

CONTENTS

0. The background: vector calculus	1
1. Affine spaces	8
2. Curves, functions and derivatives	29
3. Vector fields and flows	53
4. Volumes and subspaces: exterior algebra	85
5. Calculus of forms	117
6. Frobenius's theorem	140
7. Metrics on affine spaces	164
8. Isometries	188
9. Geometry of surfaces	216
10. Manifolds	236
11. Connections	268
12. Lie groups	298
13. The tangent and cotangent bundles	327
14. Fibre bundles	353
15. Connections revisited	371
