

Index

(Introduction not included)

- absolute hull, 53, 54
- affine coordinate ring, 173, 201, 219
- affine order, 41
- Archimedean closed subfield, 140
- Archimedean extension, 138, 139
- Artin, E., 42, 100, 122, 130, 131, 187, 188, 196
- associated primes, 59, 60, 61, 73, 95, 96
- bounded filter, 235
- center of a filter, 235
- closed semi-algebraic set, 163, 172, 201
- closed, semi-algebraic set, 164, 215, 219, 220, 258
- closure of a set, 163
- codimension, 212, 213
- Cohen, P., 42, 165, 268
- concave multiplicative set, 83, 93
- connected semi-algebraic set, 249, 257, 262
- continuous sections of a sheaf, 115, 116, 117
- continuous semi-algebraic function, 252, 253, 255, 256, 257
- contraction of an order, 35
- convex set, 33
- convex hull, 46, 47
- Dedekind cuts, 137, 138
- degenerate points, 197
- derived order, 39, 42, 64, 81, 97, 98, 188, 199, 200
- derived set, 36, 37, 38, 39
- dimension, 212, 219
- direct limit, 103, 105
- Dubois, D., 187
- Efroymsen, G., 216, 227, 272
- elementary sentence, 268
- extension of an order, 35, 40, 120, 121, 122, 130
- Fat City, 219
- fibre product, 101
- fibre sum, 102, 104, 105
- filter, 43, 233
- filter at infinity, 235
- formally real field, 34, 149
- Hilbert, D., 189
- Hilbert 17th problem, 42, 188
- ideal
 - absolutely convex, 52, 53, 54, 55, 88, 89, 156
 - convex, 45, 46, 52, 81
 - maximal convex, 49, 50, 63, 87, 93, 167, 185
 - minimal prime, 58, 60, 91, 92, 108
 - primary convex, 57, 64, 74, 75, 82, 89, 94
 - prime convex, 49, 51, 63, 66, 74, 90, 93, 127, 186
- Jacobson radical, 85, 86, 99
- Krull dimension, 224, 225
- Krull, F., 139, 149, 150
- Krull valuation, 146
- Lang, S., 130, 184
- localized order, 77, 79, 80, 81, 82, 111, 112, 113
- maximal order, 33, 37, 38, 39, 44
- morphism, 32
- Nash functions, 265
- nil radical, 37, 46, 47, 48, 51, 90, 167
- Noetherian-Grothendieck topology, 248, 252
- non-degenerate points, 197, 198, 199, 201, 202, 215, 218
- open semi-algebraic set, 163, 164
- open, semi-algebraic set, 164
- order, 32
- partially ordered ring, 32
- partition of unity, 44
- polynomial relation, 268
 - (POR), 32, 34
 - (PORCK), 33, 34, 55, 56, 88, 110, 114, 117, 119
 - (PORNN), 33, 34, 56
 - (PORPP), 33
- prefilter, 233, 234
- product order, 44

- psemi-algebraic function, 269, 270
 272
- quotient order, 45, 52, 56, 58, 81,
 201, 202
- rank, 213
- real closed field, 130, 131, 132, 134
 135
- refinement of an order, 33, 80, 81
 96, 97, 150, 151, 157, 189
- RHJ algebra, 167, 168, 169, 170, 171,
 199, 200, 201, 202, 219
- Risler, J. J., 187
- Schreier, O., 122, 130, 131
- semi-algebraic set, 162, 268
- semi-field, 49, 50, 85
- semi-integral extension, 126, 127
 154, 155, 170
- semi-Noetherian ring, 57, 58, 95, 96
- shadow of a set, 83, 84
- shadow of 1 , 84, 88
- sheaf of partially ordered rings,
 41, 112, 249
- signed place, 145, 148, 161, 184, 186
 190, 206, 228, 242
- simple point, 213, 215
- simple refinement, 36, 37
- simplicial complex, 43, 69
- split valuation, 147
- Stengle, G., 100, 173, 189, 193, 195, 196
- strong Ψ -chain, 225, 226, 228, 231
- strong topology, 247
- structure sheaf
 rational, 248, 250
 semi-algebraic, 248, 252, 259
 smooth, 248, 262, 265
 Zariski, 112, 115, 116, 249
- Sturm algorithm, 135, 136
- symbolic powers, 89, 95
- Tarski-Seidenberg theorem, 163, 164,
 165, 203, 206, 207, 215, 233,
 258, 268, 271
- total order, 37, 64, 141, 143, 145, 156,
 178, 234, 238
- ultrafilter, 233, 234
- valuation, 146, 242
- valuation ring, 139, 149, 152
- weak order, 33, 168
- weak Ψ -chain, 224, 227
- Whitney, H., 261
- Zariski dense set, 43, 238
- Zariski, O., 244
- Zariski topology, 106, 107, 108, 109,
 110
- zero divisors, 42, 60, 91, 92
