether affected by captivity, 208–9 & 210 n.12; fowl, plumage of cuckoo sub-breeds, 337 n.5; foxes, hybridism and breeding in confinement, 101 & n.1; gall wasps, 168 n.7; graft hybrids, 525 n.12; graft hybrid potato, 32 n.1; grafting, influence on rootstock, 405 n.17; greyhounds, alteration of separate characteristics, 551 & 816 n.7; heredi
tary blindness, 601 n.5; R. Heron, rabbit breeder, 310 n.2; horses, striped, 415 n.13; hybrid pota
toes, 366 n.2; hybrid steroids, 105–6 & 107 n.9; inherited mutation, 105 & 107 n.8; P.G. King cited, 99 n.2; L. Rütmeyer cited, 440–1 n.6.5; J. Le Couturier cited, 321 n.3; pangenesis hypothes
is, 12 n.10, 46 & n.5, 93 n.4, 320 n.5, 422 & 423 n.8, 431 n.1, 568 & 569 n.9; parrots, difficulty of breeding in captivity 13 & 14 n.2; planned second and third works never published, 197 & n.5; polydactylysm, 525 n.6; potatoes, acclima
tation, 341 & 342 n.1; proposed Italian translation, 259 n.2, 283; regrowth of limbs, 432 n.5; retention of rudimentary organs, 432 & 433 n.2; A. Reuter reads daily, 398; reversion from crossing, 396 n.3; C.A. Rayer comments on in preface to 3rd French edition of Origin, 415 & 416 n.4, 472 n.5, 566 & 567 n.4; second part planned, 502 & 504 n.3; sheep, colour of Southdown lambs, 202 n.3; sheep, whether feral, 500 & 501 n.5; sooty fowl, sexual selection, 391 & 393 n.14; Symphy
atum officinale, propagation of, 304 n.3; variation under domestication, has resolved not to pursue beyond correcting any errors he may have published, 255; Finca minor, seldom fruits in England, 414 n.5; B.D. Walsh cited, 168 n.7; wheat, selection of, 351 n.3; wild turkeys, breeding with do
destic fowls, 210 n.13; a young Frenchman has read, 383 & 386 n.2

— Variation, 2nd edition; E.A. Carrière cited, 84 n.2; climate, effect on fertility, 410 n.3, 412 n.3, 584 n.3; CD responds to Delphin’s comments on pangenesis, 442–3 n.2; CD revises views on pangenesis and regrowth of amputated parts, 391 n.2; feral sheep, 501 n.6, 510 n.5; parrot breeding, 14 n.5; wild mulish, cultivation of, 84 n.2
— Variation, French edition; presentation, E. Faivre, 86 & n.4; 550 & n.4; C. Reinwald publish Moulinité translation, 226 n.2; C. Vogt revises, 478 n.2
— Variation, German edition; CD regrets having granted translation rights without charge, 450 & n.4; E. Koch plans second edition, 197 & n.4, 273 & n.3, 580 & n.3; sales, 6 & n.3, 35 & n.5, 197 & n.3, 205, 273, 560
— Variation, Italian translation, 279 n.2; stereotypes sent to G. Canestri, 283
— Variation, US edition; sales steady but half unsold, 187 & 188 n.2, 188 & n.6
— Volcanic islands, 232 & 232 n.6
— ‘Volcanic phenomena and formation of mountain chains’, 70 n.4

Reading: American Entomologist, articles by B.D. Walsh and C.V. Riley, 167 & n.2; M.E. Barber, paper on snakes, 310–11 & 311 n.8; R. Bennett, cross-fertilisation Parnassia palustris, 191 n.1; G. Bentham, anniversary address to Linnean Society, 476 & 477 n.10; E. de Chaparéde, parasitism of acarids, 378 & 379 n.9; C.F. Claus, larvae of cirepides, 51 n.6, 544 n.6; J. Croll, physical cause of motion of glaciers, 96–7 & 97 n.2; H. Crüger, analysis of fluid in Croyante ‘bucket’, 233 & 432 n.2; W.B. Dawkins, prehistoric British mammalia, 440 n.6; E.S. Delamer, Papions and raptors, 519 n.3; F. Delpino, articles on Marantaceae and phytograph tables, 439 n.10, 431, 509 n.10; G.B.A. Duchene, analysis of expression of emotions, 243 n.4, 243; F. Galton, Hereditary genius, 530 n.1; 532 n.3; Gardners’s Chronicle, M.T. Master’s observations on Sapoñana, abstract, 14 & 15 n.3; L.P. Grattolat, physiology of expression, 242 & 244 n.6, A. Günther, studies of fish and reptiles, 394 n.1; E. Haeckel, caracous sponges, 298 n.8, 415 n.7, 580 n.7; E. Haeckel, Natural history of creation, 298 n.3, 561 n.3; E. Haeckel, siphonophores, 298 n.5, 562 3 n.5; T.W. Harris, Entomological correspondence, 387 & nn.3 & 4; F. Hildebrand, pollination of flowers, 444 & n.5; G. Jager, Darwinian theory, 274 n.1, 380 & 381 n.1; A. Kernor von Marilau, plant distribution, 408 & 489 n.7–9; 455; A.O. Kovalevsky, developmental history of simple ascidians, 2–3 & 3 n.6; G. Maw, disposition of iron in variegated strata, 15 & 16 n.4; T. Mechen, Mitella repta, 263 n.5; A.B. Meyer, poisonous snakes, 483 n.7, 572 n.7; Monch, Jesuit critique of theories, 448 & 449 n.3; F. Müller, Alismata, 510 & 512 n.5; F. Müller, Cyprinidae, 510 & 512 n.6; F. Müller, Facts and arguments for Darwin, 137–8 & n.1; H. Müller, application of Darwinian theory to flower-visiting insects, 397 n.3; H. Moller, cultivation of Westphalian orchids, 262 & 263 n.5; C.W. Nageli, on perfectability, 310 & 311 n.5; C.W. Nageli, on concept of origin of species, 15 n.1; W. Ogle, fertilisation of Salvia, 309 & n.2; J. Orton, ‘Physical observations on the Andes and the Amazonas’, 5 n.5; W.T. Preyer, pamphlet on struggle for existence, 146 n.1, 161; Quarterly Review, J.B. Morley, ‘the argument for design’, 339 & 340 n.12; A. Quatrefages, critique of transformation in Revue des Deux Mondes, 163 n.5, 555 n.5; A.C. Ramsay, Physical geological and geography of Great Britain, 261 edition, 61 & n.2; S.H. Scudder, papers on crickets, 387 & n.2; M. Somerville, On molecular and microscopic science, 33 & n.2, 36; H. Spencer, Principles of biology, Appendix, 27 n.8; T.R.R. Stebbings, lecture on Darwinism, 108 & n.1; J.H. Stirling, paper on protoplasm, 476 & n.7; P.E. Strzelecki, Physical description of New South Wales, 337 n.4; P.G. Tait, ‘Geological time’, 339 & n.7, 354 & 355 n.4; R. Treeby, spangled chickens, 100 n.4; H. Thiel, application of Darwinian selection to social questions, 101; H. Thiel, scientific agriculture, 87 n.1; E.B. Tylor, survival of savage thought in modern civilisation, 476 & n.8; A.R. Wallace, Malay Archipelago, 111 & n.2, 143, 145; A. Walther and L. Molendo, mosse, 265 n.3; J.J. Weir, paper on insects and insectivorous birds, 229; W. Whittaker, article on subaerial deduction, 61 & n.3

Scientific opinions: age of the earth, xvii, 339–40 n.10; alternating glacial periods in northern and southern hemispheres, xvi, 52 n.4; 283 & 284 n.3; classification, relation to genetic system, 36; dichogamous plants absolutely require cross-fertilisation, 321; direct and definite action of external conditions, 265 & n.4; ‘degradation’ only an appropriate term where there is reason for it, 213, 221–2 & 222 n.2; distinct individual plants must occasionally be crossed, 477; emergence of characteristics at different developmental stages, 7 n.2; Evolutionists, prefers not to make a class as distinct from Uniformitarians, 165; geographical distribution, factors influencing, 498–9; geographical distribution and the glacial period, 1846 note, 448 & 449 n.8; geological time, xvii, 339–40 n.10; icebergs, as mode of transporting vegetable matter, 114–15; inherited mutations, has come to believe in possibility of, 166; insects directly modify structure of flowers, 166 & 167 n.3; isolation, importance of in preserving old forms, 286; large genera have more varieties than small, 498 & 499 n.10; law of correlation of growth, 417 & n.7; morphology
Darwin, Charles Robert, cont.
explains agents of fertilisation, 304, 429 n.4; natu-
ral selection, non-ideal characters may remain
unaltered, 21 & n.9; Nature abhors perpetual
self-fertilisation, 439 & 460 n.10; new species not
generally descended from a single pair of par-
ents, 458; Origin, all views in would need to be
modified over 20 years, xx, 36; permanence of
continents in recent period, 451 & 452 n.8; pro-
genitors, presence of in embryo is a universal law
of nature, 349-50 n.4; regrowth of limbs, unsat-
sfied with earlier remarks, 431 & 432 n.6; single
variations of far less importance than individual
differences, 205 & n.4; struggle for existence, 161
scientific work: Abiotion, cross and self fertil-
sisation, 332 n.5; age of the earth, seeks opinion of J.
Croll, 51-2, 128 & 129 n.10; angles of leaves, 19 &
20 nn.4 & 5, 25 & 26 n.3, 36 & n.4; Astereinum,
self-fertility, 426 & n.5; Auricula japonica, fertilisa-
tion of, 30; beards differing in colour from hair
on the head, 214, 280, 286 & 287 n.12; bees, re-
to response of secretion of nectar, 50; bud-variation,
262 & 265 n.4; A. de Candolle, experiments with
seeds sent by, 426, 427; Cervidae, transmission
of variation, 7 & n.2; ciripecida, complemen-
tal males’, 41-2 n.9, 47, 544 n.9; ciripecida, dissec-
tion of larvae, 47 & 48 nn.5 & 6; cross and self
fertilisation, 322 & nn.5 & 6, 427 n.4; deer, de-
development of horns, 108 & n.111; Descent, com-
pletes chapters on sexual selection, xvii–xviii, 476
& n.6, 578; Descent, makes no progress with dur-
ing stay in Wales, 339; Descent, sexual selection
most laborious part of, 450; Descent, works on, 130
& 131 n.10, 205 & n.6, 206 & n.4, 321; Descent, ill
health delays work on, 520 & n.11; diorexia, 28
& n.6; Drosophila, seeks living specimen, 15 &
16 n.2, 22, 59 & 60 n.5; Drosophila, obtains and
cultivates and observes, xx, 15 & 16 n.3, 17, 29, 29,
59, 169 & 170 n.3, 173, 124-5, 321, 335, 372; Dro-
sophila, cf Drosophila, 127, 128, 135, 384, 372; earth-
worms, action in creation of mould, 217 & n.1,
222; Euphytis, fertilisation of E. palustris and E.
latifolia, xx, 287 & n.2; Euschizochilus, whether self-
sterile, 9 & 12 nn.1 & 2, 130, 131 & 132 n.18, 322
& n.6, 511-12 & 513 n.15; expression, baby’s cry-
ing, 434 n.1; expression, extent of blushing, 199
& n.3; expression, the insane and idiotic, xvii,
234, 263; expression, questionnaire, xvii, 142 &
n.4, 218-19 & 220 n.5 & 221 n.4.10, 243 &
n.9-11, 251 n.2, 285 n.3, 290, 291, 302 nn.2-3
& 7-9, 435 n.2, 483 n.4, 590-600; facial muscles,
observes action of when one of his sons plays the
flute, 264 & 265 n.6; fertilisation of flowers, 30 &
n.3 & 31 n.4, 366; flowers, plumage, 99-100, 180,
335, 337 & nn.5 & 8, 370; geographical distribu-
tion of flora and fauna, 280 & n.7; geological
time, seeks opinion of J. Croll on age of the earth,
51-2, 128 & 129 n.10; geology of South America,
xix, 231-2 & 232 nn.5.6; graft hybrids, har-
diness, 459 & 410 n.3; Habenaria, hybridisation,
457 & n.2; horns, development of, 6, 7 & n.1, 7
& nn.1-2, 15, 31-2 & 32 n.4, 42, 64, 68; hypoth-
etical number of red and brown animals, 513 &
515-14 n.2; insectorous plants, 127 & 129 nn.2 &
4. See also Drosophila; insectivorous plants, ex-
periments with nitrogenous matter and carbon-
ate of ammonium, 169 & 170 n.3; Lamium album,
fertilisation of, 471 & n.5, 477 & n.3; Lianaria sy-
baltanica, fertilisation of, 30 & n.3; Lychnis, rud-
mantial sexual organs, 458 & 459 n.4; mandrills,
bare areas in males and females, 200-1; move-
ment of plants, 466 n.1; orbicular muscles, action
in women in labour, 254-5; orchids, fertilisation by
insects, 578 & 579 n.3, 594; Origin, 5th edit-
tion, xx, 21, 37 & n.6, 47, 48 & 49 n.5, 64 & 65
n.5, 67 & n.4, 128, 130, 205, 206 & n.4, 578; Or-
to, experiments with seeds sent by F. Müller, 130
& 131 n.12; Paeon, development of spurs, 380-1 &
381 n.3; phylloxaya, 391 & 392 n.3; platysma my-
oides, action of, 424-3 & 423 nn.4 & 5, 264 & n.5;
polygamy in mammals, 347-8, 355 & 356 n.13;
Pousederia, heterotasty, 524 n.3; promotes explo-
ration of fauna and flora of Galápagos, Cocos Is-
land and Revillagigedo islands, 280 & nn.10 & 11;
proportion of sexes, as demonstrated in Indian
 census, 355, 362; proportion of sexes, domes-
tic animals, 98 n.1, 149-6, 180 n.2, 384 n.2;
proportion of sexes, Lepidoptera, 224 & n.1; re-
growth of bark, 391 & n.2; reindeer, age at which
antlers develop, 7 & n.1, 7 & n.1-2; Rutaceae,
locules of ovary, 16 & 17 n.12; secondary sexual
characteristics, animals of all kinds, 59 & 60 n.4;
sexual differences, Labioidea darsinii, 349 & n.2;
sexual differences, fowl, 99-100, 370; sexual dif-
fences, spiders, 358-9, 376-7; sexual selection,
xvii–xviii, 112, 206 & n.4, 476 & n.6, 578; sex-
ual selection, mandrills, 200-1; sexual selection,
 migratory birds, 241-2, 245-6, 247, 268-9, 296;
sexual selection, reptiles and amphibians, 394–
5; sheep, colour of, 239; sheep, development of
horns, 6, 15, 361 & n.5; studding insects, 421 &
n.1; variation under domestication, has resolved
not to pursue beyond correcting any errors he
may have published, 255; Vizia sativa (vetch), fer-
tilisation of, 30 & 31 n.4; Weald, denudation of,
58 & 59 n.1, 61 & n.4; weeping, physiology of,
373 & n.3, 373–4; whether dark hair is becoming increasingly prevalent in England, 366 n.1, 367 n.2

Support for theories: C.F. Claus, 40–1, 67–8, 543–4, 547–8; D.C. Danielsson, 414 & 415 n.14, 565 & 566 n.14; C. Daresto, 405–575; F. Delpiano, 388 & n.2, 562 & n.2; A. Dohrn, 355–6; E.C. Donders, 387; C.J. Duh, popular lectures on Darwinism, 273 & 274 n.4, 281, 356 & n.4; German zoologists, 41, 543; in Germany, 87, 161; E. Haechel delighted at growing influence of Origin, 297, 561; Hamburg, where CD’s portrait hangs in aquarium, 414 & 415 n.15, 565 & 566 n.15; F.A. Hartsen, 65–6, 545–6; J.D. Hooker encounters on travels, 285 & 286 n.2; T.H. Huxley demolishes J. McCaun’s criticisms, xxii, 375 & 376 n.4; G. Jager, Darwinian theory, 380 & 381 n.11; J.T. Moggridge, 66, 543; F. Müller, Facts and arguments for Darwin, 166; H. Müller, application of Darwinian theory to flower-visiting insects, 397 n.3; J. Oorton dedicates account of travels to, 379 n.3; A. de Quatrefages, 162–3; G.M. Ransey, author of Camouflage, 168; F. Rolle, popular exposition of Darwinism, 140 & 141 n.4; R. Spruce, 165; J.J. Sylvestor, 479 & 480 n.16; T.R.R. Stebbing, 108 & n.1, 10; US, all rising naturalists, 533; US, high reputation in, 332–3; C. Vogt, popular lectures on Darwinism, 65–6 & 66 n.4, 546 & 547 n.4

Trips and visits: Caerleon, Barmouth (June–July), xxiii, 253 & n.6, 262 & 263 n.7, 264, 277 & n.4, 279, 281 n.3, 290–1, 294, 295, 296, 297, 299, 303, 305 & 306 n.4, 307 & n.8, 308, 309, 310, 314 & 315 n.3, 320, 321, 338, 342, 351 & 352 n.10, 369 & n.3, 412, 447 & 448 n.6, 578 & n.4; Freshwater, Isle of Wight (1868), 3 & 4 n.1, 6 & n.2; London (February 1868), 265 n.8; London (February 1869), 77 & 78 n.10, 97, 101 n.1; London (November 1889), 293 & n.5, 448 & 449 n.10, 452–2 & 452 n.2, 454 & n.6, 459 n.1, 473, 476; Welsh holiday a failure for CD, though stronger on return, 338, 349 & n.1, 448

Darwin, Edward: alleged marriage, 338 & n.1

Darwin, Elizabeth: J.L. Gray sends regards to, 219 & 221 n.8; V.O. Kovalevsky sends regards to, 384; may have burnt cover of Quarterly Review, 196 n.2; photographed at Caerleon, 265; visits Germany, 112 & n.4; visits Leith Hill Place, 433 & 434 n.5; E. Wilson sends regards to, 75

Darwin, Emma, 18 & 19 n.3, 490 n.2, 597; CD dictates letters to, 374 n.4; CD passes her regards to F.C. Donders, 428; CD’s letters in hand of, 454 n.2; copies documents for CD, 513 n.14; G. Cupples thanks for hospitality to Mrs Cupples, 276; diary, 52 n.3, 112 n.4, 176 n.12, 190 n.2, 225 n.3, 254 n.12 & 13, 265 n.8, 281 n.3, 315 n.3, 376 n.10, 393 n.5, 418 n.2, 434 n.5, 445 n.2, 447 n.3, 453 n.8, 571 n.8, 579 n.6, 68–12 & 13; F.C. Donders sends regards to, 474, 573; A. Gray hopes to see before leaving England, 445; J.L. Gray sends regards to, 219; health, ailing during Welsh holiday, 338; health improves on return from Wales, 355; J.D. Hooker accepts invitation to Down House, 157 & 160 n.11; J.D. Hooker inquires after, 352; T.H. Huxley sends regards to, 317; reads aloud to CD, xxiv; insists on taking CD to Wales to recuperate from his fall, 253; L.F. Kempson sends love to, 433; V.O. Kovalevsky sends regards to, 384; J.J. Moulinié recalls hospitality, 79 & 84 n.3; J.J. Moulinié sends regards to, 446, 456; Quarterly Review, may have burnt cover of, 198 n.2; M.A. Rackl invites to visit Wales, 207; sends regards to J.T. Moggridge, 262 & 263 n.5; sends regards to J.J. Moulinié, 93; translates Italian for CD, 369; R. Trimen sends regards to, 417; A.R. Wallace sends regards to, 28, 447; A.R. Wallace wishes to inform of birth of his daughter, 50 & n.2; E. Wilson sends regards to, 75

Darwin, Erasmus: F. Galton points to CD’s descent from as example of hereditary genius, xxix; ‘well-educated’ people in Suffolk mistake CD for, 16; Zoonomia, as antecedent of Origin, 54 & 55 n.2

Darwin, Erasmus Alvey, 47 n.1, 71 & n.7, 143; CD arranges plates for ‘Descent’ to be delivered to, 293 & 294 n.7; CD stays with in London, 73 n.6, 97 & 98 n.1, 452 & n.3, 473 n.4, 474; CD will require treatment by H.B. Jones to ride again, 190 & n.2; forwards engravings to CD, 474; forwards letter from E. Holland to CD, 516; interested by article on geological time in North British Review, 354; reports L. Darwin’s success at RMA Woolwich, 514; comments on J.H. Stirling’s article, 473 & n.4, 476 n.7; visits Down House, 579

Darwin, Francis, 71 & 72 n.8, 77 & n.4, 96 & n.5, 111, 596; fails to win Trinity scholarship, 170; Geotheliaster serratorius, observes stridulation in, 421 n.5; Macacus nematus, tears of, 187 n.4; photographed at Caerleon, 296; M.A. Rackl writes to on development of horns of sheep, 199–200

Darwin, George Howard, 17 n.6, 51–2 n.2, 70 n.4, 176 n.12; assists CD in computing data, 367 n.7; calculates hypothetical number of red and brown animals, 533 & 533–14 n.2; calculates number of elephants, 307, 390 & n.1; considers being article as solicitor, 71, 76; considers teaching post at Eton, 70 & n.3, 71; CD asks to explain
Darwin, George Howard, cont.

letter from J. Croll, 70; CD will pay for legal studi-
es with C. M. Tatham, 436 & n.11; H. E. Darwin describes CD's fall to, xxiv; J. D. Hooker inquires after, 352; F. Galtoun cites in Hobbies, genus, xxiv; identifies P. G. Tait as author of North British Review, article, 354 & n.6; interested by article on geological time in North British Review, 354; lends Le Maout and Decaisne to T. H. Farrer, 18 & 19 n.3; calls on A. de Quatrefages in Paris, 162 & 163 n.11; Trinity College, Cambridge, fellow's dividend, 71 & 72 n.14; unwell on holiday in Wales, 338, 355; visits Paris, 76 & 77 n.2, 77, 96 & n.7, 162 & 163 n.11, 170; A.R. Wallace meets in Wales, 447 & 448 n.6; A. R. Wallace seeks information from, 447 & n.1, 448

Darwin, Henrietta Emma, 18 & 19 n.3; describes CD's fall from his horse, xxiv; J. L. Gray sends regards to, 219 & 221 n.8; J. D. Hooker inquires after health of, 158; hopes not to miss J. D. Hooker's visit, 381; J. B. Imes enlists help of in acquisition of Trotmer lodge, 446 & n.6; V. O. Ko-vailevsky sends regards to, 384; photographed at Caerdoen, 296; may have burnt cover of Quarterly Review, 198 n.2; reports CD's fall from his horse to G. H. Darwin, 176 n.12; sends photograph to L. F. Kempson, 433; serious illness, 112 & n.4, 123 & 124 n.2, 135, 164; visits Leith Hill Place, 433 & 434 n.5; M. S. Williams sends observations and sketch of baby crying, 433; E. Wilson sends regards to, 75

Darwin, Horace, 195 n.1, 200 & n.6; photographed at Caerdoen, 296

Darwin, Leonard, 193 n.1; F. Galtoun cites in Hobbies, genus, xxiv; photographed at Caerdoen, 296; student at Royal Military Academy, Woolwich, 96 & n.9; success at RMA Woolwich, 504 & 505 n.2 & 5.

