- trivial topology 51
- type of a tensor 230, 254
- umbilic point 222
- $U(n)$, unitary group 300
- unimodular linear transformation 93
- union of sets 24
- unit vector 167
- unitary matrix 206, 300
- usual topology on \mathbb{R} , \mathbb{R}^m 51, 52
- valence of a tensor 194, 254
- vector 25
 - bound 1
 - bundle 357
 - algebraic constructions with 358
 - calculus 1, 182
 - identities in 186
 - differences between usage of in mathematics and physics 1
 - field 54, 252
 - along a curve 46
 - as cross-section 341
 - as differential operator 72
 - covariant derivative of 48, 226, 271
 - Lie derivative of 68, 253
 - fields related by a smooth map 75, 254
 - free 1
 - space 25
 - of multilinear maps 102
- vector-valued form 280
 - function 280
- vertical endomorphism 332
- lift 330
 - subspace 329, 376
 - vector, vector field 329, 363
- vertex of a parallelepiped 86
- volume 85
 - as base area times height, generalised 101, 171
 - as alternating multilinear form 90
 - form 129
 - related to a scalar product 171
 - function, axioms for 87
 - transformation of 92
- Weingarten map 222
- Weyl conformal curvature tensor 294
- Whitney sum 359
