Subject index

- acetyl perchlorate, 131
acids, purification of, 132
acrylonitrile, see methyl cyanide
adsorptive capacity, 125
adsorptive strength, 125
‘Against the Laws of Physics’, 15
aluminium bromide, 79, 129, 136
anionic polymerisation, 82, 120, 122
annealing, 20
antimony pentafluoride, 42, 67, 153
aroyl salts, 95
- backing pump, see pump, backing
Biddulph–Plesch reaction calorimeter,
109, 138
binary ionogenic equilibrium, 106
BiPl valve, 44
black wax repairs, 61
boron trifluoride, 40, 131
etherate, co-catalysis with, 131
Bourdon gauge, 50
Bowden cable, 113
break seals, magnetic, 22, 44
calibrated, 80, 81
burettes, standing, various, 68–72
hanging, 72
- calcium hydride, test for purity of, 140
calibration of bulbs, 84
electrodes, 98
purity tests, 134, 137
carbon tetrachloride for calibration, 84
water in, 119
Cheops’ Law, 5
Clausius–Clapeyron equation, 15
cleaning glassware by heating, 20, 120
glass tubes for phials, 75
vacuum line, 39, 120, 155
closed systems, physical chemistry of,
13
cold cathode gauge, 56
finger, 18, 38, 110
traps, 13, 15, 36
conductance electrodes, 90, 91, 92,
98–102, 107, 108
calibration of, 98
- conductance of vacuum line, 11
conductivity units, 103
of living polystyrene, 155
probes, 99, 100
test for purity, 136
cooling techniques, 17, 37
crystallisation, 122, 123, 132, 133,
147
- degassing manometer fluids, 52
degassing tap grease, 40
depression of melting point, 134
dichloromethane, see methylene
chloride
dilatometers, dilatometry, 85–93
distillation *in vacuo*, 16
molecular, 18
dosing bulbs, 84
dry-bag, 5
box, 5
valve, 47, 87
drying, 120, 126. See also ‘cleaning’
and ‘water, removal of’
agents, soluble, 142
- electrolysis, purification by, 129
preparation by, 103, 150
electron transfer reactions, 156
enthalpy of formation of metal halides,
161
reaction, 85, 104, 161
vapourisation, 15, 16
explosion hazard, 25
- Fairbrother separator, 47
fractional precipitation, 133
freeze valve, 18, 35
seal, see freeze valve
- gas bag, see dry-bag, 6
gas blanket, 5
glove-box, see dry-box
gold wire seals, 24
graded seals, 96, 98, 107
greases, see tap greases
greasing taps, 40, 41

- kinetic test of purity, 136
Krummenacher reactor, 105
valve, 63
- laws of experimentation, 5
lead wire seals, 24
leaks, see pinholes
liquid–liquid extraction, 133
lithium films, 148
living polystyrene, 155
lubricants for taps, see tap greases
- magnetic break-seals, 44
dry valve, 47
manometers, mercury and oil, 52
ranges of different, 49
U-tube, 52
McLeod gauge, 53
melting point depression, 134
metal wire seals, 24
methyl bromide, 129, 136, 140
methyl cyanide, impurities in, 117, 118
methylene chloride, impurities in, 117, 136
2-methylpropene, see isobutene
mid-point method, 73
molecular sieves, effects on solvents, 141, 142
Murphy's Law, 5, 19, 61
- NMR reference compounds, 97
tubes, preparation of, 97
- oxacyclic monomers, 149, 159
oxygen, condensation of, 25, 37
residual, 6
- Pask–Plesch reaction calorimeter, 109, 110
- perchlorates, dangers of, 141
phase-diagram, 14, 113, 156
phosphorus pentoxide, 129
photopolymerisable monomers, 69, 70
pinholes, 19, 21, 23, 60
Pirani gauge, 53
PLADE-C, electrode, 100
PIEgli valve, 63
polymerisation
anionic, 95, 120
charge-transfer, 131
of heterocyclic monomers, 149, 159
N-vinylcarbazole, 88, 131, 136
4-phenyldioxolan, 104
styrene, 90–92, 136, 138, 154
powders, evacuation of, 39
p.p.m. and p.p.b., 119
pressure gauges, see manometers
pressure hazard, 15, 153
pressure transducer, 50
'proton sponge', 131
pseudo-Dewar vessel, 109, 110
pump, backing, 31, 32, 33, 35
pumping efficiency, see pumping speed
speed, 11, 32–6
theory of, 10
purification of solvents, 28
purity
determination of, by
electrical methods, 135
kinetic tests, 136
separation, 135
spectroscopy, 134
thermal methods, 134
variation of, 117
- reaction calorimetry, 109
reference compounds for NMR
spectroscopy, 97
repairs, temporary, 61