Darwin, Robert Waring, 143; share of Castle Morton tithes bequeathed to CD, 2 n.7

Darwin, William Erasmus, 244 n.6; observes Epipactis palustris in Colwell Bay, xx, 304-5 & 305 n.2, 308 & nn.2 & 3, 314-15; joins family at Caerdoen, 305 & 306 n.4, 308, 315 & n.3; manages CD's investments, 1; photography, interest in, 186 & n.3

Dendra obscura (Graphos obscura, Scootch annuel), 265 & 267 n.27

Dawkins, William Boyd, 19; books for CD wrongly dispatched to by rail, 328; cited in farrington, 4th ed., 441 n.10; changes his view of descent of British cattle, 440; CD sends report on Ruttun finds to M.C. Lloyd, 350 & nn.2 & 3; G. H. Darwin to meet, 77 & n.5; offers to identify prehis- toric bones found in Ruthin, Wales, 318; reports to CD on Denbighshire fossils, 439-40

Decaisne, Joseph, 19 n.3; flora of Timor, 150 & 151 n.6; paradise apple, letter to Gardeners' Chronicle, 201 & n.2

deer: age at which horns develop, 7 & n.1, 7 & n.1, 7, 31-2 & 32 n.4, 42, 45, 102, 108; branched antlers, utility of, 207-8 & 209 n.7; fallow deer, mating rituals, 84-5; red deer, mating rituals, 84-5; 90; secondary hoofs, 245. See also reindeer
deer-hounds: proportion of sexes, 9 n.3, 122, 276 & 277 n.8; relative size of dogs and bitches, 7, 17 & 18 n.5, 116-22, 463-4 & 464 n.1-3

Delipheila elpenor. See Characampae elpenor

Delamere, Eugene Sebastian. See under Dixon, Edward Saul

De la Rue, Warren: support for E. Meteyard, 87

Delunay, Charles Eugène, 71 & n.1, 66 & 43

Delphio, Federico: ‘assails CD as a fatalist’, 424 & 425 n.5; CD has papers translated for his reading, 370 & n.2, 433; CD lends papers to T. H. Farrer, 421 & 422 n.4; CD responds to in letter to Scientific Opinion, xxii, 421-2 & 422-3 n.2 & 434 n.3; CD's response, arranges publication in Revista Europea, 459 & 460 n.12 & 13, 572 & 573 nn.12 & 13; CD sends H. Cruger's paper on Corvanches, 458 & 459 n.2, 572 & 573 n.2; CD thanks for papers and encourages to study Graminacea, 431-2; dichogamy in cereals, 459 & 460 n.11; T. H. Farrer considers publishing article on, 424 & n.4, 425 & 426 n.2, 428 & 429 n.5, 431 & 432 n.4; T. H. Farrer criticises teleological approach, 585-6; T. H. Farrer satirises as ‘the biological theologian’, xxii-xxiii, 428-9; Graminacea, CD encourages to study, 431-2; Graminacea, pursues study of fertilisation of, 439 & n.6, 477 & n.6, 572 & 373 n.6; insects, and fertilisation, 904; Ophrys anomala, fertilis, J. T. Moggridge differs from, 520 & 521 n.2; pangeneis, articles on, xxii-xxiii, 422 & 423 n.8 & 9, 459 & 460 n.12, 586 & 586 n.8 & 9; Passiflora, fertilised by insects and humming-birds, 439 & 439 n.11, 505 & n.2, 506, 585 & 505 n.10, 588-9; sends CD further publications, 506 & n.2, 369, 422 & 423 n.10, 562 & n.2, 568 & 569 n.10; thanks CD for papers, 422 & 423 n.2, 567 & 568 n.2; translates CD's letter on pangenesis for Revista Europea, 459 & 260 n.13

Demus cardui (Coloasia cardui): ratio of sexes, 265 & 267 n.20

Demosthenes, 339 & 339 n.16

Demarest, Axelro-Gaarten, 103 & n.10

Diachrysis chrysitis. See Phala chrysitis

Diaphora mendica. See Actia mendica

Diast. B. brunnnea. See Nocta brunnnea; D. dubia. See
Duh, Christoph Julius: CD advises that quotes from Origin must not interfere with rights of existing translations, 140; CD pleased E. Koch will publish, 281; popular exposition of Darwinism, 140–1 & 141 n.1, 273 & 274 n.4, 350 & n.4; popular exposition of Darwinism, E. Koch sends to CD, 455 & 456 n.2, 464 & 465 n.1, 571 & n.2
Dubery, Amy: Sunday-school teacher, Down, 437 & n.3
Duchenne, Guillaume Benjamin Amand: Atlas of expression, 242 & 243 n.4 & 5, 243, 244 nn.9 & 14, 251 & 252 n.7; cited in Expression, 243 nn.4 & 5; CD lends Atlas to J. Crichton-Browne, xviii, 264 & 265 n.9; CD thinks highly of, 264 & 265 n.9; T.H. Huxley has used work of, 264 & 265 n.10
Duncan, J. W.: 159 & 160 n.15
Duncan, James: catalogue of plants of Mauritius, 159 & 160 n.18
Duncker, Alexander: offers to publish German translation of Descent, 455 & n.3
Duvaucel, Sophie: C. Lyell’s meetings with, 213 n.2
earthworms: action in creation of mould, 217 & n.1, 222
Eastlake, Elizabeth, 44 & n.5
Edinburgh Review: J. Herschel, review of Quetelet on probability, 97 & 98 n.2
Edwards, Ernest: photographs CD (1868), 514 & 514–15 n.3, 515 & 516 n.11
Edwards & Bult: can supply photographs of CD, 506
Egerton, Philip de Malpas Grey-: cited in Descent, 85 n.1 & 2; red and fallow deer, behaviour during mating season, 84–5
Ehrenberg, Christian Gottfried: CD thanks for paper on Barcellaria of Mexico, 486
Elaphomyia alcicornis (Ptychobius alcicornis, horned fly, deerfly), 150 & 151 n.13
Elaphus primigenius (Mammuthus primigenius, woolly mammoth), 260 & 261 n.5
elephants: calculation of number of, 259 & n.2, 274–5, 277 & n.4, 291–2, 307–8, 339, 356 n.13; CD knew twins were unknown, 355 & 356 n.13; polygamous, 356 n.13; 374, 383 & n.4, 385 & n.4; elk: American (Cervus canadensis), 140, 150 & 151 n.12, 154 & 155 n.3; J. D. Caton’s observations regarding colour and role of horns in fighting, 206–9; whether distinct from moose, 150 & 151 n.12, 154 & 155 n.3; Ellice, Russell, 76 & n.5; cited in Descent, 289 n.2; lambs, early mortality of males, 278; sheep, ratio of sexes, 288–9, 294 & n.2
Elliot, Robert, 273 n.1, 288 n.2; cited in Descent, 258 n.2; proportion of sexes in sheep and cattle, xvii, 257–8, 258, 275
Elliot, Walter: CD seeks information about polygamy in mammals, 347–8, 355; cited in Descent, 348 n.3, 354 n.1; cited in Variation, 348 n.2; elephants, polygamy, 374; Indian wild boar, polygamy, 373; Variation, presentation copy, 333 & 354 n.3
Elliot, William: cited in Descent, 385 n.4
Elliot & Fry: can supply photographs of CD, 506 & n.6, 515 & 516 n.11
Ellman, John (1753–1832): development of Southdown sheep, 202 & n.3
Ellman, John (1787–1867): 202 & n.3
Ellman, Robert Harvey, 202 & n.3
elm beetle. See Coleus
E. N.G. E. Wolversche Verslagsbundelhond, 138 & 139 n.3; 553 & n.3
Emerson, Ralph Waldo, 533
Endlicher, Stephan Ladislaus: describes Stephe-ntoma, 11 & 12 n.4
Engelheart, Stephen Paul: CD asks to observe orbicular muscles in women in labour, 254–5; CD asks whether Pulvermacher’s electric bands might relieve dyspepsia, 255 & n.3; examines CD after horse-riding accident, 199 & n.2; leaves practice, 437
Enoplognathus acuta. See Thridion lineatum
Entomologist’s Monthly Magazine: T.A. Chapman, stidulation in elm beetle, 457 & n.1
Entomological Society: members have no information about sexes of insects, 269 & n.1; J. J. Weir’s paper on larvae eaten or rejected by infective- rous birds read 10, 115–16 & 116 n.2
Entomoscelus: sexual differences, 359 & n.6, 352 & n.5
Enzenberg, Franz von, 500 & 501 n.4
Enzenberg, Othilia von, 500 & 501 n.4
Epina diadema (Araneus diadematus): sexual differ- ences, 376–7 & 377 n.2
Eupandra nigra (Apomorphia nigra, black rustic), 266 & 268 n.59
Erannis hyalina (Christmas rose): as cross-fertilised, 203 & 204 n.6
Eratoma: underside of wings brighter than surface, 438 & 438 n.6
Eriaceae: fertilisation, 584 & n.8
Eryngaster lanestris [small egggar], 265 & 267 n.21; proportion of sexes, 484 & n.2
Eichscholzia: E. californica, CD and F. Muller experiment to discover whether self-sterile, 9–11 & 12
mm.1 & 2, 112 n.2, 131 & 132 n.16, 271 & 272 n.5, 322 & n.6; E. californica, CD successfully germinates, 271 & 272 n.5, 322, 378 & 379 n.4, 512 &
513 n.15; E. californica, CD sends F. Muller rough notes on, 510, 511 12 & 513 n.16; E. californica, F.
Muller sows seeds sent by CD, 9–10 & 12 mm.2 &
11, 112 n.2, 378 & 379 n.4, 438 & 439 n.6, 512 &
513 n.15 & 16, 523
Ethnological Society: W.B. Dawkins intends to de-
scribe British finds to, 430 & 440 n.4; T.H. Hux-
ley, president, 125 & n.2
Eton College: G.H. Darwin rejects teaching post at, 70 & n.2, 71
Etrick shepherd [James Hogg], 500 & 501 n.7
Eucalyptus: E. globulus (burnet companion), 266 & 268
n.65
Euglena: fertilisation of Carpophyes by, 422 & 423 n.5,
438 & 459 n.2, 567–8 & 569 n.5
Eugenie, empress of the French: meets Ottoman
Sultan, 445 & 446 n.3
Euphorbia: E. myrsinoides, heliosis and petas; as self-fertilising, 203 & 204 n.3 & 7
Euphromia: E. castigata (E. subfusca, gray pupil), 266
& 267 n.32; E. consignata (E. insignata, pinion-
spotted pupil), 266 & 267 n.31
Evans, Margaret (CD’s cook), 100 & n.2
Ewbank, Lucas, 171 & 172 n.14
Ewing, James L., 333 & 336 n.10
expression: babies’ crying, 433 & 434 n.1; blushing,
199 & n.3; blushing, J.L. Gray’s observations of
Arabs in Egypt, 219; blushing, whether ever lower than the clavicule, 243; CD’s questionnaire, 124 & n.2, 218–19 & 220 n.5 & 221 n.n.10 & 10, 243
& n.9–11, 251 n.2, 284 n.3, 290, 302 n.2–3 & 7–
9, 435 n.2, 483 n.4, 599–600; CD’s questionnaire,
S.O. Glenic responds to, 142 & n.4; CD’s ques-
tionnaire, WW. Reade unable to answer, 291;
J.L. Gray’s observations in Egypt, xviii, 218–19,
219–20 & 220 n.5, 221 n.7 & 9, 252; grief, 219 &
221 n.2, 243 n.9, 300–1; grief muscles, 244 n.6 &
9, 250–1, 252, 264; hair standing on end, 234–
5, 244, 249–50 & 251 n.3; indignation, 299–300 &
301 n.3; of the insane, 234, 235–6, 243–4, 249–
51 & 251 n.5; Japanese, photographs illustrating,
435; negro; 300; orbicular muscles, action in
women in labour, 243–5; platysma muscle, action
of in screaming, 199 & n.3, 250; rage, 236–8,
243; J. Scott’s observations in India, 299–301; ter-
tor, 233–6 & 240 n.4–7, 242; West Africans, 533
& 534 n.4 & 6
Eyeton, Thomas Campbell: asks CD why salmon
rise for letter to Land and Water, 37–8; CD has no
information, 42; cited in Descent, 45 n.2; fawns,
development of horns, 43; sends CD the head of a
fawn, 108 & n.1; 111; Odontoloma ichneum, supple-
ment, 38 & n.4, 40
Eyeton, William Campbell, 111 & 112 n.3
Faba: stamens, 356
Fabaceae. See Papilionaceae
Fagus sylvatica: variation in colour, 326 & 328 n.10
Faire, Ernest: Orchids, seeks CD’s permission to
publish L. Réröle’s translation, 85–6, 91 n.2, 134,
137, 550, 552; Orchids, will supervise L. Réröle’s
revision of certain species, 226
Falconer, Hugh: CD applied to in calculating ele-
phant population, 275–6
Faramea: CD sceptical of F. Müller’s findings, 130 &
131 n.9; dimorphism, 371, 378
Faraday, Michael: measurements of electricity, 63
& 64 n.9; Memorial Fund, 355 & 356 n.17, 372 &
373 n.15, 384
Farrer, Frances, 361 & n.4
Farrer, Thomas Henry: admires F. Delphinio’s books,
with reservations, 423–4 & 424 n.4; bees, role in
pollination, 423–4; botany; seeks time for amidst
official duties, 18; CD agrees with J.D. Hooker
that notes on Passiflora should be published, 444
& n.2; CD encourages to carry out experiments on
Anthericum, 426 & n.5; CD encourages to publish views of F. Delphino, 425 & 426 n.2; CD
sends F. Müller’s account of fertilisation of Pas-
stillina, 439 n.10, 505 & n.2, 506, 510; CD sends
note on Passiflora to F. Muller, 511; CD suggests
he compare Passiflora carruata with Tasmia, 586
& 599 n.6; cited in ‘Fertilization of orchids’, 361
n.9; F. Delphinio, considers publishing article on,
423–4 & 424 n.4, 425 & 426 n.2, 428 & 429 n.5; F.
Delphino, criticises teleological approach, 585–6;
F. Delphino, satirises as ‘the biological teleologist’,
xxi–xxii, 426–9, 431 & 432 n.4; invites guests to
his new house in Dorking, 357 & n.4; Monn, fertilisation of, 465; orchids, functions affected
by weather, 385; papilionaceous flowers, fertilis-
sation of, 356–7, 360, 389–90 & 390 n.3; Passiflora
and Tasmia, notes on, 435–6 & 436 n.1 & 3,
506 & 507 n.2, 582–4; Passiflora princeps, seeks
specimens of, 433, 582; permanent secretary,
Board of Trade, 19 n.2, 357 n.4, 390 & n.5, 429;
proposes visit to Down, 390 & n.7; C.K. Sprengel,
joins reading, 428 & 429 n.4, 435 & 436 n.1,
507 & n.8; C.K. Sprengel, quotes description of
Passiflora carruata, 582–4 & 594 n.1, 585; Tasmia,
fertilisation of, 428 & 429 nn.1 & 2, 592–4; Viola
Index

Farrer, Thomas Henry, cont.
odorata, "degraded" structure, 210 & 211 n.1; Viola odorata, thanks CD for explaining views on 'degradation', 221-2; visits Down House, 579, 595 n.9

Fechner, Gustav Theodor, 66 & n.6, 545 & 547 n.6

Fenn, Robert: experiments with graft potatoes, 395-6 & 396 n.2

Ferguson, William: testimonial for Palaevmacher's electric bands, 255 & n.3

ferns: of Mauritius, 158 & 160 n.n.g, 10 & 12

Ficus stipulata (F. pandina): leaves change after fruiting, 328 & 329 n.27

Field: E. Blyth writes for, to his pecuniary advantage, 383; crested turkey, engraving of, 334 & 335 n.1, 333; CD will think of subscribing to for E. Blyth's articles, 385; CD inserts notice requesting information on proportion of sexes in domestic animals, 122 & 123 n.11

Filariis harvii: collected by CD in South America, 338 n.2

Fish: David Taylor, 32 & n.2; cited in Earthworms, 217 n.1; worms, questions CD's account of role in creation of mould, 217 n.1; CD responds to, 222

Fitzmaurice, Edmond George Petly, 77 & n.7

FitzRoy, Robert: captain, HMS Beagle, 144

Fitzwilliam, William Wentworth, 1

Fleury, Jules Joseph: inquires whether CD knows date of marriage of Edward Darwin, 338

Flower, William Henry, 215 n.2, 216 n.3

Forbes, David: Aymara Indians, study of, 49 & 50 n.7; cited in Descent, 73 n.3; CD requests permission to quote, 72; geology of southern Peru, 251 & 232 n.1; G. Jenisch's book 'On truly rubbish', 49; F. Zirkel supports this view, 49, 545

Forbes, Edward, 280 n.10 & 11; CD's note on geographical distribution preceded work of, 448 & 449 n.8

Ford, George Henry: drawings for Descent, 395, 397 & 398 n.2, 409

Forthnightly Review: T.H. Huxley, 'Scientific aspects of positivism', 125 n.3, 312 & n.4; G. H. Lewes, articles supporting pangensism theory, 444 & 443 n.7

