

Index

Please note that entries are numbered by paragraph, e.g. the “extended monkey method” can be found in paragraph 266 on page number 54.

- algebra 3
- base (of Rohlin tower) 178
- Bernoulli distribution 459
- Bernoulli system 459
- bounded time theorem 278
- bounded money theorem 278
- Chacon’s transformation 687
- code 442
- coded factor 442
- coding ϵ -well 590, 591
- column (of Rohlin tower) 181
- completion of measure space 10
- conditional entropy of partitions 416
- conditional expectation 115
- conditional expectation relative to a random variable 123
- conditional probability 115
- conditioned entropy 536
- conditioning property 398
- copy 569
- copy map 569
- copying n -distribution 578
- copying (P, T) to R 573
- countable generator theorem 199
- countable mod 0 191
- coupling 293
- coupling by induction 301
- cylinder set 18
- d bar distance 339, 594
- density function 97
- diagonal coupling 299
- ϵ -startover process 524
- entropy 427, 532
- entropy drop 600
- entropy of a partition 414
- ergodic decomposition 235
- ergodic system 136
- error set (of Rohlin tower) 178
- event 8
- expectation 94
- exponential number of words 362
- exponential size 362
- exponentially fat submeasure 468
- extended monkey method 266
- extension of a copy 580
- extension of a m.p. system 130
- extremal process 467
- f -distance 453
- factor 32, 130
- factor map 32
- f bar distance 454
- finitely determined system 464
- generation mod 0 12
- generic word 222
- gluing couplings 306
- homomorphism 32, 130
- identically distributed random variables 102
- IP limit 673
- IP-ring 671
- IP-set 653
- IP system 671
- independent concatenation 473
- independent coupling 295
- independent events 8
- independent process 148
- independent random variables 98
- induced measure 494
- induced transformation 447
- interpolation 397
- interval space 37
- invariant σ -algebra 132
- invertible m.p. system 127
- isomorphism 33, 131

174

joint density function 97

Kolmogorov system (K system) 651

land of P 596

Lebesgue measure 24

Lebesgue space 39

marginal probability 293

martingale 269

martingale convergence theorem 287

mean Hamming distance 332

measurable function 29

measurable ordered partition 341

measurable partition 65

measurable set 8

measurable space 8

measurable Zorn lemma 166

measure 7

measure-preserving transformation 29

measure-preserving system 127

mild mixing 655

monkey method 219

n -future 310

n -resembles up to ϵ 575

null set 8

ordered partition of 1 391

outer measure 14

(P, T) -process 151

partition entropy 393

premeasure 7

preprocess 99

probability space 8

process 99

reasonable name 383

Index

relative entropy 411

renewal theorem 327

rigid function 669

Rohlin tower 178

rung (of Rohlin tower) 178

same tail 311

σ -algebra 3

σ -algebra generated by family of sets 6

σ -algebra generated by measurable function 122

size of a submeasure 466

square lemma 371

staircase transformation 706

stationary 99, 255

stochastic process 263

stopping time 272

strong law of large numbers 210

strong mixing 655

STRV 272

submeasure 466

subsequential limit 128

superimposition of partitions 186

support of a cylinder set 18

symmetric difference 11

T, T^{-1} process 729

tailfield 310

transition probability 321

trivial algebra 385

trivial tail 316

upper density 652

variation distance 342, 345, 350

very weak Bernoulli system 462

weak mixing 655
