

## Contents

<i>Foreword</i>	<i>page</i>	ix
<b>1 Basic properties of totally positive and strictly totally positive matrices</b>		1
1.1 Preliminaries		1
1.2 Building (strictly) totally positive matrices		5
1.3 Nonsingularity and rank		12
1.4 Determinantal inequalities		24
1.5 Remarks		33
<b>2 Criteria for total positivity and strict total positivity</b>		36
2.1 Criteria for strict total positivity		37
2.2 Density and some further applications		41
2.3 Triangular total positivity		47
2.4 <i>LDU</i> factorizations		50
2.5 Criteria for total positivity		55
2.6 “Simple” criteria for strict total positivity		60
2.7 Remarks		74
<b>3 Variation diminishing</b>		76
3.1 Main equivalence theorems		76
3.2 Intervals of strict total positivity		83
3.3 Remarks		85
<b>4 Examples</b>		87
4.1 Totally positive kernels and Descartes systems		87
4.2 Exponentials and powers		88
4.3 Cauchy matrix		92
4.4 Green’s matrices		94
4.5 Jacobi matrices		97

viii	<i>Contents</i>	
4.6	Hankel matrices	101
4.7	Toeplitz matrices	104
4.8	Generalized Hurwitz matrices	111
4.9	More on Toeplitz matrices	117
4.10	Hadamard products of totally positive matrices	119
4.11	Remarks	125
<b>5</b>	<b>Eigenvalues and eigenvectors</b>	127
5.1	Oscillation matrices	127
5.2	The Gantmacher–Krein theorem	130
5.3	Eigenvalues of principal submatrices	140
5.4	Eigenvectors	144
5.5	Eigenvalues as functions of matrix elements	149
5.6	Remarks	152
<b>6</b>	<b>Factorizations of totally positive matrices</b>	154
6.1	Preliminaries	154
6.2	Factorizations of strictly totally positive matrices	156
6.3	Factorizations of totally positive matrices	164
6.4	Remarks	167
	<i>Afterword</i>	169
	<i>References</i>	174
	<i>Author index</i>	180
	<i>Subject index</i>	182
