

Contents

	Page
Preface	vii
1. Choquet Theory	1
2. Classes of Representing Measures	22
3. The Algebra $R(K)$	34
4. The Corona Problem for Riemann Surfaces	46
5. Subharmonicity with Respect to a Uniform Algebra	54
6. Algebras of Analytic Functions	83
7. The Conjugation Operation for Representing Measures	107
8. The Conjugation Operation for Jensen Measures	129
9. Moduli of Functions in $H^2(\sigma)$	146
List of Notation	156
Index	158