Fortune, Robert, 30 n.3

fossil: CD advises A.B. Meyer to look for in Belgian caves and in south-east Asia, 497 & 496 n.6; CD's continuing interest in, xix; Denbighshire skulls, W.B. Dawkins describes to CD, 439-40; discoveries in Magellan Straits, 215 & n.1, 221, 235; J.D. Hooker admires St Petersburg collection, 260 & 261 n.n.3-6; medusa, E. Haeckel's finds, 414 & 415 n.8, 565 & 566 n.8; J. Orton finds mammalian bones near Quito and marine shells in Amazon valley, 4 & 5 n.4, 39; J. Orton sends CD fossilised horse's tooth from Andes, 379 & n.1, 412, 420, 432; Ruthin, Wales, prehistoric bones found in, 318 & n.2, 329 & n.2, 340 & n.n.3, 350 & nn.2 & 3; Saurian bones discovered in New Zealand, 350 & n.7

Fotheringham, Professor, 528 & 530 n.4, 530 fowls, plumage, 99-100; black-boned fowl, 141-2 & 142 nn.1-2; cochin, 100; crested turkey, 303 & n.3; cuckoo sub-breeds, 96, 180, 336 & 337 n.5, 370; Sebastopole geese, 180 & n.4; Sebright bantams, 99, 180, 332 & 335-6 n.3, 336, 337 & n.8, 370; silver-laced Polish, 99; sooty fowl, 301 & 303 n.14

John Fox & Sons: receipt for payment received from CD, 427

Fox, William Darwin, xv foxes: whether hybridising with dogs, 101 & n.1

frogklo: fertilisation of, 350, 361

Fraley, Frederick, 580 & 581 n.6

Francis, William: editor, Philosophical Magazine, 78 & n.3

Frankfurt am Main Zoological Garden: M. Schmidt, director, 200 & 201 n.3

Fraser's Magazine: anon. [W. R. Greg], 'Failure of natural selection in the case of man', 27 & 28 n.2, 37 & n.5

Fraxinus excelsior: A. Reuter grafts with F. rubescens (F. pensylvanica), 403 & 405 n.14; reversion to type, 326

Frederick, prince of the Netherlands, 327 & 329 n.22

Freeman, Philip, 413 n.3

Froude, James Anthony, 596

Funaria officinalis: cross-fertilised, 203 & 204 n.4

Fusisir rhodophila. See Camellia rhodophila

Fusisira rhodofila. See Dianthus rhodofila

Galadus: parasitic worms collected by CD, 358 n.6

Galanthus nivalis: cross-fertilised, 203 & 204 n.5

Galahapagos: CD would gladly subscribe £50 to N.J. Anderson's expedition to, 280 & n.10
gall wasp. See Cynips querus acisulata

Gall, Franz Joseph, 282 n.2

Galton, Douglas Strutt, 375 & 376 n.1

Galton, Francis: Hereditary genius, G. Bentham asks CD's opinion of, 495 & n.2; Hereditary genius, CD has never read anything more interesting and original, xxvi-xxvii, 530-1; Hereditary genius, L. Darwin's success at Woolwich proof of, 504 & 505 n.5; regards CD as mentor, xxv, 532; seeks source of pure-bred rabbits, 518-19
Gallon, Isabella, 375 & 376 n.1
Garbett, Edward Lacy: number of elephants, 291–2, 307, 339
Gardener's Chronicle & Agricultural Gazette: G. Ben-
ham, revision of the genus Costia, 163 & n.8;
GD, earthworms and creation of mould, xix–xx, 217 & n.1; J. Decaisne, letter on paradise apple, 201 & n.2; reports that English delegation to St Petersburg declined decorations, 262 n.11;
D.T. Fish, letter on earthworms and creation of mould, 217 & n.1; J.D. Hooker, monstrous form of Begonia frigida and natural selection, 355 & 355-6 n.12; reports J.D. Hooker's election as a president second congress of Russian International Horticultural Exhibition, 253 & 254 n.11, 279 & n.3; M.T. Masters, editor, 32, 201, 395;
M.T. Masters's observations on Saponaria, ab-
stract, 14 & 15 n.3; F. Müller, note on graffed orange tree, 322 & 323 n.8
Gardenia (Sapori): accurate flowers, 177 & 178 n.8
Gartner, Karl Friedrich von: differences in early flowers, 525 & 525 n.9; experiments on hybrid-
ity, 528 & 529 n.10; Lycoris, crossing of, 438 & 459 n.3; Tchaiki, hybridisation, 11–19 & 12 n.9
Gaudry, Albert: genealogy of the horse, 318 & n.4
Gazella gazella ssp. gazella (Palestinian mountain gazelle): hooves, 208 & 210 n.11
Geach, Frederick E.: back in England, would be
glad to meet CD, 284 & n.3; cited in Expression, 244 n.13; CD grateful to but unable to see, 250
Geach, Robert Edgar, 381 & n.3
geese: Scatostopel, plumage, 180 & n.4
Gegenbaur, Carl, 537 & 539 n.13
Geikie, Archibald: J.P. Lesley may have anticipated, 212 & 213 n.8; subaerial denudation, 401 & 402 n.7
Genista: stamens, 376
Geoffroy-Saint-Hilaire, Isidore: no distinct line be-
tween monstrousities and slighter variations, 491 & n.3
Geological Magazine: F. Müller, Facts and arguments for Darwin, review copy, 95
Geological Society of London: T.H. Huxley, presi-
dent, 123 & 124 n.8, 125 & n.2, 139 & n.2; T.H. Huxley; presidential address (1868), 355 n.5; T.H. Huxley, presidential address (1870), 216 n.3; in-
dex to publications, by G.W. Ormerod, 231 & 232 n.3
Genus: dioecium, 28 & n.6
Geotropes stenomorpha: stridulation, 421 n.5
Gynura: F. Hildebrand's observations on fertilisa-
tion of, 444 & n.5, 454 & n.3
Gerse goat, 110 & 111 n.7
Geyron tridentis (G. trispinosus): A.M. Norman offers specimen of, 345 & 347 n.6
Gibb, David: proportion of sexes of cattle, 331–2
Gilbert, Joseph Henry: CD unable to visit Rotham-
sted Experimental Station, 257 & nn.1 & 2
Gladstone, William Ewart, 87 & n.3; offers J.D. Hooker a knighthood, 482 n.2
Glazunov, A.I.: publishers of Russian editions of Origin, 3 n.3
Glenie, Samuel Owen: black-boned fowl, plumage, 141–2 & 142 nn.1–2
Gonophyes obscurata. See Dasyidia obscurata
Goethe, Johann Wolfgang von: article mistakenly
attributed to published in first edition of Nature, 479 & 480 n.15, 488
Gocce, Edmund: sent Drosophyllum lusitanicum to J.D. Hooker, 312 & 314 n.1; studies Drosa
at Coimbra, 369 & n.2; studies parasitical fungus attached to cistus, 416
goldfinch: hybrids with canary, 246 & 247 n.6
Gongora: fertilisation by bees, 458 & 459 n.3, 517 & 573 n.3
Genypterus pentaxis, 170 & 176 n.12
gorilla: chimpanzee described as young gorilla, 261; new species from East Africa displayed in St Petersburg, 260; in West Africa, 24
Gosse, Philip Henry, 142 & n.3, 154 & 155 n.7
Gould, John, 315 n.1; CD will consult to identify parrot described by P.G. King, 192 & n.3; mig-
atory birds, believes male nightingales migrate before females, 241 & 242 n.2; Trochilidae, 422 & 423 n.4, 568 & n.4
Graham, George Augustus: friend of G. Cupples in Gloucestershire, 118 & 123 n.4; sex ratios in dogs, 270 & 277 n.5
Graham, John: G. Cupples will consult, 238 & n.5; mortality of male lambs, 306–7
Gramineae: CD commends study of to F. Delpino, 431 & 432 n.7; F. Delpino studies of fertilisation of, 459 & n.6, 477 & n.6
Grania: E. Haecel's study of, 298 & n.9, 561 & 562 n.9; G. ciliata (Sym ciliata), 268 & n.9, 346 & 347 n.15, 561 & 562 n.9; G. compressa, 346 & 347 n.15
Grant, Alexander: helps W.C. Tate locate Drosophy-
llum, 88 & 89 n.1, 105 & 107 n.3
Grant, Robert Edward: led CD to collect marine animals, 115 & n.10
Gratiolet, Louis Pierre: platysma myoides contracts under extreme fear, 232–3 & 244 n.6
Gray, Asa, 166 n.2, 188 n.4, 214 n.3, 306 n.3; cited in Origin, 5th edition, 14 & 15 n.3; CD asks to observe whether beards of Germans are redder than their hair, 253 & 254 n.14; CD reports he is
Index

Gray, Asa, cont.
recovering from accident, 252–3; CD reports to
on US editions of his books, 253; CD seeks new
publisher if D. Appleton will not publish revised
edition of Origin, 496; CD’s only personal
acquaintance in America, 336; commiserates with
CD over fall from horse, 218; defence of Darwin-
ism on religious grounds, 533 & 534 n.12; Europe
and Egypt, travels in, 218 & 220 nn.3 & 4; hopes
to meet CD in London, 451–2; J.D. Hooker says
CD need not quote, 19; Mammals, observations on
cited in 5th edition of Origin, 14 & 15 n.3; Origin,
agreement with US publishers, 531 & 531–2 n.2;
Origin, US sales, 53 & 54 n.1; returns to England
from Egypt, 368–9 & 369 n.1; returns to the US,
452 n.2; sends CD bulbs of Dioscorea trifida, 444–
5; visits Down House 253 & 254 n.12, 378 & 379
n.1, 445 n.2, 579
Gray, George Robert: asks CD for testimonial, 311;
CD fears he is not best qualified as he is no or-
nthologist, 315
Gray, Jane Loring: cited in Expression, 221 nn.10 &
12; commiserates with CD over fall from horse,
218; CD regrets her health has not improved
during travels, 253; returns to England from
Egypt, 366 n.3, 368–9 & 369 n.1; returns to the
US, 452 n.2; sends CD observations of facial ex-
pressions in Egypt, xvi, 218–19, 219–20 & 220
n.5, 264 & n.4; visits Down House, 445 n.2, 579
Gray, John Edward: E. Blyth thinks his remarks
will amuse CD, 179 & n.3; classes natural selection
with spiritualism and phrenology, 179 n.3;
description of pronghorn, 245 & n.2
greenfuch: hybrids with canary, 246 & 247 n.6
Greg, William Rathbone, 28 n.2
Grey, George, 360 & n.5
Grimby, Mrs, 395 & n.2
Grisley, Gabriel: Friederich Luttmann, 228 & 229
n.10, 557 & 558 n.3
Grote, George: publication of Aristotle, 392 & n.4
Grove, John (inmate, West Riding asylum): expres-
sions, 242 & 241 n.10
Grove, William Robert: G.H. Darwin seeks advice
on articles, 71 & 72 n.12, 76 & 77 n.1; possible suc-
cessor to E. Sabine as president of Royal Society,
492
Guainaire: G. Buckle, review of Lyell’s Principles, 28
& n.8, 37
Guillaumin et cie: publishers, 1st and 2ed French
editions of Origin, 267 n.3
Günther, Albert, xvii; advised CD to choose British
salmon for illustrations in Descent, 397 & 398 n.4,
409; cited in Descent, 393 & 394 n.1; CD anxious
for news of his child, 409; CD asks questions
about reptiles and consults about woodcuts for
Descent, 393–4; CD deeply moved by tragic death
of his wife, 405; describes death of his wife, 397–8
& 398 n.7; responds to CD’s queries, 397, 457–8
Günther, Robert William Theodore: birth of, 398
& n.7, 409
Günther, Roberta: death of, 397–8 & 398 n.7, 405
Habel, Simon: sends plants from Galápagos to
Kew, 310 & 311 n.4
Hahmania: hybrids, 457 & n.2
Haeckel, Agnes, 420
Haeckel, Ernst, 356; calcareous sponges, seeks
specimens to complete his study, 298 n.8 & 561
& 562 n.8; calcareous sponges, A.M. Norman
sends samples, 345–7; calcareous sponges, results
of Norwegian expedition, 413–14, 565–6; C.F.
Claus regards as over-enthusiastic, 40 & 41 nn.3
& 5, 543 & 544 n.3 & 5; Gustavea, evolution of,
356; CD congratulates on successful exped-
tion, 419–20; CD seeks specimens of calcareous
sponges for, 312, 316, 319, 342, 348; CD thinks
highly of though he may be too bold in drawing
conclusions, 47; CD welcomes growing reputa-
tion, 348; echinoderms, descent, 414 & 415 n.12,
565 & 566 n.12; Natural history of creation, 2nd edi-
tion, 297 & 298 n.3, 561 & n.3; Natural history of
creation, T.H. Huxley’s review of, 432 & 433 nn.1
& 2; Origin, 5th edition, presentation copy, 297
& 298 n.2, 560 & 561 n.2; Siphonophorae, CD ad-
mires plates, 419 & 420 n.4; siphonophores, study
of development of, 297 & 298 n.5, 561 & n.5; tele-
ology, T.H. Huxley differs from views of, 433 n.2
Haeckel, Walter, 298 & n.10, 561 & 562 n.10
Haliburton, Robert Grant: sneezing and supersti-
tion, 380 & n.1
Hallett, Frederic Francis: development of cere-
als, 361–2 & 365 n.2; experiments with selecting
wheat, 350–1 & 351 nn.2 & 4
Hamadryas frenonia. See Papilio frenonia
Hamburg: CD’s portrait hangs in aquarium, 414 &
415 n.15, 565 & 566 n.15
Hamlet, Alfred Douglas, 76 & 77 n.2, 96 n.1
Hamond, Robert Nicholas: lieutenant on HMS
Beagle, 514 & 515 nn.3 & 4
Hamond, Thomas Asley Horace, 514 & 515 n.3
Hancock, Albion: CD asks if he can spare speci-
mens of calcareous sponges for E. Haeckel, 391;
happy to supply such specimens as he has, 340–1
Hanuman monkey (Saimirius entellus): swim-
ning style, 526 & 527 n.5
Hardy, Thomas Duffus, 87 & n.4
Harris, Thaddeus William: Entomological correspon-
dence, 387 & n.3
Hooker, Joseph Dalton, cont.
uniformity of an organ throughout a group implies functional inutility, 25-6; attacks natural theology, 362 & 363 n.4; Aegawa, experiments with fertilisation of, 123 & n.10; awarded CB but declines knighthood, 475-6, 478-9, 488, 498, 499 & n.11; Begonia frigida, monstrous form of and natural selection, 355 & 355-6 n.12; cultivates begonia sent by F. Muller, 378; British Association, presidential address (1868), espousal of Darwinism, 16 & 17 n.4, 26 & 27 n.6; British Association presidential address, incurred dislike of duke of Argyll, 478 & 480 n.8; British Association presidential address, still dreams of, 351 & 352 n.8; British Association, resignation speech, 381 & 382 n.6; A. de Candolle, CD sends letter and seeds from, 419 & n.2, 426, 427; A. de Candolle suggests he might sow seeds collected from different climates, 410 & 412 n.3, 563 & 564 n.3; CB, does not wish to be addressed as, 492, 498 & n.6; cereals, selection of, 361-2; cited in Descent, 287 n.12; classification, paradoxical relation to modification, 25-6; conscious he owes his position to his father, 493; Copenhagen Prehistoric Museum perfectly wonderful, 286; Copley Medal, would rather not have it than give after-dinner speech at Royal Society, 44 & n.6; Cucurbitaceae, describes for flora of West Africa, 319 & 320 n.1; CD asks about regrowth of bark, 391 & n.2; CD asks which Slavonian races have red beards, 214, 280; CD concurs with view of F. Muller, Facts and arguments for Darwin, 338 & 339 n.4; CD enjoys review of W.P. Schumper's book on vegetable palaeontology, 476 & 477 n.13; CD reports to on holiday in Wales and correspondence, 510-11; CD describes revenge on Mile Royer, 489 & n.8, 492; CD sends draft reply to Nägeli's criticisms, xxvii, 14-15, 19 & 20 n.1, 20-1, 25, 35, 157 & n.6; CD sends F. Müller's letters on heredity of Saaz maps to, 112 & n.2, 123, 130; CD sent copy of 1866 note on geographical distribution, 448 & 449 n.8; CD tells of French translation of Orchids, 112, 123; CD thanks for 'splendidly' letters, 35, 354; CD will be very glad to whenever he can come, 381; CD wishes his CB had been a knighthood, 475 & 476 nn.2 & 3, 476, 488; CD writes to G. Bentham in his absence, 223; CD's fall from horse, commemorates with, 286; Drosophila, unable to find living specimen, 16 n.3; 127 & 129 n.9; would be glad of Drosophila plants, 158 & 160 n.7; has failed to grow Drosophila at Kew, 183; Drosophyllum sent to from Portugal, 319; compares Drosophyllum and Drosera, 372; East India Company, frustration with, 479 & 480 n.7; approves T.H. Farrer's note on Passiflora carinata, 436; Flora of Australia, 449 & 449 n.3; 499 n.7; Flora of British India, 362 n.4; Flora of Tasmalia, 280 n.5; Genus plantarium (with G. Bentham), 320 n.1, 390 & n.3, 307 n.3; A. Gray hopes he may meet in Vienna on his way back from St Petersburg, 218 & 220 n.4; impressed by F.F. Hallett's experiments with selecting wheat, 350-1 & 351 n.2; hopes to visit Down after Exeter meeting, 362 & 363 n.11, 364; T.H. Huxley believes to be 'radiant' on return from Russia, 317 & n.5; T.H. Huxley a most wonderful man, 351; T.H. Huxley's Geological Society address, looks forward to CD's response, 158 & 160 n.6, 164; ice age, survival of temperate plants, 52 n.4; insular flowers, CD suggests he write another paper on, 280 & n.9, 286; insular flowers, riddle of Lord Howe Island, 362-3; International Horticultural Exhibition at St Peters burg, visit to, 123 & 124 n.4, 135, 158 & 160 n.4, 160 & 161 n.27, 259-61 & 262 n.11; knighthood, reluctance to accept, 478-9; Melastomaceae at Kew have never produced ant sacs, 225 & n.5; E.A.W. Miquel visits, hopes to bring to visit Down, 375; morphological character, accurate use of, 19 & 20 n.2, 20 & 21 n.3, 25; F. Muller, Facts and arguments for Darwin, comments on, 319; number of varieties present in large genera, may have changed his view on, 498 & 499 n.7; Origin, 5th edition, presentation copy, 339; overburdened by official requests, 362; Passiflora, sends seeds to T.H. Farrer, 444 n.2, 453; Passiflora pringlei, nearly hybridised out of cultivation, 588 & 595 n.14; Passiflora pringlei, unable to provide specimens for T.H. Farrer, 583; Passifloraceae, difficulty in identifying due to hybridisation, 506 & 507 n.3; passion for china, 275; plans to visit Down with E.A.W. Miquel, 389 & n.2; quinary arrangement of dicotyledons, 26, 35 & 36 n.2; role of genetic characters of no value, 43-4; Royal Botanic Gardens, Kew, director, 195 & n.4, 225; Royal Botanic Gardens, Kew, overwhelmed with official requests, 362; Russian International Horticultural Exhibition, elected a president of second congress of, 253 & 254 n.11, 279 & n.3; Russian International Horticultural Exhibition, declines decoration from Alexander II but accepts jasper vases, 260-1, 273; Russian journey, has been counting beards, 286 & 287 n.12; Russian journey, meets his Russian relatives, 260 & 261 n.4; Russian journey, St Petersburg, impressions of, 259-61; J. Scott sends paper on tree ferns, 526-7 & n.7; Russian journey, return from, 220 n.4, 285 & 286 n.1; Rutaceae,
seeks answers to CD’s queries, 16, sends CD letter from H. Barkly about Mauritian flora and geology, 157, 163; service, importance of concept to, 479, 493; signs petition to secure civil pension for E. Meehy, 75 & 76 n.2, 76, 398 & n.1; Student’s flora of the British Isles, 123 & 124 n.6, 486 & 487 n.19; Student’s flora of the British Islands; will add new material on orchids from CD; charmed by Miss Symonds, 44 & n.3, 123 & 124 n.5, 157 & 160 n.1; Symposia fiscarium, sends to A.M. Barkly, 160 & 161 n.27; Tacsonia vanivolomits, whether fertilised by humming-birds, 594; visits Down House, 157 & 160 n.1, 163 & 164 n.3, 223 n.3, 389 & n.2, 391, 405, 406 & n.2, 409, 579
Hooker, Maria: relatives married to Russians, 260 & 261 n.4
Hooker, William Henslow: seeks occupation in New Zealand, without success, 123 & 124 n.9, 285 & 286 n.5, 310 & 311 n.7, 320 & n.9, 339 & 310 n.14; to return from New Zealand, 362 & 363 n.7 & 8, 364, 480 & 481 n.15, 483, 492 & n.8
Hooker, William Jackson: rise wholly unaided but J.D. conscious he owes his position to, 493 & 494 n.12; Species fiscarium, 158 & 160 n.9, 161 n.27
Hoplodriva blanda. See Caradocia blanda
Hordeum spp.: F. Delpino studies fertilisation of, 459 & nn.6–8, 572 & 573 nn.6–8
Horne, John, 159 & 160 n.15
horned fly. See Elaphomia alexicornis
Horner, Joanna Baillie, 218 & 220 n.2
Horner, Susan, 218 & 220 n.2, 220 & 221 n.14
horses: genealogy, 318 & n.4; proportion of sexes, 278 & n.2; striped, 1, 414 & 415 n.3, 593 & 596 n.3
Humboldt, Alexander von: death of (1859), 74 & n.3; fewer plants social in tropical regions, 150 & 151 n.10
humming-birds: CD long interested in role in fertilisation of flowers, 43; Passiflora, whether fertilised by, 438–9 & 439 n.11, 505 & 507 n.2, 506, 510, 511 & 512 n.3, 585 & 585 n.10, 588–9; Tacsonia, whether fertilised by, 428 & 429 n.3, 505 & 506 n.2, 510, 511, 593–5
Hutton, Richard Holt: addresses Church Congress on Darwinism, 434 & 435 n.2, 437 & n.6
Huxley, Henrietta Anne, 44, 312; recovers from painful operation, 316; visits Down House, 579
Huxley, Marian: drawing of CD, 596
Huxley, Thomas Henry, 44, 142 & n.3, 424, 528, 533 & 534 n.12; British Association meeting, demolishes anti-Darwinian parsons at, 412 & 413 n.3; calcareous sponges, unable to supply information or specimens, 316, 319, 348; A. Comte, critique of, 338–9 & 339 n.6; attack on R. Con- greve admired by J.D. Hooker, 331 & n.6; CD asks for calcareous sponges for E. Haeckel, 298, 312; CD delighted by review of E. Haeckel’s Natural history of creation, 432 & 433 n.11; CD enjoys meeting in London, 479; CD hopes he can meet V.O. Kovalevsky, 418; CD hugely enjoys criticisms of W. Thomson, xviii, 139 & n.3; CD praises Geological Society address as ‘wonderfully brilliant’, 164; CD sends fossilised tooth received from J. Orton, xix, 412, 418, 420, 432; CD sends V. Lushington’s letter to, 114 & nn.1 & 2, 126; CD’s health, wonders if better for his holiday, 412; demolishes J. McCann’s criticisms, xxi, 375 & 376 n.4; Geological Society, presidential address, 123 & 124 n.8, 136 n.7, 139; Geological Society, presidential address, J.D. Hooker looks forward to CD’s response to, 158 & 160 n.6; Geological Society, presidential address, CD welcomes critique of W. Thomson, xviii, 139 & n.3; Geological Society, presidential address, North British Review attacks for ‘quibbling’, 354 & 355 n.3; J.W. von Goethe, translates article mistakenly attributed to, 479 & 480 n.15, 488 & 489 n.5; health, suffers from gastralgia, 316–17, 320; J.D. Hooker describes as a prodigy, 366; J.D. Hooker feels ‘infantine’ beside him, 351; under- stands J.D. Hooker’s refusal of knighthood, 493; horse’s tooth received from J. Orton, unable to support generalisations based on, 412, 420; V. Lushington, angry at letter to CD from, 124–5; V. Lushington, sketches a terrier in letter to CD regretting his angry response, 136; morphology of the hand, lectures on, 264 & 265 n.10; Na- ture, first edition, translates article mistakenly attributed to Goethe, 479 & 480 n.15, 488 & 489 n.5; positivism, criticism of, 114 n.2, 125 & n.3, 126, 126–7 & 127 n.3, 312 & n.4; preoccupation with great question of ‘Darwinisms’ has led him to lose contact with naturalists, 316; protoplasm as physical basis of life, 123 & 124 n.7; pugnacity, grows weary of people proposing controversy on him, 136; Pinnoma, anatomy and development of, 38 & n.7; ‘River-bed’ neolithic skulls, 439 & 440 n.2; rotation of the earth increased during glacial period, 460 & 462 n.3; sends CD letter from R.O. Cunningham on fossils of Magellan Straits, 215, 221; teleology, as lawlike mutual interaction of forces possessed by molecules, 433 n.2; challenges W. Thomson’s calculations on age of the earth, 124 n.6, 135, 139 & n.5; W. Thomson, attack on rebutted by P.C. Tait, 339 & n.7; US royalties, 494; visits Down, 253 & 254 n.12, 579; A.R. Wallace fears he will find his review of Lyell...
Index

