

Contents

Preface	vii
Part I Product forcing	1
1 Forcing and Boolean-valued models	2
2 Properties of the generic extension	7
3 Examples of generic reals	13
4 Product forcing	23
5 Examples of product forcing	27
6 The Lévy collapse	35
7 Product measure forcing	38
Part II Iterated forcing	43
1 Two step iteration	44
2 Finite support iteration	50
3 Martin’s Axiom	53
4 Suslin’s problem	56
5 Whitehead’s problem	59
6 Kaplansky’s conjecture	61
7 Countable support iteration	67
8 Borel’s conjecture	73
Part III Proper forcing	79
1 Stationary sets	80
2 Infinite games on complete Boolean algebras	89
3 Proper forcing	95
4 Examples of proper forcing	100
5 Iteration of proper forcing	103
6 The Proper Forcing Axiom	111
7 Martin’s Maximum	115
8 Well-founded iteration	126
Bibliography	131
Index of symbols	133
Subject index	134
Author index	136
