

Index to page heading

- Affine group 59, 89
 Axiom of choice 7
 'Basis conditions' 13
 Basis for open sets 12
 Bounded above 7
 Category 2
 Categorical concept of product 6
 Chain 7
 Closed map 11
 set 11
 Closure 34, 36
 Compact space 42
 , sequentially 43
 Completely reducible module
 (representation) 93
 Complex representation 92
 Component 36
 Cone over an inverse system 51
 Connected space 35
 Continuous function 3
 Continuity, uniform 67
 Convex cone (open) 70
 Convolution 86
 Coordinate, i -th 6
 projection, i -th 6
 Correspondence between sets 5
 Coset space G/H , left 20
 Degree of representation 92
 Dense subset 23
 Dieudonné's proposition 74
 Difference kernel 30
 Disconnected, totally 36
 Disconnection of a space 35
 Eigenfunction 96
 Equivalence relation 5
 Equivalent representations 92
 $(f:F)$ 66
 Faithful representation 93
 Fibre of a set-function 5
 Filter in a lattice 46
 Finite intersection property 43
 Fubini's theorem 78
 Fundamental system of neighbour-
 hoods 26
 Fundamental system of open neigh-
 bourhoods of x 26
 'Fundamental system of open neigh-
 bourhood conditions' 27
 'Fundamental system of open neigh-
 bourhood subgroup conditions' 28
 G -module 64, 92
 Group, affine 59, 89
 , general linear 16
 , orthogonal (O_2) 18
 (O_n) 41, 91

- Group, profinite 52, 91
 , projective linear 22
 , topological 16
 , unimodular 79
- Haar, right, integral 64
 , measure 84
- Hausdorff space 30
- Homeomorphism 4
- Homogeneous space 19
- Ideal of a lattice 45
 , proper 10
- Identification topology 10
- Inclusion map 11
- Induced integral 84
- Induced topology 9
- Inductively ordered set 7
- Integral, positive 63
 , right Haar 64
- Interior point 26
- Inverse limit of an inverse system 51
 system in \mathcal{C} 51
- Irreducible module 93
- Isomorphism in a category 4
- $\mathcal{K}(\mathbf{X})$ 61
- $\mathcal{K}_+(\mathbf{X})$ 62
- Kernel of a set function 5
 of a group morphism 8
- Left modular function 80
 multiplication in a topological group 19
 quotient space G/H 20
 translation 19
- \lim_{\leftarrow} 51
- Limit, inverse 51
 , projective 51
- Locally closed subspace 59
 compact space 55
- Maximal element of a set 7
- Measure, right Haar 84
- Modular function, right 79
- Morphism in a category 2
 of cones 51
 of topological groups 18
- Neighbourhood 26
- Normalised Haar integral 80
- Null-function 84
- Open map 11
- Orthogonal group (O_2) 18
 (O_n) 41
- p-adic integers 54
 numbers 60
 topology 18
 valuation 18
- Partially ordered set 7
- Path-connected 40
- Peter-Weyl Theorem 100
- Positive integral 63
- Product, categorical 6
 of morphisms 15
 of topological groups 25
 topology 13, 14
- Profinite group 52, 91
- Projection, i-th coordinate 6
- Projective general linear group 22

- Projective limit of an inverse system 51
 n-space, real 45
- Proper ideal of a lattice 46
- Quotient 5
 group of topological group 20
 map 5, 11
 topology 10
- Real projective n-space 45
- Reducible, completely 93
- Regular representation 93
 space 31
- Representation, equivalent 92
 , faithful 93
 , regular 93
 of a topological group 92
- Right Haar integral 64
 measure 84
 modular function 79
 translate of A 19
- Semi-simple module 93
- Separating 2 compact sets by a compact set 62
- Sequentially compact 43
- Simple module 93
- Small subgroups 98
- Space, left quotient, G/H 20
- Sphere, S^n 10
- 'Standard argument' for universal properties 6
- Stronger topology 9
- Sub-basis for a topology 13
- Subspace topology 9
- Summable function 83
- Support of a function 61
- Symmetric neighbourhood of e 27
- T_0 -space 31
- T_1 -space 29
- T_2 -space 29
- Topology, discrete 9
 , identification 10
 , induced 9
 , metric 9
 , p-adic 18
 , product 14
 , quotient 10
 , stronger 9
 , subspace 9
 on a set 3
 , trivial 9
 , Tychonoff 14
 , weaker 9
- Topological group 16
- Torus, T^n 14
- Totally disconnected 36
 ordered set 7
- Translate, right 19
- Translation, left, right 19
- Tychonoff theorem 45
 topology 14
- Ultrafilter 46
- Uniform approximation theorem 74
 continuity 67
- Unimodular group 79
- Unitary representation 93
- Urysohn's lemma 62