Huxley, Thomas: Henry, cont.
unphilosophical, 155 X Chub, 479 & 480 n.11
Hybernae aurantia (Agriopus aurantia): ratio of
sexes, 266 & 267 n.30
hybrid sterility, 105-6 & 107 n.9, 107 & 108 n.16, 166 & 166 n.5
Hydrocotyle matosa: ratio of sexes, 266 & 268 n.43
Hydrochoeris hydrochoeris. See Canus cobaya
Hydrodamalis gigas. See Siene stellari
Hygranas (Astronurus): whether sits on nest, 394 &

n.7
Hymenophyllum: H. gracile (H. inaequalis), H. tenellum
(Adriantium tenellum, Meccodium tenellum), identification
of, 138 & 160 n.9 & 10
Hypericum bistortoid: self-sterility, 438 & 439 n.7
Hypomecis roboraria. See Beamnia roboraria
Hywel Dda: cattle during reign of, 440 & 441 n.7

icebergs: mode of transporting vegetable matter, 114-15
Idaea dilutaria. See Acidalia incanaria
Ilgana tuberculata (I. ilgana): dorsal crest, 407 & 408
n.10
Ilex sotica (L. aquifolium "Scotica"): spiny branch on
smooth-leaved tree, 507-8, 517-18 & 518 n.11
Illustrated London News: E. Blyth's drawing of musk
deer, 193 & 194 n.3; J.L. Latey, editor, 194 n.3
Indian antelope: age at which horns develop, 102
Innes, Eliza Mary Brodie: suffers violent
headaches, 434 & 435 n.4
Innes, John Brodie, 56 n.1; CD's photograph hangs in
pride of place; inquires about Church matters at Down, 434;
encourages J.W. Robinson to resign as curate of Down, 330 n.2; lack of a
house the principal cause of failure to find suitable curate, 331 n.3; parsonage at Down, costs of
building, 445-6 & 446 n.4; seeks to acquire
Troner lodge from S.E. Wedgwood for a parsonage, 445-6 & 446 n.5
Innes, John William Brodie: at Cambridge, 434 &
435 n.4
insects: stridulating, 386 & 386-7 nm. 1-6, 421 &
n.1-5
Institut de France, 162 & 163 n.3, 554 & 555 n.3
Intellectual Observer: F. Müller, Facts and arguments for
Darwin, review copy, 95
International Copyright Act 1892, 472 n.3
International Horticultural Exhibition, St Peters-
burg, 125 & 124 n.4, 160 n.4, 160 & 161 n.27, 253 &
254 n.11, 279 & 280 n.3; J.D. Hooker describes
259-61 & 262 n.11
Jacob-Makoy, Lambert, 248 & n.2
Jäger, Gustav: Darwinian theory and religion,
pamphlet on, 273 & 274 n.4, 281, 560 & n.4; CD
thanks for sending, 380 & 381 n.1
Janson, Edward Westey: natural history dealer, 386
n.2, 473 & n.3
Jeffreys, John Gwyn, 29, 347 n.13, 414 & 415 n.14,
356 & 356 n.14
Jena, University of: W. T. Preyer, professor of phys-
iology, 162 & n.4
Jenkin, Henry Charles Flerming: criticism of Origin
in North British Review, xvi, 21 & n.12, 37 & n.7,
60 & n.3; A.R. Wallace disagrees with on impor-
tance of single variations, 50, 60
Jenzich, Gustav: CD dismisses boasts of, 72; D.
Forbes and E. Zirkel dismiss claims of, 49-50 &
50 nm.3 & 4, 545 & nm.3 & 4
Jesus College, Cambridge: G. E. Corrie, master, 171 &
172 n.6
Johnson, Samuel: Dictionary, T.H. Farrer compares
Hooker and Bentham's Genus plantarius with, 390 & n.6
Johnstone, James: cited in Desert, 375 n.2;
polygamy in elephants, 374 & 375 nm. 1-2
Jones, Albert Hugh: sexes of Lepidoptera, 483-4 &
484 n.1
Jones, Edward: sends M.A. Ruck note on develop-
ment of sheep's horns, 195
Jones, Henry Bence: E.A. Darwin thinks CD will
require his treatment to ride again, 190 & n.2
Jones, John Winter, 87 & n.2
Journal d'agriculture pratique. E. Carrière, selection
of wild radish, 79-83 & 84 nm.2 & 6; E. Lecou-
teux, editor in chief, 79
Journal of Botany, B.C. Seeman, editor, 535 n.3
Journal of the Etnological Society of London, 44 n.8
Journal of the Linnean Society of London, 31 & n.9; O.P.
Cambridge, two species of spiders from Ceylon, 339; F. Müller, note on monstrous form of Begonia
fragilis, 223 n.6; R. Spruce, Phaen Acanthas, 224
n.1
Jubania spectabilis (J. chilensis): unique to rock off Maui-
ritius, 159 & 160 n.18
Orange Judd & Co.: CD offers 5th edition of Origin,
187 & n.2, 253, 496; Origin, unwilling to trespass on
D. Appleton's rights to publish, 187-8, 253 &
n.9, 497 n.4; Variation, sales steady but only half edition sold, 187
Juglans: distribution, 492
Jukes, John Beeke, 462 n.6
Jussieu (Jussaitis, Ludwig): early flowers differ from
later, 523-4 & 525 n.10
Kaup, Johann Jakob, 304 & n.8, 407 & 408 n.9
Kelaart, Edward Frederick: Flora Capensis, 17 & n.3
Kempson, Louisa Frances, 434 n.1

© in this web service Cambridge University Press
www.cambridge.org
Kendall, Ezra Otis, 380 & 381 n.2
Kepler, Johann, 539 & 541 n.3
Kerner von Marilaun, Anton: distribution of plants, 488 & 489 nn.7-9, 492, 495
Kilburn, Jonathan (inmate, West Riding asylum): expressions, 237
King, Philip Gidley: cited in Variation, 99 n.2; CD sends a line for add lang syne, 191; unable to identify distinctive facial expression among aborigines, 99
Kingsley, Charles, 107 n.10; subscribes to Cambridge Museum, 171 & 172 n.9
Kippist, Richard: Linnean Society, librarian, 53 & n.2, 214 & 215 n.1
Klostermann, Julius Alfred, 339 n.14
Knowles, James Thomas, 356
Kobus marit (K. megaceros), 102 & 103 n.6
Koch, Eduard: *Descent*, seeks confirmation of CD's plans for translation of, 443; *Descent*, CD hesitates before giving him rights to translate, 450 & n.3; *Descent*, CD confirms he will ask J.V. Carus to translate, 464 & 465 n.2; J. Dub, will publish exposition of CD's theories by, 273 & 274 n.4, 281, 350 & 351 n.4; G. Jager, informs CD about work of, 273 & 274 n.5, 380 n.1, 560 & 561 n.5; Origin, 4th German edition, 197 & n.1, 273 & 274 n.4, 560 & 561 n.4; Origin 5th edition, CD suggests J.V. Carus negotiate special rate for translating, 205; sends CD J. Dub’s book, 464 & 465 n.1; *Variation*, German edition, sales, 355 n.5, 273, 290
Koch, Karl Heinrich Emil, 326 & 329 n.14
Köllecker, Rudolf Albert von: researches near Messina, 337 & 339 n.13
Kovalivskaia, Sofia Vasilievna: prepares doctorate in mathematics, 384 & 385 n.2; visits Down House, 379
Kovalevsky, Alexander Onufrievich, 418 & n.3; developmental history of simple ascidians, 2-3 & 3 nn.6 & 7; sent to university of Kiev, 384 & 385 n.4
Kovalevsky, Vladimir Onufrievich: abortive plan for Russian illustrated Bible, 2 & 3 n.5; CD introduces to TH. Huxley, 418; hopes to be able to visit CD at Down, 384 & 385 n.1; Origin, Russian translation, 2, 4-8; *Variation*, Russian translation, 384 & 385 n.3; visits Down House, 418 & n.2, 379
Labiscom darwinii: sexual differences, 349 & n.2, 352, 379
Labiatae (Lamiaceae): fertilisation, 584 & n.7
Lacroix, Sylvester François, 97 & 98 n.3
Lagrange, Joseph Louis, 355 n.6
Laing, Alexander Gordon, 534
Lamia*um albium*: fertilisation of, 190-1 & 191 n.2, 203 & 204 n.3, 470 n.2, 477
Lamark, Jean Baptiste de, 55 n.2, 329 & 330 n.12; A.R. Wallace criticises theory of 'progressive development', 175 & 176 n.5
Lamiaceae. See Labiatae
Land and Water: E. Blyth argues that *Sequoia* is identical with *Wollongoria*, 179 & 180 n.5; E. Blyth, musk sheep of Arctic America, 102 & 103 n.7; E. Blyth replaced by J.K. Lord, 383 & n.5, 385; CD only read for E. Blyth's articles, 385; T.C. Eyton, salmon rising, 37-8; Paris correspondant notes A. de Quatrefages's article on CD's theories about hybrids, 179 & 180 n.4; F.H. Salvin, 'A domesticated jackal', 458 & n.2
Landis, Hermann: CD uses drawings in *Descent*, 293-4 n.6
Landor, Henry: icebergs, mode of transporting vegetable matter, 114-15
Landelier, Edwin Henry, 32 & n.5, 49 & 50 n.10, 545 & n.5
Langstaff, Charles, 244 n.6
Lankester, Edwin Ray: CD's testimonial for (unsuccessful) application to Christ Church, 289 & n.1
Lapenuous rosus: fertilisation of, 494 & n.1
Laplace, Pierre Simon, marquis de, 97 & 98 n.3, 355 n.6
Lasioscampa trifolii. See Bombyx trifolii
Latania glaucoptila (L. leddygita): found in Mauritius, 159 & 160 n.19
Lathyrus: stamens, 356; style, 361; *L. clymenum* cf. *L. ochras*, 393 & 392 n.4, 519 & 521 n.1; L. ochras, J.T. Moggridge identifies for CD, 393 & 392 n.2
Laughing dove. See Steptopelia senegalensis
Lauworia alba (L. inermis, henna): Arabs use to dye whiskers, 301 & 302 n.12
Layard, Edgar Leonopol, 160 & 161 n.26
Le Couteur, John: cited in *Variation*, 351 n.3; selection of wheat, 350-1 & 351 n.2
Lea, Isaac, 350
Lecoultre, Edouard: editor in chief, *Journal d’agriculture pratique*, 79 & 84 n.4
Leech, Jane (inmate, West Riding asylum): expressions, 232 & 240 n.5
Leidy, Joseph; T. H. Huxley recommends as judge of horse's skull found by J. Orton, 395 & n. 7, 420 & 421 n. 6
Leitch, John R.; review of F. Müller, "Facts and arguments for Darwin," 272 n. 3
Leigh, Augustus Austen, 77 & n. 9
Leipzig university: R. Leuckart chosen as professor of zoology over J. V. Carus, 68 & 69 n. 8, 453 & n. 6, 468 & 469 nn. 4–6, 548 & 549 n. 8, 570 & n. 6
Le Moaot, Emmanuel, 19 n. 3
Lenné, Peter Joseph, 233 & 238 n. 3
Lepididae: C. F. Claus's research based on CD's theories, 47 & 48 n. 4, 67–9, 541–4
Lepas australis: auditory organs, 69 n. 5, 549 n. 5
Lepidostomias: as 'paradoxical' animal, 11 & 12 n. 5
Lepidoptera: battledore scales, 284 & n. 2; proportion of sexes, 224 & n. 1, 263 & n. 2, 267–7 & 267–8 nn., 483–4 & 484 n. 1; sexual selection, 486–7
Lerna brachiata (Lerna swaeda brachiata): collected by CD in South America, 358 & n. 6
Lesley, J. Peter, 580 & 581 n. 3; erosion of Appalachians due to subaerial denudation, 212 & 213 n. 13; projected map of earth-surface of the US, 212–13 & 213 n. 11
Lesia bombylans (Xylopa bombylans): F. Smith identifies for CD, 371 & n. 1
Lestré richardsonii (Stercorarius parasiticus): resemblance to sparrow hawk, 416 & 417 n. 4
Lettington, Henry: CD consults on keeping Drosophila lusitanicum plants alive, 128
Leucandra: L. fistulosa. See Leucania fistulosa. L. gossei. See Lepidophygiopsis gossei. L. rumia. See Lepidophygiopsis rumia
Leuckart, Rudolph: appointed professor of zoology at Leipzig, 68 & 69 n. 8, 453 & n. 6, 468 & 469 nn. 4–6, 548 & 549 n. 8, 570 & n. 6
Leucopeiopsis gossei (Leucandra gossei) A.M. Norman offers specimens of, 346 & 347 n. 17; L. rumia (Leucandra rumia). A.M. Norman offers specimens of, 347 & n. 20
Leucosolenia: L. botryoides, L. corinca (Clathrina corinca), L. contorta (Clathrina contorta). A.M. Norman offers specimens of, 346 & 347 nn. 16 & 19
Lewes, George Henry; ‘Mr Darwin’s hypotheses’, Fortnightly Review, 297 n. 2, 442 & 443 n. 7
Leydig, Franz von, 68 & 69 n. 5
Liebig, Justus von: mechanics and its application to nature, 188 & 190 n. 2. 555 & 557 n. 2
Lightfoot, Joseph Barber, 171 & 172 n. 8
Limada: A. Dohrn seeks species to study embryology, 536 & 539 n. 8
Linum grandiflorum: self-sterility, 494 & n. 2
Linaria cymbalaria (Cymbalaria muralis): bees and fertilisation of, 30 & n. 3, 39
Lindley, John, 138 & 160 n. 13
Linne, Carl von (Carolus Linnaeus), 22; Passiflora, fertilisation of, 583 & 584 n. 3, 584; Philosophia botanica, 163 & 166 n. 5
Linnéan Society, 263 n. 3, 390 n. 3; M.E. Barber, CD recommends publication of paper on fertilisation by insects, 224; R. Bennett, paper on cross-fertilisation of Papavers palustre, 190 & 191 n. 1; G. Bentham, anniversary address on geographical distribution, 280 & n. 7, 285–6 & 286 n. 8, 476 & 477 n. 10, 495 n. 1; G. Bentham, paper on revision of Cassia, 164 & n. 8, 503 & 504; G. Bentham consults CD on publication of papers by R. Spruce and M.E. Barber, 214–15, 223 n. 13; CD sends G. Bentham F. Müller's note on monstrous form of Begonia frigid, 223 & n. 6, 223, 322; CD does not have 1895 papers, 14; CD donates F. Mueller's Fragmenta 53 & nn. 1 & 2; CD recommends publication of M.E. Barber's paper on fertilisation by insects, 224; CD sends duplicates of F. Delphino's publications, 369; CD suggests T.H. Farrer send paper to, 350 & n. 4; CD and A.R. Wallace, papers on natural selection (1858), 146, 175 & 176 n. 6, 482 & 483 n. 5, 514 n. 2; T.H. Farrer prepares note on Passiflora caerulea but never published, 436 & n. 3, 583; G. Henslow, paper on phyllotaxy, 406 n. 3; R. Kappistr, librarian, 53 & n. 2, 214 & 215 n. 1; library, 381 n. 1, 465 & 466 n. 2; J.T. Moggride submits to intend papers to, 263 n. 3, 521 & n. 5; F. Muller, letter on monstrous begonia read to, 223 & n. 6; J. Scott, paper on tree ferns of Sikkim read to, 527 n. 7; R. Spruce's paper on modifications in plants through agency of insects read to, 165 & 166 n. 3; R. Spruce's paper, CD does not recommend publication as inheritance has not been proved, 224–5 & n. 2. See also "Journal of the Linnéan Society of London; Proceedings of the Linnéan Society of London, Transactions of the Linnéan Society of London
Linsser, Carl: temperature and plant development, 411 & 412 n. 6, 564 & n. 6
Linypurus: L. pratensis (L. hortensis), L. fulginea (Microlanthes fulginea), sexual differences, 359
Lithossia rubricella (Abroma rubricella): ratio of sexes, 265 & 267 n. 16
Lloyd, Gertrude Jane Mary: excavates Denbighshire fossils, 439 & 440 n. 2
Lloyd, Mary Charlotte: CD sends W.B. Dawkins's
Index

