Preface	
J. F. Adams - Operations of the $n^{\text{th}}$ kind in K-theory, and what we don't know about $\mathbb{R}P^{\infty}$	1
Edgar H. Brown Jr. and Michael Comenetz - The Pontrjagin dual of a spectrum	11
Albrecht Dold - Algebraic K-theory of non-additive functors of finite degree	19
Luke Hodgkin - Dyer-Lashof operations in K-theory	27
J. R. Hubbuck - Homotopy homomorphisms of Lie groups	33
Ib Madsen and R. James Milgram - On spherical fiber bundles and their PL reductions	43
J. P. May - $E_{\infty}$ spaces, group completions, and permutative categories	61
Daniel Quillen - Higher K-theory for categories with exact sequences	95
Graeme Segal - Operations in stable homotopy theory	105
C. T. C. Wall - Equivariant algebraic K-theory	111
A. Zabrodsky - On rank 2 mod odd H-spaces	119
