Preface	<i>page xi</i>
Acknowledgments	xv
<b>Part I Introduction to Biosurveillance</b>	
<b>1 Overview</b>	3
1.1 What Is Biosurveillance?	5
1.2 Biosurveillance Systems	10
1.3 Biosurveillance Utility and Effectiveness	15
1.4 Discussion and Summary	20
<b>2 Biosurveillance Data</b>	23
2.1 Types of Data	25
2.2 Types of Biosurveillance Data	26
2.3 Data Preparation	37
2.4 Discussion and Summary	50
<b>Part II Situational Awareness</b>	
<b>3 Situational Awareness for Biosurveillance</b>	55
3.1 What Is Situational Awareness?	57
3.2 A Theoretical Situational Awareness Model	57
3.3 Biosurveillance Situational Awareness	60
3.4 Extending the Situational Awareness Model: Situated Cognition	61
3.5 Discussion and Summary	64
<b>4 Descriptive Statistics for Comprehending the Situation</b>	67
4.1 Numerical Descriptive Statistics	70
4.2 Graphical Descriptive Statistics	84
4.3 Discussion and Summary	107

Contents

<b>5</b>	<b>Statistical Models for Projecting the Situation</b>	111
5.1	Modeling Time Series Data	114
5.2	Smoothing Models	118
5.3	Regression-Based Models	129
5.4	ARMA and ARIMA Models	138
5.5	Change Point Analysis	141
5.6	Discussion and Summary	145
<b>Part III Early Event Detection</b>		
<b>6</b>	<b>Early Event Detection Design and Performance Evaluation</b>	149
6.1	Notation and Assumptions	152
6.2	Design Points and Principles	154
6.3	Early Event Detection Methods Differ from Other Statistical Tests	157
6.4	Measuring Early Event Detection Performance	166
6.5	Discussion and Summary	175
<b>7</b>	<b>Univariate Temporal Methods</b>	178
7.1	Historical Limits Detection Method	182
7.2	Shewhart Detection Method	183
7.3	Cumulative Sum Detection Method	192
7.4	Exponentially Weighted Moving Average Detection Method	203
7.5	Other Methods	212
7.6	Discussion and Summary	215
<b>8</b>	<b>Multivariate Temporal and Spatio-temporal Methods</b>	218
8.1	Multivariate Temporal Methods	221
8.2	Spatio-temporal Methods	242
8.3	Discussion and Summary	248
<b>Part IV Putting It All Together</b>		
<b>9</b>	<b>Applying the Temporal Methods to Real Data</b>	253
9.1	Using Early Event Detection Methods to Detect Outbreaks and Attacks	257
9.2	Assessing How Syndrome Definitions Affect Early Event Detection Performance	268
9.3	Discussion and Summary	279
<b>10</b>	<b>Comparing Methods to Better Understand and Improve Biosurveillance Performance</b>	281
10.1	Performance Comparisons: A Univariate Example	285
10.2	Performance Comparisons: A Multivariate Example	295
10.3	Discussion and Summary	301

**Part V Appendices**

<b>A A Brief Review of Probability, Random Variables, and Some Important Distributions</b>	305
A.1 Probability	308
A.2 Random Variables	313
A.3 Some Important Probability Distributions	318
<b>B Simulating Biosurveillance Data</b>	335
B.1 Types of Simulation	337
B.2 Simulating Biosurveillance Data	343
B.3 Discussion and Summary	364
<b>C Tables</b>	366
References	381
Author Index	391
Subject Index	395