759

Lushington, Godfrey, 77
Lushington, Vernon: criticisms of T.H. Huxley, 114 & n.1 & 2, 124–5; criticisms of T.H. Huxley, CD angered by, 126 7; T.H. Huxley regrets strength of his reaction to criticisms of, 136
Luise, Fedor Petrovich, 260 & 262 n.8
Lychnis: dimorphism, 457 & 458 n.4; L. alma, L.E. Becker’s paper on, 430–1 & 431 n.5; 534 & 555 n.1
Lycaon lagurus (Pardus lagurus): sexual differences, 359
Lyell, Charles, 44, 58, 270 & n.3, 280 nn.10 & 11, 355, 362; admires A.R. Wallace’s sketch of natural selection and is not opposed to idea of Supreme Intelligence, 211 & 213 n.4; alternate ice ages in northern and southern hemispheres, reluctantly accepts J. Croll’s thesis, 51 & 52 n.4; G. Bentham’s Linnean Society address, discusses with CD, 476; G. Boccardo sent book to, 270 & n.2, 359 & 360 n.2; Cuvier, meetings with, 211 & 213 n.2; CD asks for a photograph for diplomas of new natural history society in Croatia, 205–6 & 206 n.2, 216; CD comments on to papers by J. Croll and H. Moseley, 143 & n.2; CD intends to borrow Guardian from, 37; CD joins in praising A.R. Wallace’s Quarterly Review article, 184, 206 & nn.5 7; CD praises A.R. Wallace’s Malay Archipelago, 143; CD reminds younger geologists of the revolution effected by, 174 & n.2; CD thanks for response to PG. Tait’s article, 465; CD welcomes his interest in South America, 231; geological time and permanence of continents, 460–2; glacier-lakes, amicable controversy with Wallace, 206 & n.3, 212; J.D. Hooker describes rise wholly unaided, 493 & 494 n.17; seeks KCSI for J.D. Hooker, 479 & 480 n.6; urges J.D. Hooker to accept knighthood, 493 & n.11; high expectations of T.H. Huxley’s Geological Society address, 193 & 194 n.8; magnetic force of the sun and cooling of the earth, 51 & 52 n.8, 72 n.2; E. Meteyer, supports petition for civil pension for, 86, 87; questions secular loss of heat, 62 & 64 n.4; Principles, misremembers G. Cuvier reading, 211 & 213 n.2; Principles, 10th edition, review by G. Buckle, 28 & n.8; Principles, 10th edition, A.R. Wallace reviews in Quarterly Journal of Science, 28 & 29 n.9, 37; Royal Society, refuses nomination as president, 492; visits Down House, 579; X Club attempts to install as president of Royal Society, 479 & 480 n.11
Lyell, Leonard, 44
Lyell, Mary Elizabeth, 44 & n.3, 91 n.3; J.D. Hooker consults on C. Lyell’s health, 479 &
Lyell, Mary Elizabeth, cont.
480 n.12, 492 & 493 n.9, 495 & 496 n.2; visits Down House, 359
Lythrum: CD’s research on, 176 & 178 n.2; CD, ‘Three forms of Lythrum salicaria’, J.D. Hooker quotes, 26 & 27 n.11, 36

Macaca (Macaca): females smaller than males, 193 & 194 n.2; M. irusnatus (M. maurus), CD wonders if it sheds tears in distress, 187 & n.4; would not survive in Amsterdam, 191
Macaulay, Thomas Babington, 596
McCam, James, 413 n.3; T.H. Huxley demolishes critique of Darwinism, 375 & 376 n.4
McConchie, William, 258 & 259 n.10
MFintosh, Roberta. See Günther, Roberta
McLennan, John Ferguson, 24 & 25 n.11
McNeill, Archibald: cited in *Decent*, 43 n.2 & 4, 91 n.2; G. Cupples obtains information for CD from, 9 n.3, 17 & 18 n.1; deer horns, whether for use or ornament, 42–3; deer-hounds, relative size of dogs and bitches, 17 & 18 n.5, 120, 122 & 123 n.6; red deer, mating rituals, 90
McNeill, Duncan, Lord Colonsay, 18 & n.6
Malicidae septemdecim. See Cicada septemdecim
Malocassoma castrensis. See Bombyx castrensis
Malus: M. domestica, pyramidal ‘Golden Pippin’ grown at Sans Souci, 401, 402 & 405 n.12; M. pumila var. paradisiaca (*Pyrus malus var. paradisiaca*, paradise apple), J. Decaisne comments on, 201 n.2
Malvaceae: W. Ogole on fertilisation of, 309 & n.5
Malven, Ferdinand Maria: sends CD greeting on his 60th birthday from *New Frezse Press*, 74 & n.2
Manurillas primigeniae. See Elephas primigenius
Mandrillus leucophaeus. See mandrill mandrill (*Mormon leucophaeus*, *Mandrillus leucophaeus*): Antwerp Zoo, all specimens have died, 383; barreness of, 179 & n.2, 186–7; CD seeks examples of both sexes, 381, 385; Frankfurt zoo has only a single male, 269 & 270 n.3, 359 & n.3; sexual differences, 193 & 194 n.2
Manantiales: F. Delphino draws up genealogical tree of, 422 & n.10, 568 & 569 n.10
Marha fragrans: CD sends F. Müller’s paper on to T.H. Farrer, 448 & n.7. 429
Martineau, James, 597
Masse, Nevil, 492 & 493 n.6
Masters, Maxwell Tylden: editor, *Gardener’s Chroni-
cle*, 32, 201, 393; R. Fenn’s experiments with grafted potatoes, 395–6; *Saparia*, observations on cited in 5th edition of *Origin*, 14 & 15 n.3; sends CD E.D. Cope’s paper on origin of genera, 201 n.1; sends CD yellow-berry-holly bearing orange berries, 32 n.2
Maudslay, Henry: passes CD’s questionnaire to J. Crichton-Browne, xviii, 232
Mauritian: fauna, 159 & 160 n.20; ferns, 158 & 160 nn.9, 10 & 12; geology, 159 & 160 n.17, 163
Maw, George: CD asks to find age when merino sheep develop horns, 15 & 16 n.2, 183; *Drosophyl-
rum*, CD asks to find living specimen, 15, 17, 22; *Drosophyllum*, sends CD dried specimens, 290–1, 244; *Drosophyllum*, sends CD plants from Gibraltar, 182–3; *Drosophyllum*, CD hopes plants will recover, 194–5; ferruginous variegation, paper on, 8 & n.2; offers to send CD information from Gibraltar and Tangiers, 8; sends plants to Kew, 195
Max Müller, Friedrich: theory of origin of lan-
guage, 313 & 314 n.7
Mayne, Richard Charles, 215 n.1
Mezodium tetenellum. See *Hymenopryne* tetenellum
Medici, Lorenzo de’, 212
Medicus, Friedrich Casmir, 583 & 594 n.3; 584
Meehan, Thomas: CD comments studies on *Michelia* and *Eugenia* to J.T. Moggridge, 262 & 263 n.5
Melamprus spretus (hateful grasshopper, Rocky Mountain locust): sterility of, 167 & 168 n.8
Melastomaceae: no ants saccs produced in specimens at Kew, 225; R. Spruce investigates role of ants in fertilisation of, 166 n.2, 176–7
Melitoptus: fertilisation of tropical plants by, 422 & 423 n.3; 567 & 568 n.3
Meller, Charles James, 158 & 160 n.12
Mellor, Grace (inmate, West Riding asylum): ex-
pressions, 236
Memoirs of the Manchester Literary and Philosophical So-
ciety*, 534 & 535 n.3
Menkes, Fletcher Norton: sheep breeders, 258
merino sheep: age at which horns develop, 6, 15 & 16 n.2, 17, 33–5 & 35 n.3 & 4, 55, 56–8 & 58 nn.4, 5–7 & 8, 64 & nn.2–4, 98 & 99 n.4; G. Maw endeavours to research, 15, 18; ram from Lohmen, drawing of, 34 & 45 nn.3 & 4; Saxon
Index

761

herds, 56–8 & nn. 5, 7 & 8, 33–5 & 35 nn.3 & 4, 63 & nn.3 & 4; W.C. Tait endeavours to research, 173

Merville, Herman, 362 & 363 n.9

Merrell, S.A.: observes American cuckoo in a jay’s nest, 54 & 5

Metaphysical Society, 596, 597

Meteyard, Eliza: CD organises petition to secure civil pension for, 75 & 76 n.2, 86 & n.1; gratitude for CD’s support for petition, 87

Meyer, Adolf Bernhard: natural selection, translation of 1858 papers by CD and A.R. Wallace, 482 & 483 nn.4 & 5, 514 & 514–15 nn.2 & 3, 515, 514–5 & 515 n.5 & 6; natural selection, translation of 1858 papers by CD and A.R. Wallace, seeks photographs, 497 & 498 n.1, 505–6 & 506 n.3, 514 & n.3, 515; requests complete list of CD’s works, 482, 574–5; treatise on poisonous snakes, 482 & 483 n.7, 575 & n.7; A.R. Wallace, Malay Archipelag, German translation, 481–2 & 482 n.3, 511 & 512 n.13, 514 n.3, 515 & n.5, 574 & 575 n.3

Miauramphos: M. thwaitesi, M. ferndadini, 359 n.8

Michelangelo Buonarroti, 211 & 213 n.5

Miconia phalacria. See Lepidium fuligineum

Millais, John Everett: support for E. Meteyard, 87 & 88 n.5

Miller, Hugh: Footprints of the Creator, 528 & 529 n.10

Milman, Archibald Scott, 77 & n.6

Mills-Edwards, Alphonse: CD uses drawing of crab in Descend, 292 & 293 n.3; fossil birds of France, book on, 58 & n.4, 52

Mimosa: sensitivity of leaves, 465 & 466 n.1

Minula: A. Gray’s observations on cited in 53rd edition of Origin, 14 & 15 n.3

Miquel, Friedrich Anton Wilhelm: J.D. Hooker visits, 283 & 286 n.3; visits J.D. Hooker with his daughters, 373 & 376 n.9; J.D. Hooker might bring to Down, 381, 398 n.2

Moggridge, John Tiberne: admires work of F. Müller and T. Meean, 387–8; CD commiserates with on ill health and thanks for beautifully illustrated observations, 262 & 265 n.2; ‘Fertilisation of orchids’, presentation copy, 387 & 388 n.2; identifies Lathyrus ochrus for CD, 391 & 392 n.2; intends to submit papers to Linnean Society, 263 n.3, 321 & n.5; Lathyrus cluemum and Ophrys antennata, seedling, 519–21 & 521 n.3; Ophrys, study of, 265 nn.2 & 3, 388 & 389 n.9; in poor health, 66 & n.8, 363 & 364 n.16, 546 & 547 n.8

Molendo, Ludwig, 263 n.5

Mollisia petenensis (Pecilia petenensis): spots on dorsal fins, 392 & n.6, 407

Mokulau: M. niger (M. bonariensis); parasite on Tri- palaus, 12 n.8, 130 & 131 n.14, 132 & 134 n.3

Monesmus pseudocori (M. punctatum album, iris weevil); striulation, 421 & nn.3 & 5

Month: ‘reasonable’ critique of CD’s theories, 447 & 448 n.4, 448 & 449 n.3

Montgomerie, Adelaide, 53 n.1

Moore, Charles: vegetation of Lord Howe Island, 363–4 n.17

Moore, Thomas, 201 & n.3

moose (Alces alces): whether distinct from elk, 150 & 151 n.12, 154 & 155 n.3

More, Alexander: CD invites to visit if his health permits, 287; experiments with Epipactis palustris, 287 & nn.2 & 4

Mormonea ignes: L. Rérutle’s revision of, 226 & n.5

Mormon leucophora. See mandrill

Morris, Francis Orpen, 413 n.9

Mortlock, Edmund John, 172 n.15

Mortlock’s: bankers, University of Cambridge, 171 & 172 n.15

Moury, Thomas, 218 n.3

Moseley, Henry: descent of glacers by weight alone, 51 & 52 n.6, 63 & 64 n.11, 69 & 70 n.3; glacial motion, 143 & n.2

Mota, Ignácio Francisco Silveira da, 512 n.12

Motulica flavus (Ray’s wagtail, yellow wagtail): males migrate before females, 269 & n.1

moth: ratio of sexes, 316

Moulinié, Jean Jacques: Descend, CD will be delighted for him to translate, 450; Descend, keen to translate into French, 446; Origin, 5th edition, proposes translation of, 466; Origin, 5th edition, C.-F. Reinwald commissions to translate, 478 & n.2, 481; Origin, 5th edition, CD delighted Reinwald has commissioned to translate, 481; Origin, 5th edition, CD sends additions, 490; Origin, 6th edition, translator, 453; Variatio, French translation, 225 & 226 n.2; sends CD summary of E.A. Carière’s paper on selection of wild radish, 78–9 & 84 n.2, 93

Mozley, James Bowling: Quarterly Review, design in nature, 297 n.2, 340 n.12

Mueller, Ferdinand von: CD donates Fragments to Linnean Society, 53 & nn.1 & 2; travels to Australia, 158 & 160 n.14

Müller, Fritz, 48 n.6; Abatton, whether self-sterile, 132, 437–8 & 439 n.3; Abatton, sends CD seeds of, 510; A. Agasiz admires, 511; Alisama, CD very interested in article on, 510 & 512 n.5; analysis of principles of classification commended by J.D. Hooker, 319 & 320 n.3; Begonia, experiments with inheritance of monorraster, 438 & 593; Begonia frigida, CD sends letter on monstrous form and seeds to G. Bentham, 223; botanical expeditions in Itajubá, 270 & 272 n.1; butterflies,
Müller, Fritz, cont. battlefield scales, 284 n.2; cited in French translation of Orchids, 322; Crustacea, evolution of, 534–5 & 538 n.3 & 539 n.5; CD asks to observe stratification of Papilio, 378; CD encourages to publish on inheritance of separate flowers, 199; CD never fails to admire range of interests, 199; CD sends German translation of A.R. Wallace, Malaya Archipelago, 511 & 512 n.13, 515 & n.5; CD sends letters and seeds to J.D. Hooker, 112, 190, 350 & n.12, 362; CD sends notes on Begonia and grafted orange trees for publication, 322 & 323 n.8; CD very interested in article on Opuntia, 510 & 512 n.6; CD, thanks for help in publication of Facts and arguments for Darwin, 270–1 & 272 n.3; dimorphism and trimorphism, 522–3; early flowers differing from later, 523–4; Eschscholzia, experiments to establish whether self-sterile, 9–10, 112 & n.2, 130 & 132 n.16, 271, 524; Eschscholzia californica, cultivates seeds sent by CD, 378 & 379 n.6, 438 & 439 n.6; Fennema, sends CD notes on, 271; Martha fragments, CD sends paper on to T.H. Farrer, 426 & n.7, 429; metamorphosis of insects, CD’s admiration for analysis of, 137; Melolontha niger, observations, 130 & 131 n.14, 132 & 134 n.3; Oenothera, ‘gnawed’ protruberances on label, 27 n.6; orchids, self-fertility and crossing, 438 & 439 n.4; Ovis experiments with, 130 & 131 n.7; panagenesis, experiments with 25a maps may demonstrate, 10–11, 130; Passiflora, whether fertilised by humming-birds, 438–9, 505 & 507 n.2, 510, 511 & 512 n.3; Panax, development of, 68 & 69 n.10, 548 & 549 n.10; Rhizocephala, retrograde development, 138 & n.3; Salvia, fertilisation by hummer-bees, 134; self-sterile plants, 524; Stephocarpa, rarity, 27 n.7; describes Stephocarpa, 10–11; Tanais dubius, two forms of male, 68 & 69 n.9, 548 & 549 n.9; Tragopogus, cuckoo-like behaviour of, 11; 25a maps, attempts to establish heredity of, 10–11, 130

— Facts and arguments for Darwin, costs of publication, 94 & 95 n.1; 2, 95 n.2; CD’s admiration for, 137 8; CD concurs with J.D. Hooker’s view of, 338 & 339 n.4; CD dedicated by sales, 198; CD rejoices at appearance of Für Darwin in English, xxii, 322; CD sends J.D. Hooker’s comments, 322; CD specifies text for spine, 113 & n.2, 125 & 126 n.3; CD, E. Müller thanks for help in publication of, 271 & 272 n.3; J.D. Hooker comments on, 319, 322; presentations, 95, 113, 125, 129–30, 139, 396 & 397 n.1; publication, 128–9, 131; reviews, xxii, 322 & n.4; sales, 60 & 61 n.3, 91 & 92 nn.2 & 3, 94 & 95 n.1, 129, 130, 196 & n.2, 198, 322, 484, 511 & 512 n.11; A.R. Wallace enjoys reading, 153 & 155 n.1

Müller, Hermann, 272 n.1; cited in ‘Fertilization of orchids’, 397 & n.2; CD commends work on orchids to J.T. Moggbridge, 262 & 263 n.3; Effecta and Platanaera, studies cultivation of, 262 & 263 n.3; F. Müller, Facts and arguments for Darwin, pre-sentations, 129 & 131 n.3; thanks CD for presentation copies, 396–7; Westphalian bees, hopes F. Smith can identify species, 475; Westphalian orchids, cultivation of, 262 & 263 n.3, 387 & 389 n.5

Müller, Johannes Peter; F. Müller challenges analysis of type, 319 & 320 n.2; researches near Messina, 538 & 539 n.13

Munby, Giles; Flora d’Algérie, 17 n.3

Murchison, Roderick Impey, 456; knighthood, 44 & n.4; recommends J.D. Hooker for KCSI, 479 & 480 n.2, 488 & 489 n.3; urges J.D. Hooker to accept knighthood, 493 & n.11; Sibiria, 4th edition, review by A. Gellik in Quarterly Journal of Science, 29 n.9

Murphy, Joseph John; Habit and intelligence, A.R. Wallace reviews, 447 & 448 n.3, 448 & n.2, 515 & 516 n.6

Murray, Andrew; with J.D. Hooker in St Peters burg, 281 & 282 n.12

Murray, John, 21 n.11, 194 & n.2, 454; founds Academy, monthly literary review, 392 & n.2; CD asks to clarify his obligations to V. Masson, 471, 472; CD seeks to grant French translation rights of 5th edition of Origin to Reinwald, 471, 472; CD’s books, sales, 484; commiserates with CD on fall from his horse, 196; Descent, advance notice published in Academy, 392 & n.3, 393, 448, 450; Descent, CD discusses woodcuts for, 490 & n.1; Expression, advance notice published in Academy, 448, 450; Journal of researches, CD asks to arrange C.P. Hauouiller’s translation of, 55 & n.2, 60; F. Müller, Facts and arguments for Darwin, costs, 191; F. Müller, Facts and arguments for Darwin, sales, 60 & 61 n.6, 196 & n.2, 198, 484, 511 & 512 n.11; Orchids, publisher of, 85, 91, 550; Orchids, will supply woodcuts for French translation, 225; Origin not published from stereotypes, 592 n.2; Origin, 5th edition, copies to be sent to C.-F. Rein wal德 for translation, 478, 481; Origin, 5th edition, plans to print 2000 copies, 196, 198; sends CD Quarterly Review with A.R. Wallace’s article, 198 & n.2; J.L. Sinclair asks to forward memoranda to CD, 547–548, 559

Musa vornitoria (Calliphora vornitoria); F. Smith identi ties, 371 & n.2

Museum of Practical Geology, Royal School of Mines: T.H. Huxley, professor, 355 & n.6, 418
Index

& n.4
Muskmak Park, Prussia, 327 & 329 n.22
*Mutilia*: F. Smith offers CD specimens of, 473 & n.3; *M. europaea*, stridulation, 316 & n.2 & 317 n.6, 421 n.4
Myriapoda: sexual differences, 349 & n.3, 352 & n.4

