	Page
Preface	iv
1. Introductory	1
2. Weierstrass functions	15
3. Invariants and the modular function	40
4. The Jacobi functions	52
5. The Riemann surface and the integral of the first kind	82
6. Quasi-elliptic functions and integrals of the second and third kinds	93
7. The ternary elliptic functions	121
8. Transformations and modular relations	132
9. Trigonometric expansions	153
10. The theta functions	162
11. Elliptic curves	184
12. The plane cubic	199
13. Elliptic quartic curves	213
Historical Note	238
Bibliography	241
Index	244
