Introduction	vii
Notations	viii
Elementary results	1
1. Baer's Theorem	3
2. A theorem of Blackburn	5
3. A theorem of Bender	7
4. The Transitivity Theorem	10
5. The Uniqueness Theorem	12
6. The case $ \pi(\mathbf{F}(\mathbf{H})) = 1$	18
7. The proof of the Uniqueness Theorem 5.1	20
8. The Burnside $p^a q^b$ -Theorem, p, q odd	30
9. Matsuyama's proof of the $p^a q^b$ -Theorem, $p = 2$	31
10. A generalization of the Fitting subgroup	34
11. Groups with abelian Sylow 2-subgroups	38
12. Preliminary lemmas	40
13. Properties of A^* -groups	47
14. Proof of the Theorem A, Part I	53
15. Proof of the Theorem A, Part II	67
Appendix: p -constraint and p -stability	80
References	85