Nageli, Carl Wilhelm von: criticism of natural selection, 15 n.1, 360 & n.4; CD disagrees with on perfectability, 310 & 311 n.5; CD responds to in 5th edition of *Origen*, xv–xvi, 130 & 141 n.4; CD hopes A. de Candolle’s experiments will answer, 426 & 427 n.2; CD sends draft response to J.D. Hooker, 14–15 & 15 n.1; J.D. Hooker comments on CD’s draft reply, 19 & 20 n.1, 25
Nash, Henry Allden, 365 & n.3
Nash, Louisia: sketch of CD, 598
HMS *Vasa*: fossils discovered in Magellan Straits, 215 & n.2, 221

Nature: A.W. Bennett, fertilisation of winter-flowering plants, 203–4 & 204 n.2, 420; CD replies to A.W. Bennett on fertilisation of *Lamium*, Vicia and grasses, 477 & n.1; CD thinks more highly of than does J.D. Hooker but should search more foreign journals, xxiii, 487, 492; CD, ciriapidae, complemental males, 41–2 n.9, 544 n.9; T.H. Farrer, fertilisation in papilionaceous flowers, 360 n.4; Goethe’s aphorisms, article by T.H. Huxley in first edition, 479 & 480 n.15; J.D. Hooker greatly disappointed with, xxiii, 429 & 480 n.13; J.D. Hooker, review of W.P. Schimper’s book on vegetable palaeontology, 477 n.13; A.R. Wallace, ‘Measurement of geographical time’, 513 n.4; A.R. Wallace, review of J. J. Murphy *Habit and intelligence*, 418 n.4, 428 & n.2, 515 & 516 n.6
Natura Magistralis *Aristis*, 187 n.1, 191
natural selection: whether balancing all internal and external influences to the good of the individual, 177; CD ‘dreadfully disappointed’ by A.R. Wallace’s views on human evolution, 206; CD glad T.H. Huxley has expressed views about molecules, though he is unable to follow them, 432 & 433 n.4; CD urges A.R. Wallace to take more credit for 1858 paper, 175 & 176 n.6; CD welcomes A.R. Wallace’s exposition of in *Quarterly Review*, 175; J.E. Gray thinks belief in can only be attributed to lack of study, 179 n.3; whether leaf variation can be transmitted, 20–1, 25; G. Lyell admires A.R. Wallace’s sketch of and is not opposed to idea of Supreme Intelligence, 211–12 & 213 n.4; C.W. Nägeli’s critique of, xv–xvi, 14–15, 19, 20–21, 25 & n.1; papers by CD and A.R. Wallace read to Linnean Society (1858), 175 & 176 n.6; uniform characters may not be of vital importance, 21 & n.9, 25–6; A.R. Wallace believes application to humans is limited, 155 n.10, 206
nauplii: in evolution of crustaceans, 335
*Nebulosa*: A.M. Norman offers specimen of, 345
*Necron puber*: see *Portunus puber*
*Nemophilus*: stridulation, 316 & n.3, 421 & n.2
*Nettanita*: fertilisation of tropical plants by, 422 & 423 n.3, 567 & 568 n.3
*Nectariinae* (Nectariniidae): fertilisation of *Streptopelia* by, 458 & 459 n.4, 572 & 573 n.4
Negretti & Zambra, 98 & n.3
*Neospyrophus quadris.* *See Thoeca quadris*
*Nepenthes wardii* (*N. pervarii*): discovery of, 159–60 & 161 n.25
*Nephele angustella* (*Nepheletis angustella*): ratio of sexes, 266 & 268 n.70

*New Free Press*: greets CD on his 60th birthday, 74 & n.2
Newton, Alfred, 77 & n.5; enlists CD’s help to purchase cabinets for Cambridge Museum of Zoology, 170–1
Newton, Edward, 190 & 191 n.25
nightingales: whether males migrate before females, 241–2 & 242 n.2, 245–6
nilage: age at which horns develop, 102
Nilsson, Christine: concert at Exeter Hall, 513 & 514 n.8
Nilsson, Sven: cited in *Descent*, 7 n.1; sends CD information about age at which reindeer acquire antlers, 7 & n.1
Noble, Charles, 329 n.23
*Nocotia*: *N. brunnata* (*Dianthus brunnata*), ratio of sexes, 266 & 268 n.30; *N. dahlii* (*Dianthus dahlii*), ratio of sexes, 266 & 268 n.51; *N. elegans* (*Ophryon elegans*), ratio of sexes, 266 & 268 n.48; *N. triangulata* (*Xestia triangulata*), ratio of sexes, 266 & 268 n.49
Norman, Alfred Merle: calcareous sponges, provides E. Haeckel with British samples, 341 & n.4, 342, 345–7, 344 & 345 n.4, 420, 565 & 566 n.4
Norris, Richard: A.R. Wallace convinced by spiritualist experiments of, 185 & n.6

North British Review: J.D. Hooker has no interest in reading criticism in, 351 & n.7, 352; H.C.F. Jenkin, article critical of *Origin*, 21 & n.12, 37 & n.6, 70 & n.3; H. Spencer, letter from, 27 n.8; [PG, Tait], ‘Geological time’, 339 & n.7; [PG, Tait], ‘Geological time’ CD recommends J.D. Hooker read, 354
Norton, Charles Eliot, 254 n.12, 566
Norton, Susan Ridley, 44 & n.3; visits Down, 253 & 254 n.12
Notes on Books, 538 & 539 n.2
Notodonta dactyloides (Phasina groma): ratio of sexes, 266 & 268 n.38

Ochrodes sylvanus. See Hesperia sylvana
Ochropleura placa. See Noctua placa

Odling, William, 479 & 490 n.9

Oikocentra bidentata: ratio of sexes, 265 & 267 n.24

Oersted, Hans Christian: talks to J.D. Hooker about CD, 289 & 286 n.4

Ogle, William, 244 n.6; CD admires paper on Salvia, 309, 309–10

Oliver, Daniel, 16, 492 & 493 n.2; CD invokes study of bark in defence of pangenesis, 442 & 443 n.5; Flora of tropical Africa, 160 & 161 n.26, 320 n.1; J.D. Hooker discusses relationship of Dracaena and Drasophyllum, 392; receives seeds of monstrous form of Begonia frigida sent to CD by F. Müller, 223 & n.7, 223

Oliver, James: G. Cupples will consult for information, 256; highest mortality of male lambs, 303–4 & 304 n.1

Oxalis: labellum, 25–6 & 27 n.6

Oxyryynchus: J.T. Moggridge studies, 269 nn.2 & 3, 388 & 389 n.0; Ophrys anemonea, germination, 520 & 521 n.2; O. musciera (O. insectifera), fertilisation of, 390 n.1

Orbigny, Alcide Charles Victor Dessalines d’, 5 n.3 orichards: Epipactis palustris, W. Darwin finds in Colwell Bay, 304–5 & 305 n.2, 308 & nn.2 & 3, 314–15; Epipactis, fertilisation by insects, 287 & n.2, 304, 308 n.2; T.H. Farrer finds functions affected by weather, 389; fertilisation of, 389 & 390 nn.1 & 2; fertilisation by bees, 438 & 438 n.2 & 3; fertilisation by bees and moths, 384; fertilisation by insects, 394; fertilisation of. See also CD, publica
tions, ‘Fertilisation of orchids’; self-fertility and crossing, 438 & 439 n.4; terrestrial, in Maurit
nia, 158 & 160 n.12; W.C. Tait finds an orchid illustrating adhesion of pollinia, 226–7

Orchis mascula: H. Müller observes fertilisation by bees, 397 & n.3

Oxyxea pudicula (Callistepus pudicula), 484 & n.2

Origen, 187; American cuckoo, nesting habits, 54 & 55 n.3; correlation of growth, 417 n.7; CD believes views on all points would have to be modi
fied in twenty years, xv, 36; CD describes as ‘ever
lasting old Origin’, 293; E. Darwin, note on ap
deeded, 55 n.2; elephants, CD corrects error in calculating number of, 275–6; F. Galton liberated from superstition by, 332; geographical distribu
tion, 65 n.3, 66 n.3, 547 n.3; geographical dis
tribution and permanence of continents, 461 & 462 n.8, 463 & n.4; geological succession of life, 107 & 108 n.17; E. Haeckel delighted at growing influence of, 297, 561; hybrid fertility, 166 & 166 n.5; icebergs, as means of transporting vegetable mate
rial, 114 & 115 n.1; importance of interaction with other plants and animals in determining species, 498 & 499 n.6; inherited characteristics, 44; isolation, role of, 499 n.10; H. Landor’s admir
ation for, 114; F. Leichfeld’s critical review of, 272 n.3; nuthatch and timmouse, relationship of, 162– 3 & 163 n.6, 555 & n.6; R. Owen’s hostile review of, 395 n.3; polymorphic genera, 311 n.5; sheep breeder’s view of, 57; R. Spruce’s admiration for, 165; sterility of first crosses between species, 108 n.16; W.C. Tait’s admiration of, 45; unconscious selection, 498 & 499 n.8; Vestiges [R. Chambers] cited, 55 n.2; Weald, denudation of, 58 & 59 n.1

Origia, 2d edition: estimates of age of the earth halved, 339–40 n.10

Origia, 4th edition, 21 & n.11; L. Agassiz cited on presence of progenitors in embryos, 286 & 299 n.2, 349–50 n.4; beauty, problem of, 126 & 129 n.7; Corynthes fertilised by Euglossa bee, 499 n.2; elephants, number of, 259 & n.2; nuthatch and timmouse, relationship between, 163 n.4; survival of temperate plants during ice age, 52 n.4

Origia, 5th edition: Adoxa, calyx-lobes, 19 & 20 n.7; L. Agassiz’s belief that presence of progenitors in embryos is a universal law of nature, 349–50 n.4; age of the earth, 139 & n.4; alternate glacial periods in northern and southern hemispheres explains survival of tropical species, xvi–xvii, 52 n.4, 141 n.4, 283 & 284 n.3; American cuckoo, nesting habits, 55 n.4; angles of leaves, 19 & 20 nn.4 & 6; completion of, 253 & n.8; copies sold at J. Murray’s annual sale, 484; J. Croll cited, 52 n.4, 141 n.4, 283 & 284 nn.2 & 3; CD deliberately made additions short, 290 & n.6; CD describes changes to J.D. Hooker, 204–5; CD ‘fairly dis
gusted’ at amount of change needed, 21; CD of
fers J. Crichton-Browne presentation copy, 243 & 244 n.15, 251 & 252 n.8; CD promises presenta
tion copy to W.C. Tait, 128; CD reports error in calculating elephant numbers to J.V. Carus, 277 & n.4; CD works on, xv, 21, 37 & n.6, 47, 48 & 49 n.3, 64 & 65 n.5, 67 & n.4, 128, 190, 205, 206 & n.4, 578; denudation, 462 n.9; direct and definite action of external conditions, 205 & n.4; geological time, xvi, 339 & 339–40 n.10; A Gray cited, 14 & 15 n.3; H.C.F. Jenkis’s arguments leads CD to modify views on perpetuation of single vari
tions, xvi, 21 & n.12, 37 n.7; V. O. Kovalyevskij proposes translating additions as supplement to Russian edition, 2 & 3 n.4; length only a page or two longer, but many deletions and correc
tions, 465; M.T. Masters cited, 14 & 15 n.3;
morphological characters, 19 & 20 nn.2 & 3; J. Murray plans to print 2000 copies, 196, 198; reply to C.W. von Nägeli’s criticism, xv, 14–15 & 15 n.1, 19 & 20 nn.1–2, 20–21, 25 & n.1, 32, 140 & 141 n.4, 157 & n.6; natural selection may leave non-vital characters unaltered, 21 & n.9; perpetuation of single variations, xvi, 21 & n.2, 37 n.7; presentations, 279, 283 & 284 n.1, 284 & n.1, 297 & 298 n.2, 330, 551; publication, 3 n.1, 49 n.11, 51 & 52 n.0; C.-F. Reinwald commissions J.J. Moulinié to translate, 478 & n.2, 481; retention of rudimentary organs, 432 & 433 n.2; A de Saint-Hilaire cited, 14 & 15 n.2; Scientific Opinion, CD arranges review copy, 283; single variations of far less importance than individual differences, 205 & n.4; Spanish chestnut flowers, 19 & 20 n.6; US edition proposed by D. Appleton & Co., 434 & 435 n.1, 496, 531; Viola species, 19 & 20 n.3; M. Wagner, response to, 41 n.4, 47 & 48 n.3, 69 n.6, 130 & 141 n.1, 502 & 504 n.2, 544 n.4; Weald, denudation of, 59 n.1, 61 & n.4

Origin, 6th edition: eye, evolution impossible through spontaneous variation, 516 n.6; French translation by J.J. Moulinié, 451 n.6; migratory birds, earth on feet of, 269 n.2; G. Swainglay cited, 269 n.2

Origin, German edition, xvi, 156 & n.2, 554 & n.2; CD seeks sales figures, 6 & n.3, 35 & n.5; 3rd edition, 197 & n.1; 4th edition, 197 & 456 & n.6, 57 & n.6; H.G. Bronn suggests change of title, 256 & n.3; 5th edition, J.V. Carus commissioned to undertake translation, 273 & n.2, 560 & n.2; CD cannot authorise J. Dub to include quotations that might interfere with rights of existing translations, 140 & 141 nn.2 & 3; CD recognises difficulty of translating ‘struggle for existence’, 161; CD sends 5th edition to J.V. Carus, 256, 277, 281, 466 & nn.3 & 4; 5th edition, CD sends corrections, 277, 490, 547 n.5; 5th edition likely to cause J.V. Carus a good deal of trouble, 205; CD thinks title should remain unchanged, 277

Origs, Russian edition, 3 n.3; V.O. Kovalevskiy proposes translating additions to 5th edition as supplement, 2 & 3 n.4

Origin, US edition: D. Appleton unable to incorporate changes in 5th edition, 187–8 & 188 n.4; D. Appleton will publish, preferably from stereotypes, 494 & 495 n.1, 496, 501–2 & 502 n.2, 531; CD appends historical sketch on development of transformation from Erasmus Darwin and Lamarck, 55 n.2; CD offers to Orange Judd, 187, 253, 458; Orange Judd unwilling to trespass on D. Appleton’s rights, 187–8, 253; royalties, 531; sales, 53 & 54 n.1, 531–2 n.2

Ormerod, George Wareing: index to publications of Geological Society, 231 & 232 n.2

Ornithorynchus (duck-billed platypus): as ‘paradoxical’ animal, 11 & 12 n.5

Oviposition: fertilisation of tropical plants by, 422 & 423 n.3, 567 & 568 n.3

Orthia: O. gothica. See Taimanica gothica; O. incerta. See Taimanica insitibilis

Orton, James: seeks permission to dedicate work to CD, 4–5 & 5 n.3, 39; sends CD fossilised horse’s tooth from Andes, 379 & n.1; sends The Andes and the Amazon to CD, 379 & n.3; CD sends fossilised tooth to J.H. Huxley to pass on to R. Owen, 395, 420

Ossian: mythical dogs of, 121 & 123 n.8, 122

Ostrea galba: J. Orton finds, 4 & 5 n.3

Ottawa (Illinois) Academy of Natural Sciences: offers CD collection of fossils, 203 & 210 n.14

Ovis montana (O. canadensis): uses base of horns, not points, to batter opponents, 208 & 210 n.10

Owen, Richard: CD asks T.H. Huxley to pass on fossilised tooth sent by J. Orton, 395; CD sends photograph to S. Brusina for letterhead of new Croatian academy, 216 & n.2; CD unable to communicate with directly, 395 & n.3, 420 & n.2; correlation of parts, theory of, 26 & 27 n.7; genealogy of the horse, 316 & n.4; J. Orton asks CD to send fossilised horse’s tooth to, 379 & n.2; likely to gnash his teeth at A.R. Wallace’s article in Quarterly Review, 158 & n.2

Ovis: CD and F. Muller experiment with, 190; O. ariesvallis, heterostylus, 130 & 131 n.7; O. martiana (O. latifolia), dimorphism, 439 & 439 n.8

Ovisperus abronii [Protoovisperus abronii]: collected by CD in South America, 338 n.5

Pagan, Allan C.: cited in Descent, 318 n.1; G. Copley will apply to for information, 258 & n.9
Index

Pagan, Allan C., cont.

sheep, proportion of sexes, 317–18

Pagenstecher, Heinrich Alexander, 41 & n.7, 544 & n.7

Paget, James: attends CD after fall from his horse, 190 & n.1, 206 & n.8, 220 & 221 n.17, 252; CD reports recovery after fall from his horse, 190; cited in Expression, 244 n.12; has offered to observe blushing and platysma muscle in screaming, 199 & n.3; observes blushing for CD, 243; observes patients under anaesthetic for CD, 244 n.6; sends CD Lord Fitzwilliam’s note about striped horse, 1

Palestinian mountain gazelle. See Gazella gazella sp. gazella

Paley, William, 176 n.10, 540 & 541 n.7; Natural theology, F. Dalton oppressed by until he read Origin, 532 n.2

Palingrave, Francis: rise wholly unaided, 493 & 494 n.12

Palingrave, Francis Turner: ‘The reign of law’, 26 & 27 n.10

Pallas, Pyotr Simon: discovers Rhinoceros ichthyus, 260 & 261 n.6

Pandanus vandermeerschii: unique to rock off Mauritius, 159 & 160 n.18

pangenesis theory. Acuba, J.D. Hooker’s experiments on may demonstrate, 135 & 136 n.4; L.E. Becker admires, 13; L.E. Becker seeks to demonstrate from action of fungus on, 430 & 431 n.5; CD revises views on regrowth of amputated parts, 391 n.2; CD responds to F. Delpino’s comments on, 441–2 & 442–3 n.2; F. Delpino’s articles on, xxi–xxii, 508 n.2, 370 & n.2, 422 & 423 nn.8 & 9, 425 n.3, 459 & 460 n.12, 502 n.2, 432 n.6; F. Delpino’s articles, CD arranges translation and publication of, 370 & n.2; and disappearance of rudimentary organs, 432 & 433 n.9; G. Henslow describes twin lambs that may support theory, 92 & 93 n.4; J.D. Hooker elucidates role in development of humans, 319; F. Müller’s experiments with Zaia may demonstrate, 10–11, 12 & nn.10 & 12, 130; regrowth of bark, 391 & n.2; C. Royer’s preface to 3rd French edition of Origin hostile to, 451 & n.4, 472 n.5; WC. Tait seeks examples of, 46 & n.5

Papilio fennia (Hemadryas fennia, blue cracker): CD seeks to acquire specimens, 473 & n.3; stribulation, 578 & n.2

Papilionaceae (Fabaceae): fertilisation of flowers, 356–7, 360, 361, 389–90, 584 & n.7

paradise apple: whether distinct from pear, 201 & n.2

parasitic worms: CD offers South American speci- mens to T.S. Cobbold, 337–8 & 358 nn. 2–6

Pardosa lugubris. See Lycosa lugubris

Parker, Frank, 193 & n.6

Parker, Theodore, 333

Parnassia palustris: cross-fertilisation, 190 & 191 n.1, 205 & 204 n.6

parrots: naturalised in Norfolk, 13–14

partridges: milk white, 434

Passiflora: CD suggests T.H. Farrer compare with Tausonia, 536 & 555 n.9; CD urges T.H. Farrer to publish notes on, 444 & n.2; T.H. Farrer compares with Tausonia, 435–4 & 436 n.1, 582–94; fertilisation by bees, 424, 426, 428 & 429 n.1, 438–9, 505 & n.2, 506; fertilisation by humming-birds, 438–9, 505 & n.2, 506; self-fertilised, 428 & 429 n.2; whether self-sterile, 494 & n.2, cf. Tausonia, 360, 428 & 429 n.2, 435 & 436 n.1, 444 n.2, 505 & n.2, 511 & 512 n.3; P. antennifera. See Tausonia van tolcaenii; P. cœrulans, flower structure and fertilisation, 502–7 & 594 n.1, 585; P. cœrulans-tauconnia (P. x violacea), flower structure, 589–90 & 593 n.16; P. hybrida florula, flower structure, 589–90 & 595 n.17; P. Impératrice Eugénie, flower structure, 591 & 595 n.18; P. kermesina, flower structure and fertilisation, 587–8; P. princescens (P. racemosa), flower structure and fertilisation, 456, 583, 585, 588–9; P. tripartita var. mollissima. See Tausonia mollissima

Passifloraceae: difficulty in identifying due to hybridisation, 506 & 507 n.3

Paul, John: offers CD collection of fossils from vicinity of Ottawa, Illinois, 209 & 210 n.14; CD sends regards to, 245 & n.4

