

GENERAL INDEX

Ordinary type indicates pages, **bold type** catalogue entries.

The index covers mainly personal names and place names together with exceptional denominations (e.g. *pegione*, *bagattino*, etc.) and references to specific issues of individual mints. It does not cover more generic references to denominations such as *denaro* and *grosso* except where such terms are explained. Personal and place names are given in the forms and spellings used in the text, with cross-references where Latin or other forms diverge appreciably from these. Persons of the same name are placed in the customary sequence of saints, popes, emperors, sovereigns in alphabetical order of the states they ruled, and others in whatever order seems best adapted for easy reference. Names of modern scholars, and names in the section ‘Collectors, dealers and donors’ that precedes the main catalogue, have not been indexed. Coin hoards and finds are indexed in alphabetical order by find type under the heading coin finds.