Pax: development of spurs, 186 & 187 n.1, 191, 380–1 & 381 n.3

Payer, Jean Baptiste: variation in locules of ovariun in Rutaceae, 16 & 17 n.1, 19 & 20 n.6

peacock: development of plumage, 154; illustrated in Decent, 409 & n.2

peafowl. See Pavo

Pelargonium: distribution, 509 & 504 n.10

Pellia annulif, 158 & 160 n.12

Pellena comita (dark spinach), 266 & 267 n.34

Penaelia formosa. See Rhytidophora formosa

Penaeus: development of, 68 & 69 n.10, 548 & 549 n.10

Peridonia (Hemadryas), 271 & 272 n.8

Peristylus viridis (Coeloglossum viride): fertilisation of, 390 n.1

Petit, Georg Heinrich: entertains J.D. Hooker in St Petersburg, 260 & n.2

Petit, Leonora: entertains J.D. Hooker in St Petersburg, 260 & n.2

Peters, Wilhelm: J.D. Hooker meets in St Petersburg, 260 & n.3

chimpanzee, 281–2 & 282 n.2
phytology: CD's interest in, 391 & 392 n.3; G. Henslow sends CD paper on, 406
Phytophthora alniornis. See Elaphomia alniornis
pigeons: breed true to colour, 169; proportion of sexes, 152
pig: proportion of sexes, 152
Pike, Nicholas: geology of Mauritius, 159 & 160 n.17
Pium: stamens, 356
Plaintaenea: hybrids with Cochlospermum, 457 n.2
Platanus orientalis: cuneate-leafed form grown at Sans Souci, 402 & 405 n.10
playmate muscle: CD seeks further information from J. Crichton-Browne, 264; J. Paget to observe action of in sneezing, 199 & n.3
playfair, John: uniformitarianism based on erroneous mathematics, 354 & 355 n.6
Pluotus: P. chrysitis (Diachrysia chrysitis, burnished brass), 266 & 268 n.6; P. interligata (Syngnapha interligata, scarce silver Y), 266 & 268 n.64
Poucipus kalmianus (P. ocellatus; silvery grebe): CD discovered in Andes, 5 & 6 n.7, 40
Porcellio petenensis. See Millocornia petenensis
Pollock, Frederick, 71 & 72 n.14
Polygala: fertilisation of, 30 & n.3, 39
Polyplecton: illustrated in Descartes, 409 & n.2
polyoecy: elephants, 374, 383 & n.4, 385 & n.4; wild boar, 355 & 356 n.13, 383 & n.4, 385 & n.4
polyzoa: G. Busk identifies those observed by CD, 499 & nn. 1–5
Pomatia, 394 & n.7
Ponderer [anonymous writer to Athenaeum]: elephants, calculation of number of, 259, 275 nn.2 & 5, 277 n.3, 397 & 398 n.2, 356 n.13
Pontereria (Elechonema; water hyacinth): tritumorphism, 592 & 594 n.3, 524 & n.6
Poppel de Zold, Royal Agricultural Academy: all experiments based on Darwinian principles, 87
Popular Science Review, 311 & n.9, 320 & n.9; F. Muller, Facts and arguments for Darwin, review copy, 95; W. Ogles, fertilisation of Salvia, 390 & n.2
HMS Porcupine: dredges off coast of Ireland, 345 & 347 n.5
porpoise: parasitic worms collected by CD, 357 & 358 n.3
Portus tuber (Nicola tuber), 54 & n.1
potatoes: R. Fen's experiments with grafting, 395–6 & 396 n.2; graft hybrids, 32 & nn.1 & 2; 'piebald', 32 & n.1; whether hardness can be improved, 341
poultry: proportion of sexes, 153
Index

Proceedings of the Zoological Society of London: arrival of Asiatic warthog, 194 n.3; A. Campbell, twin births unknown in elephants, 355 & 356 n.13; J.E. Gray ridicules natural selection, 173 n.3

pronghorn. See Antilocapra americana

proportion of sexes: cattle, 331-2; deer-hounds, 124, 276, 276 & 277 n.8 as demonstrated in Indian census, 355, 362, 381; dogs, 276; insects, 263 & nn.1 & 2; Lepidoptera, 224 & n.1, 261 & n.2, 265-7, 483-4 & 484 n.1; molluscs, 316; rats, 383-4; sheep, 257-8, 258, 272 & 273 n.1, 274 & nn.1-2, 287-8, 317-18, 353 & n.1

Protocopa: C.F. Claus hopes to study pupae of, 41 & n.9, 544 & n.9

Protozoophaga obesa. See Oxyurus obesa

Prunus spinosa: graft with Amygdalus communis, 493-4 & 495 n.21

Fryer, Marlborough Robert, 71 & 72 n.8, 77 & n.4

Ptelea trifoliata: A. Reuter grafts with P. t. ‘Aurea’, 409 & 409 n.16

Pilophora plumigera (plumed prominent), 266 & 268 n.37

Pulvermacher, Louis: promotes electric belts for relief of dyspepsia, 255 & n.3

Pyrus glauca (Orthotyphis glaucinus), 266 & 268 n.66

Pyromas: A.O. Kovalevsky and T.H. Huxley investigate, 2-3 & 3 n.7

Pyrus malus var. paniolii. See Malus paniolii var. paniolii

Quarterly Journal of Microscopical Science. G. Busk, Bugula divaricata, 470 n.4

Quarterly Review: G.H. Lewes, ‘Mr Darwin’s hypotheses’, 297 n.2; [J. B. Mozley], design in nature, 296-7 & n.2, 339 & 340 n.12; J. Murray, publisher, 198 n.2; W. Smith, editor, 185 n.5; A.R. Wallace, Malay Archipelago, review of, 297 n.2; A.R. Wallace, review of C. Lyell’s Principles and Elements, 155 & n.10, 174-5, 184 & 185 n.2, 196 & n.3, 198 & n.5, 206 & n.5

Quatrefoils, Armand de: admires CD and explains his need to criticise his theories, 162-3 & 163 n.5, 554-5 & 555 n.5; hopes to meet G.H. Darwin, who has called, 162 & 163 n.5, 554 & 555 n.2; Revue des Deux Mondes, articles on CD’s theories about hybrids, 178 & 180 n.4; sends CD articles on transformationism, 162 & 163 n.5

Quercus spp.: varieties reverting to type, 326 & 329 n.n.11 & 12

Quetelet, Lambert Adolphe Jacques: theory of probability, 97 & 98 n.2

rabbits: fecundity, 216 & n.1; F. Galton studies heredity in, 518-19 & 519 n.1; tame, proportion of sexes, 152-3

Raddcliffe, William Frederick: hybrid potatoes, 32 & n.2

Rait, James: sends G. Cupples data about ratio of sexes of cattle, 331-2 & 332 n.1

Ramsay, Andrew Crombie, 452 n.6; glacial origin of rock basins, 206 n.3; Physical geography and geog-raphy of Great Britain, 56 & 59 n.n.2 & 3; 61 & n.2; Weald, denudation of, xvii, 58 & 59 n.1, 61 & nn. 2 & 4

Ramsey, George M’Ilvaine: sends CD his Cosmology, 168

Ranau, R.: review of A.R. Wallace, Malay
Index

769

Archipelago, 449 n.6
Rangifer tarandus. See reindeer
Raphanus raphanistrum: transformation in four genera-
tions, 78, 79–83 & 84 nn.2 & 6
rats: proportion of sexes, 303–4
Rawdon, Elizabeth Ann, 356
Rawlins, Francis Hay, 71 & 72 n.3
Reade, William Vinnwood: cited in Descent, 291 n.2; cited in Expression, 334 n.4; impressions of Gold Coast, 22, 24; observes expression and sexual selec-
tion in West Africa, 533; rams’ horns, develop-
ment of in West African breeds, 290–1 & 291
n.2, 291 & n.3
Recht, Georg: CD sends financial assistance, 103–4
& 104 n.2, 189, 551 & 552 n.2, 556; laments condi-
tion of Germany, 188–9, 555–6; lives in poverty,
73, 188, 549, 555; monographs on laws of the uni-
verse and analytical mechanics, 73–4 & 74 n.2,
104 & n.5, 189 & 190 n.3, 549 & n.2, 551 & 552
n.5, 556 & 557 n.3
Reed, Mr: witnesses battles between bisons, 207
Reeves, William (b. 1834/5): CD seeks to obtain
benefits from Westminster Club, 425 & n.2
Reeves, William (b.1814/15), 425 n.2; CD’s Bob
fights his dog, 77 & n.9
Reform Act 1867, 28 & 29 n.10
Regent’s Park, London: capital place to observe
work of earthworms, 222
reindeer: early appearance of horns, 7 & nn.1–2
Reinwald, Charles-Ferdinand: will publish French
translation of Orchids, 225–6 & 226 n.1, 344 n.2;
ofers to publish 5th edition of Origin, 460 & 467
n.5, 471, 472 & n.4, 478, 489
Rérolle, Louis: translation of Orchids, 85–6, 112
& n.4, 134, 137, 225–6 & 226 n.1, 590; translation of
Orchids, CD prepares notes for, 287 & n.4; trans-
lation of Orchids, sends CD chapters for review
before publication, 343–4
Reseda odorata: fertilisation, 322, 328
Reuter, Adolp: horticultural notes, CD initially de-
clines due to poor health and poor German,
247–8, 255–6; horticultural notes, sends to CD,
xxii, 232–3 & 326 n.2; sends CD further notes
on grafting and sketches of plants, 398–404; CD
thanks for important facts about budding and
grafting, 409
Revista Europea (formerly Revista contemporánea): F.
Delphino arranges publication of CD’s response
to his articles on pangenesis, 459 & 460 nn.12 &
13, 572 & 573 nn.12 & 13
Revillagigedo islands: CD promotes exploration of
fauna and flora, 280 & n.11
Revue des courses scientifiques: Descend, request to publish
excerpts, 449 & n.3, 569 & n.3

Revue des Deux Mondes: A. de Quatrefages, articles
on CD’s theories about hybrids, 179 & 180 n.4;
A. Quatrefages, critique of transformism, 162 &
163 n.5, 554–5 & 555 n.5; G. de Saporta, re-
view of Variation, 449 n.6; A.R. Wallace, Malay
Archipelago, review of, 438 & 449 n.6
Rhau: parasitic worms collected by CD, 357 & 358
n.2
rhinos monkeys: no difference in facial bareness of
males and females, 193, 194
Rhizocoephal: retrograde development, 138 & n.3
Rhododendron formosella (Fernmelda formosus), 266 &
268 n.71
Rhoeas spinosus (Aponeurus spinosus), 345 & 347 n.7
Ribes spp.: propagation, 326–7 & 329 nn.14–16
Richardson, H.D., 121 & 125 n.9
Richardson, John: description of sockeye salmon,
397 & 398 n.3
Ricker, Franz Anton: director, J. Ricker’sche Buch-
handlung, 453 n.4, 455 & n.1, 570 & n.4; invites
C. Vogt to translate Descend into German, 452 &
453 & n.4, 454 & n.2, 455 & n.1, 570 & n.4
Ridpeth, Thomas Hardwick, 132 & 153 n.5
Rigby, Anne, 261 n.4
Rigby, Gertrude, 261 n.4
Rigby, Maria Justine, 261 n.4
Riley, Charles Valentine: articles (with B.D. Walsh)
in American Entomologist, 167 n.2 & 5
Robarts, Lubbuck & Co., 76 n.5
Robertson, Peter: age when deer develop horns,
31–2; cited in Descent, 32 n.4; G. Cupples seeks in-
formation from, 9 & n.3, 18 & n.3; head forester,
Breadalline forest, 9 & n.3, 32 n.3, 276 & 277
n.8; males predominate in deer-bound litters,
276 & 277 n.8; pictured by Landseer and others,
32
Robinia: stamens, 356, 357; Robinia pseudacicara,
graffied tree grown at Potsdam, 401, 402 & 405
n.11
Robinson, John Warburton: absence in Ireland, 56
n.1, 73 n.1; funds due to Down National School,
56 & n.1, 73 n.1; resigns as curate of Down, 330
n.2
Rolfe, Robert Monsey, 1st Baron Cramworth, 587
Rolle, Friedrich: popular exposition of Darwinism,
140 & 141 n.4
Rosen, Gertrude de, 261 n.4
Rosen, Maria Justina de, 261 n.4
Rosen, Robert de, 261 n.4
Rosen, Theophile de, 261 n.4
Ross, James Clark: memorial collection, 362 & 363
Index

Rass, James Clark, cont.

Rossari, Alexander, 172 & 174 n.3

Round Island, Mauritius: flora and fauna, 159 & 160 nn.17-20

Royal Botanic Garden, Berlin, 328; C.D. Bouché, inspektor, 328 & 339 n.28; P.J. Lenné, director, 323 & 326 n.3

Royal Botanic Garden, Calcutta: fern collection, 26 n.2; J. Scott, curator, 26 n.2, 303 n.13; T. Thomson, superintendent, 356 n.15

Royal Botanic Gardens, Kew: Acacia, experiments with fertilisation of, 124 & n.10, 158; A. de Candolle, experiments with seeds sent by, 419 n.2, 426, 427; CD asks G. Bentham to deliver seeds of Bagonia frigida to D. Oliver, 223 n.7; CD sends specimens of Drosophyllum lusitanicum, 169 & 170 n.4; Drosophyllum lusitanicum fails to grow, 158, 183, 312; S. Habel sends plants from Galapagos, 310 & 311 n.4; J.D. Hooker, director, 195 & n.4, 225; J.D. Hooker overwhelmed with official requests, 362; W.J. Hooker, director, 494 n.12; G. Maw sends Drosophyllum and other plants from Gibraltar, 182-3, 195; J. Reuter employed at for a year, 228; R. Spruce sends specimens of Toowaa, 177 & 178 n.11; R. Spruce sends wood of Cinchona succirubra, 178 n.4

Royal College of Surgeons, Hunterian Museum, 102 & 103 n.7, 395 n.5

Royal Geographical Society: H.W. Bates, assistant secretary, 263 n.3

Royal Horticultural Society: R. Fenn displays graft potatoes, 395-6 & 396 n.2; garden at Chiswick, 201 n.3

Royal Society: Copley Medal, 44 & n.6; CD donates G. Recht's book on laws of the universe, 74 n.3, 550 n.3; J.D. Hooker, fellow, 476 n.6; C. Lyell refuses nomination as president, 492; H. Moseley, paper on possible descent of glaciery by weight alone, 51 & 52 n.6; X Club attempts to install C. Lyell as president of Royal Society, 479 & 480 n.11, 489

Royer, Clémence Auguste: CD believes himself badly treated by, 451 & n.4, 471 & 472 n.5, 489; CD recommends J.J. Mouquin's note on his spirited style, 481; CD revenged on, 486 & n.8, 492; Or-igin, ignorant of publication of 2nd French edition, 477; Origin, ignorant of publication of 5th edition, 415 & 416 n.3, 417 n.4, 566-7 & 567 n.3; Origin, 3rd French edition, preface 'blasphemous', xx, 471 & 472 n.5, 489; C.F. Reinswald supports CD's view, 478 translates 'struggle for existence' as 'concurrence vi- tate', 481 n.3; Variation, V. Masson claims she has bought as inspiration to her work, 415 & 416 n.4, 366 & 367 n.4

Rubiaceae: dimorphism and trimorphism, 523, 524 & 525 n.7

Rubus: R. fruticosus 'Variegatus', propagation of, 400 & 401 n.4; R. laciniatus, as distinct species, 327 & 329 n.16

Ruck, Mary Anne: E. Jones reports to on development of sheep's horns, 195; sends information to F. Darwin, 196-200

Ruck, Richard Matthews, 96 & n.9, 200 & n.6

Rudgea: R. eriantha (R. coriacea), F. Müller collects, 522 & 524 n.3; R. jasminoides, F. Müller's find identified as, 131 n.9

Rupicaulis auranti (R. crocea, R. rupicola): A.B. Meyer queries CD's references to, 497 & 498 n.7, 506

Ruscell: fertilisation of, 204 & n.9

Russell, Arthur, 396, 497

Russell, Diana, 596

Russell, Fanny, 480 n.4

Russell, Flora, 597

Russell, Hastings, 5th Duke of Bedford, 596, 597

Russell, John: unable to supply G. Cuples with information about sexes of lambs, 274

Russell, John, 1st Earl Russell, 479 & 480 n.2

Russell, Laura: portrait of CD, 596-9

Russell, Odo, 596

Russell, William, Lord, 596

Russian Association for Science: supports marine biology stations, 337 & 339 n.12

Rutaceae: variation in locules of ovary, 16 & 17 n.1

Rutimeyer, Ludwig: cited in Variation, 440-1 n.6

Sabine, Edward: accepts belated knighthood, 331 & 352 n.9, 354; president, Royal Society, 479 & 480 n.9, 492

St Clair, George: six-toed cats, 363

Saint-Hilaire, Auguste de: cited in Origin, 5th edition, 14 & 15 n.2; CD misattributes remarks on ovary of Rutaceae to, 16 & 17 n.1

St Petersburg, J.D. Hooker finds huge and tasteless, except for sublime churches, 260

Salmo (salmon): S. salar illustrated in Descent, 397 & 398 n.3 & 4

Salvia: CD admires W. Ogle's paper on, 306 & 307-309; fertilisation by humble-bees observed by F. Müller, 134

Salvin, Francis Henry: sends CD paper on domesticated jackal, 458 & n.2

Samuelson, James, 28 n.4

Spermonia: M.T. Master's observations on, 14 & 15 n.3

Saporta, Gaston de: CD describes as 'a very good
.sexual selection, cont.

stridulating insects, 421 & n.n.1–5; supernumerary mammae, 145 & 146 n.n.1, 161; West Africa, women’s marriage preferences, 22, 23 & 25 n.5

Shakespeare, William, 211–12

Sharpea camillae: S. lychnitis. See Callocaia lychnitis; S. scrophulariaceae. See Callcoaia scrophulariaceae

sheep: Badagry, development of horns, 290–1 & 291 n.2; Chevriot, ratio of sexes, 287–8, 294; development of horns, 110, 115, 199–200, 227, 290–1 & 291 n.2, 321 & n.5, 533 & 534 n.10; early mortality of male lambs, 257 & 258 n.2, 258, 294 & n.3, 303–4 & 304 n.1, 306–7; feral, 501–2 & n.5, 508–9; proportion of sexes, 257–8, 298, 272 & 273 n.1, 274 & nn., 278, 287–8, 317–18, 333 & n.1; Soay, colour of, 202 & 203 n.3; Southdown, black-faced lambs, 202 & nn.3 & 4, 229, 248–9; Southdown and Kentish twins, 93–4; West African, 22 & 24 n.3 & 25 n.4

Shepard, Charles Upham, 332 & 335 n.5

Siebold, Karl Theodor Ernst von, 336 & 337 n.11

Silliman, Benjamin, 5 n.2

Silveira da Mota, Ignácio Francisco: graft-hybrid sugar cane, 524 & 525 n.12

Sinapis arvensis (wild mustard), 79; cross-fertilisation, 203 & 204 n.4

Sinclair, George, 596

Sinclair, James Leask: memoranda to CD, 527–30, 539; seeks CD’s opinion on his psychological researches, 539

Sinclair, Mary: letters to a literary friend, 528–30 & 529 n.n.3, 6 & 15

Sinclair, William: early career and theory of laws of growth, 528–30 & 539 n.6 & 8

Sipunculus: early flowers differ from later, 324

siphonophores: E. Hareckel’s study of, 414 & 415 n.9, 565 & 566 n.9

Some stenellae (Hydrodilami gigas, Steller’s sea cow): J.H. Dooiker sees in St Petersburg, 260 & 261 n.7

siskin: hybrids with canary, 246 & 247 n.6, 247

Sison, Robert: merino sheep, development of horns, 33–5 & 35 n.3 & 4, 56 & 58 n.4, 63 & n.4, 99 n.4; ram from Lehman, woodcut of, 34 & 35 n.4

Sizymium officinale: A. de Candolle sends CD seeds from different climates, 410 & 412 n.4, 411, 563 & 564 n.4, 564

Smiles, Samuel, 87 & n.3

Smith, Charles Hamilton, 514 & 515 n.6

Smith, Edgar Albert, 293 n.1

Smith, Edward A.: CD sends plates for Descent, 292–3 & n.1; CD very pleased with proofs of woodcuts, 293–5; CD asks to send proofs of woodcuts, 473 & 474 n.4

Smith, Frederick, 293 n.1; Acheta, piping anoys the neighbours, xvii, 421; cited in Descent, 371 n.3, 380 n.2, 421 n.1 & 5; CD sends specimens of Cynips, 167 & n.4; draws CD’s attention to article on stridulation in elmi beetle, 457; identifies Australian bee for CD, 371; Menophorus pseudonarius; stridulation, 421 & n.5; H. Müller would like him to identify Westernphalan bees, 475 & n.2; Mutilla, offers CD a specimen, 473 & n.5; stridulating insects, 380, 467

Smith, John (inmate, West Riding asylum); facial expressions, 237

Smith, William: editor, Quarterly Reviews, 185 & n.5

Smith, William Henry: retains parliamentary seat against allegations of bribery, 76 & n.5

snakes: M.E. Barber’s paper impresses CD, 310–11 & 311 n.8; CD believes prey is paralysed by fear, 310–11 & 311 n.8; Mauritian, 159 & 160 n.20

sneezing: E.B. Tylor collects material on, 390 & n.2

Snow, George, coal dealer and carrier, 100 n.3, 413 & n.2

Solenostoma (Solenostomus): sexual selection, 394 & n.8; 407 & 408 n.8

Somerville, Mary: CD acknowledges copy of her book on molecular science, using some of his illustrations, 33 & n.2; CD tells J.D. Hooker her book is ‘a most strange hotch-potch’, 36

Sorby, Henry Clifton, 49 & 50 n.3

South America: geology, 232–1 & 232 n.5–6

South East Railway: routes not continuous, 423 & 424 n.1

South Kensington Museum: A.R. Wallace hopes to be director of Benthal Green branch, 290 & n.8

Sparassis: Sparassus; [Microsoma vinosus, giant crab spider]: sexual differences, 359

Specktrum, 475 & 480 n.14: R.H. Hutton, editor, 437; response to [Greg’s] article in Fraser’s, 37 & n.5

Spencer, Herbert, 214 & n.16; J.D. Hooker criticised for quoting on reconciliation of religion and science, 26 & 27 n.9; Principles of biology, Appendix, 26 & 27 n.8, 44; US royalties, 494

Stygella drosophilae: F. Brotero identified Drosophilum as, 88 & 89 n.5

Sphinx: S. convolvi (Agris convolvi): males gathering around single female, 486 & 488 n.3; S. hagani, proportion of sexes, 265 & 267 n.8

spiders: sexual differences, 358–9, 376–7

Spiloma: S. lubricipeda. See Arcta lubricipeda; S. urticae. See Arcta urticae

Spiner: variation in cultivation, 326 & 329 n.20–1

Sproule, Thomas: Oxford: T.H. Farrer enjoys reading, 428 & 429 n.4; 435 & 436 n.1, 507 & n.9; T.H. Farrer quotes, 582–4 & 594 n.1, 585; Passiflora caerulea, description of, 435 & 436 n.1;
Passiflora carnea, fertilisation of, 582 & 594 n.1, 585
Spruce, Richard: Amazonian palms, paper on read to Linnean Society, 28 & nn. 5 & 6, 223 & 224 n.1; modifications in plants through agency of insects, 164 & 166 n.3, 176-8; G. Bentham consults CD before publishing paper on 'Teaia, 214-15 & 215 n.2; CD does not recommend publication of paper as inheritance has not been proved, 224 & n.2
Standish, John, 29 & 30 n.3
Stanley, Edward, 15th earl of Derby, 597
Stephania: possibly in WC, Tait's garden, 174 n.7
Sternodia: S. castanea. See Thelocidion castaneum; S. phalerata. See Thelocidion seratipes
Stebbing, Thomas Roscoe Rede: esposual of Dar- winism, 108 & n.1, 109
Steiger, Mr: merino sheep, development of horns in Saxon breeds, 33 & 35 n.2, 35, 55, 56-8, 64 & n.3
Spermatophytaeae. See Leptospermum
Stirling, James Hutchinson: paper on protoplasma, 474 & n.3, 476 & n.7, 490
Stockholm Prehistoric Museum: J.D. Hooker finds 'perfectly wonderful', 286
Stokes, George Gabriel: president, British Association for the Advancement of Science, 375 & 376 nn.2 & 6
Streptobius: pollination by birds, 431, 438 & 459 nn.4 & 5, 572 & 573 nn.4 & 5
Streptocochaeta: F. Müller's observations on, 10-11 & n.3, 130 & 131 n.13; rarity of, 271 & n.7
Streptocystis: descent, 128 & 129 n.6; S. neaguensis (laughing dove); WC. Tait sends feathers of, 106 & 108 n.14, 125 n.6; S. taurus (turde dove), in Portugal, 106-7 & 108 n.15, 129 n.6
Strickland, Hugh Edwin: collection donated to Cambridge Museum of Zoology, 171 & 172 n.3
Strutt, John William, 71 & 71-2 n.1, 514 & 515 n.7
Strynecki, Paul Edmund, 336 & 337 n.4
Sturinae. See Tropiculi
Sulivan, Bartholomew James, 514 & 515 n.5
Sutton, Seth: keeper, Zoological Gardens, Regent's Park, 187 n.4
Swainson, William: collection donated to Cambridge Museum of Zoology, 170, 171 & 172 n.3
Swansland, George, 242 n.3; cited in 'Descent', 269 n.1; migratory birds, males arrive before females, 268-9, 269 & n.3
Swinnesh, Robert: offers CD photographs of Japanese illustrating expression, 435
Syon cilata. See Goniata cilata
Syntis atratipila (blackbird); males migrate before females, 246
Sylvester, James Joseph: admiration for CD, 479 & 480 n.16; high opinion of L. Darwin, 504 & 505 n.1
Symonds, Hyacinth: J.D. Hooker charmed by, 44 & n.3, 123 & 124 n.5, 137 & 160 n.1, 362 & 363 n.6; visits Down House, 579
Symonds, William Samuel, 44 & n.3, 362 & 363 n.6, 375 & 376 n.1
Synephyriscus rasmussi (S. albus): affiliation to Capri- foliaceae, 402-3 & 403 n.13
Symphytum officinale: propagation of, 399 & 404 n.3
Synanthedon: S. myosophaeris. See Sesia myosophaeris; S. vespariformis. See Sesia vespariformis
Syngnathoidea: See Syngnathidae
Syngnathus: See Syngnathidae
Tabernamontana chinata: self-sterility, 524 & 525 n.11
Tanaecampsa: T. gothica (Orthosia gothica, Hebrew character), ratio of sexes, 266 & 268 n.52; T. instabilis (Orthosia inerta, clouded drab), ratio of sexes, 266 & 268 n.53
Tahir: whether inhabited by true Papuans, 154
Tait, Peter Guthrie: anonymous article in North British Review interests CD, E.A. Darwin and G.H. Darwin, 354 & 355 n.5; CD revised view of age of the earth in light of criticisms of, 399-40 n.10; G.H. Darwin identifies as author of North British Review article, 364 & n.6; C. Lyell responds calmly to article, 460-2 & n.1; supports W. Thomson's view of geological time, 399 n.7
Tait, William Chester: admires Variation and won- ders if vestigial tails of Portuguese pointers repre- sent pangensis, 45-6; CD asks for specimen of Drosophyllum, 39; CD reports on health of Dros- ophyllum, 169, 321; CD sends Orchids and Climbing plants, 186, 226; CD will inquire whether Zo- ological Society needs birds or animals from Portugal, 189; CD wishes he were strong enough to invite to Down, 254; Drosophyllum lusitanicum,
Index

Tait, William Chester, cont.
Brotero’s description of, 227 & 229 n.8, 537; Droshipping flumianicum, search for, 88, 96; Droshipping flumianicum, sends CD plants, xx, 104–5, 109–10, 127, 135, 172, 194–5; Droshipping flumianicum, offers to send CD seeds of, 369, 371; Droshipping flumianicum, reports on cultivation of, 312–14; observations on Portuguese flora and fauna, 416–17; Onorg, 5th edition, presentation copy, 128; sheep’s horns, searches for information on, 312–14; tailless dogs, whether inherited characteristic, 227
Tanais, 346 & 347 n.10; T. dubius, male forms of, 68 & 69 n.9, 548 & 549 n.9
Tanaidae, 345, 346
Tannenberg, Ignaz von: hereditary blindness, 500 & 501 n.2
Tannenberg, Rudolf von: hereditary blindness, 500 & 501 n.2
Tatham, Charles Meaburn: G.H. Darwin to study law with, 436 & n.1
Taxus spp.: propagation, 327 & 329 n.19
Teebay, Richard: cited in Descent, 100 n.4; sexes of sheep and colour of chickens, 100
Tegetmeier, Egbert, 182 n.3
Tegetmeier, William Bernard, xvii; calculates ratio of sexes in horses, 278 n.2; cited in Descent, 182 n.4; CD asks to find proportion of sexes in domestic animals, 123 n.11; CD asks to procure eggs of five types of fowl, 100, 180; CD congratulates on breeding crested turkey, 305 & n.3; CD hopes for information on ratio of sexes, 66–7, 370; CD receives chickens and wishes to reimburse for carriage, 413, 418–19; CD seeks information about plumage of chickens and proportion of sexes in greyhounds, 180 & n.2; CD seeks information on development of plumage in domestic fowl, 99–100; CD thanks for sending chickens, 413; CD thanks for sending eggs, 303; CD thanks for table about greyhounds and sends ten guineas in acknowledgment of his time, 184; CD will help with introductions in America, 336; plans visit to US, 332–3; researches sexual ratios in animals for CD, 100 & n.5; sends CD feathers of Polish chickens, 370 & 371 n.3; sends CD engraving of crested turkey, with feathers, 332 & 335 n.1, 333; sends CD game eggs received from E. Watson, 295; tabulates proportion of sexes in greyhounds, 180–2 & 182 n.4
Tennyson, Alfred, 596
Tetrads, 29 & 30 n.2
Thecla, ratio of sexes: T. quadruum (Neurophorus quadruum), 265 & 267 n.5; T. rubi (Callephrys rubi), 265 & 267 n.4
Theridion: T. castaneum (Stathoda castanea), stridulating organs, 377 & 378 n.6; T. lineatum (Encoplognata ovata), sexual differences, 359, 379 & 377 n.1; T. serrutipes (Stathoda phaleria), sexual differences, 377 & n.4
Thiel, Hugo: sends CD pamphlet on application of Darwinian selection to social questions, 86–7 & n.1; CD thanks for mention, 101
Thompson, T: CD applies to on W. Reeves’s behalf, 425 & n.2
Thompson, William Hepworth: master, Trinity College, Cambridge, 171 & 172 n.6
Thomson, Robert: lambs, proportion of sexes, reports to G. Cupples, 252
Thomson, Thomas: superintendent, Calcutta botanic garden, 355 & 356 n.15
Thomson, William: calculations of age of the earth, 51 & 52 n.7; calculations of age of the earth challenged by T.H. Huxley, 124 n.8, 135, 139 & n.3; CD welcomes A.R. Wallace’s criticisms of, 175 & 175 n.4; geological time, views on, xvii, 61, 62–3 & 64 n.3, 480 & 482 n.1–3; secular cooling of the globe, 61 & 64 n.8; TG: Tait supports views on age of the earth, 339 & n.7; with PG. Tait, Tentative on natural philosophy, 354 & n.6
Thrips: CD’s usage of term, 343 & 344 n.5
Thuja spp.: propagation, 327 & 329 nn.17–18
Thurber, George, 188 n.2
Thwaites, George Henry Kendrick, 142 & n.2, 359 n.8
Tickell, Thomas: rams’ horns, development of in West African breeds, 290–1 & 291 n.2
The Times, 382 n.6
Tobler, Johann Georg Christoph: author of ‘Goethe’s aphorisms’ published in Natur, 479 & 480 n.15, 490 n.5
Toovey: whether ants are responsible for sacs, 177–8
Torquay Natural History Society, 108 n.1
Tortrix sp., 266 & 268 n.73
Transactions and Proceedings of the New Zealand Institute: W. Colenso, ‘Maori races of New Zealand’, 320 & n.8, 338
Transactions of the Entomological Society of London: A.R. Wallace, theory of protective colour in caterpillars, 302 n.2
Transactions of the Linnean Society of London: G. Benth, revision of the genus Cassia, 164 n.8
Transactions of Tyneside Club: D. Oliver on reproduction of bark, 442
Trevo, Charles B., 580 & 581 n.1
Tribrurs retusus: A. de Cardolle sends CD samples from different climates, 410, 411 & 412 n.4, 563 & 564 n.4
Trimen, Roland, xvii; CD uses drawing of butter-
fly in Descent, 293 n.5; regrets passing of the age of the sincere, 487 & 488 n.8; sexual selection, moths, 486–7; thanks CD for ‘Fertilisation of orchids’, 486

Trinity College, Cambridge: E. Darwin fails to win scholarship, 170 & 172 n.2; W. H. Thompson, Master, 171 & 172 n.6

Triturus: fertilisation of, 431

Troublus: fertilisation of tropical plants by, 422 & 423 n.3, 507 & 518 n.3; T. polyonos (Jamaica humming-bird), development of plumage, 154–5 & 155 n.7

Trux sabulosus: stiridulation, 336 & n.2

Trupialis (Sturnella), 11 & 12 n.8

Trypetes. See Alcipe

Tubocystsia: distribution of, 488 & 489 n.7–9

turkeys: crested, engraving from The Field and feathers sent by W.B. Teggeton, 332 & 333 n.1, 333; tuft of hair on breast of hens, 245 & n.3; wild turkeys breeding with domestic fowl, 208–9 & 210 n.12 & 13

Tyler, Edward Burnett: asks CD for loan of R.G. Haliburton’s paper, 386; survival of savage thought in modern civilisation, 476 & n.8

Tyndall, John: theory of motion of glaciers, 78 & n.3; visits Down House, 579, 596

Tylrolops angelensis, 417 n.6

Ulex: pollination, 424; stamens, 356; U. campestris, bees fertilise as late as November, 507 & n.6; U. mariana (U. minor), 507 & n.7

Umbelliferae: classification of, 19 & 20 n.9

University of Leipzig: Landwirtschaftliche Institut, 58 n.4

Ursus arctos (grizzly bear): W.B. Dawkins finds remains in Denbighshire cave, 440 & n.5

Van Houtte, Louis Benoit, 248 & n.2

VanSittart, Augustus Arthur, 171 & 172 n.11

Vargula norvegica. See Cypridina norvegica

Varley, Cromwell Fleetwood: A.R. Wallace convinced by spiritualist experiments of, 185 & n.6

Vacher, Jean-Pierre-Etienne: number of locules in ovarium, 16, 20 & 21 n.4

Vekemans, Jacques: director, Antwerp zoological garden, 192 n.3, 269 & 270 n.4, 559 & n.4

Veronica buxbaumii (V. persica): as self-fertilising, 203 & 204 n.3

vetch. See Vicia sativa

Vibernum nitens, 327 & 329 n.25

Vicia: V. amphicarpa (V. sativa amphicarpa), fertilisation of, 459 & 460 n.9, 573 & 573 n.9; V. sativa (vetch), fertilisation of, 30 & 31 n.4

V. major, A. Reuter lists varieties of, 399, 402

Viola: V. nivea (V. tricolor), 16, 19 & 20 n.5, 20, 25; V. odorata; adaptation of flowers for crossing, 203 & 204 n.5; 213–14; V. odorata, T.H. Farrer describes structure as ‘degraded’, 210 & 211 n.1; V. odorata, CD dislikes idea of ‘degradation’ because he can see no reason for it, 213

Virgil: Georgics, horse-breeding, 92 & 93 n.3

Vogt, Carl: Descent, offers to translate into German if J.V. Carus cannot undertake, 452–3 & 453 n.4, 454 & n.2, 455 & n.1, 456–7, 570 & n.4: Descent, CD thanks for offer to translate, 456–7; Origin, 5th edition, C. Reimwald commissions to review French translation, 478 & n.2, 481 & n.2; popular lectures on Darwinism, 65–6 & 66 n.4, 546 & 547 n.4; Vorsai, revises French translation, 478 n.2; supports A. Dohrn’s planned marine research station, 536

volcanoes: whether the result of subsidence or its agent, 156, 154

Voysey, Charles: potato cultivation, 341

Wagner, Moritz: CD responds to in Origin, 5th edition, 41 n.4, 47, 69 n.6, 140 & 141 n.4, 502 & 504 n.2, 544 n.4; ‘laws of migration’, 49 & 41 n.4, 68 & 69 n.6, 543 & 544 n.4, 547–8 & 549 n.6

wagtail. See Motacilla flava

Wahl, Anne de, 261 n.4

Wahl, George de, 261 n.4

Wächterer, C.A. and Gervais, P., 352 n.4, 353 n.3

Wallis, Henry, 365 & n.2

Wallace, Alexander: sexes of moths, 316

Wallace, Alfred Russel, 166 n.2 & 3, 167 n.1; answers CD’s ‘reasoning and reasonable’ critics, 447; attributes his ‘unscientific’ opinions on humans to experience of paranormal, 185 & n.6; Bethnal Green Museum, hopes to be appointed director of, 290 & n.8; CD admires Quarterly Review article on Lyell, 174–5, 196, 206 & n.5; CD believes he is unable to afford many books, 190; CD differs grievously from his expecting humans from laws of natural selection, xviii–xix, 175; CD ‘dreadfully disappointed’ by his views on human evolution, 206; CD encourages to write on distribution of animals and offers him his 1846 paper for reference, 448; CD enjoys review of J.J. Murphy, Habit and intelligence, 315 & 316 n.6; CD questions hypothesis that differences in colour would be the first sexual differences to appear in young birds, 150 & 151 n.14, 154; CD sends presentation copy of F. Müller, Facts and arguments for Darwin, 139; CD urges to claim credit for role in developing theory of natural selection, 175 & 176 n.6; Descent covers all points on which he and
Walsh, John Henry: ‘Bedlamite’, 334 & 336 n.6; ‘David’, 335 & 337 n.8
Waithner, Alexander, 263 n.5
wapti (Ceras canadensis), 140 & n.2, 154 & 155 n.3
warthog. See Phacochoerus
wasp: Euphaea lutifolia, 287 & n.3
Watson, Frederick: put together collection of game eggs for CD, 95
 waxwing: development of plumage, 154
Weale, James Philip Mansel, 244 n.10
Weber, Ernst Heinrich, 459 n.4
Wedgwood, Amy, 359 n.9
Wedgwood, Caroline Sarah, 597
Wedgwood, Clement Francis, 514 & 515 n.6; J.D. Hooker meets in St Peters burg, 261 & 262 n.17
Wedgwood, Emily, 514 & 515 n.6; J.D. Hooker meets in St Petersburg, 261 & 262 n.17
Wedgwood, Fanny, 597
Wedgwood, Hensleigh, 279 & 280 n.6
Wedgwood, Josiah I, 143; bequest to R.W. Darwin, 2 n.7; life, by E. Meteyard, 75 & 76 n.3
Wedgwood, Josiah III: house at Leith Hill Place, 337 n.6, 434 n.5, 597
Wedgwood, Sarah Elizabeth: J.B. Innes seeks to acquire Trotmer lodge for a parsonage, 445& 446 n.5
Weir, Harrison William: cited in desert, 153 n.2–3 & 5–6; reports to CD on colour of daisies and fecundity of rabbits, 216; sends CD information about proportion of sexes in various animals, 152–3
Weir, John Jenner, xvi, 60 n.1, 93 n.1, 269 n.1; cited in desert, 116 n.2, 247 n.2 & 3; CD finds himself perpetually quoting, 229; CD thanks for information, 205–6; CD very impressed with verification of Wallace’s theory of protective coloration, 229; crossing among finches, 247; differs from CD as to fertility of canary males, 246; larva eaten or rejected by insectivorous birds, paper read to Entomological Society, 115–16 & 116 n.2; migratory birds, whether male birds migrate first, 241–2, 245–6, 296; report of mare breeding with a quagga, 524 & 525 n.13; sends CD paper on insects and insectivorous birds, 201–2 & 202 n.2; Southdown sheep, black-faced lambs, 248–9
Weissman, August: morphological variation, 19 & n.2
Wellingham: E. Blyth considers to be identical with Sequia, 180 n.3
Westminster Review: CD willingly subscribes since Review has aided materially in spreading liberal opinions, 342
West Africa: women’s marriage preferences, 22, 24 & 25 n.5
