

INDEX

Adamsom cohomology group	122	$C^1(\Gamma, M)$	34
Albert's Criterion	87	$C^2(\Gamma, M)$	93
Albert's Main Theorem	110	centralizer	40
algebra	25	Centralizer Theorem	42
Clifford -	105	central simple algebra	29
cyclic -	49	Clifford algebra	105
Galois -	37	conjugation (in cohomology)	100
p- -	106	corestriction (in cohomology)	101
PI- -	122	corestriction (of algebras)	53
quaternion -	78, 84	crossed product	94
algebra homomorphism	25	Crossed Product Theorem	96
Alkohol	1	cup product	96
alternating group	142	cyclic algebra	49
Amitsur cohomology group	122		
antiautomorphism	112	Dedekind's Lemma	33
Artinian module	8	Dickson's Theorem	91
Artin-Schreier Theorem	63	Dieudonné determinant	135
Artin's Lemma	33	dihedral group	142
Artin-Whaples Theorem	28		
		Eichler's Norm Theorem	165
$B^1(\Gamma, M)$	34	elementary matrices	8
$B^2(\Gamma, M)$	93	elementary operations	9
balanced map	18	exponent (of an algebra)	66
bimodule	22		
Brauer group	61	flat module	21
relative -	61	formally real field	105
Bruhat normal form	131	Frobenius' Theorem	73
strict -	128		

			181
Galois algebra	37	maximal commutative subfield	45
Galois module	36	maximal commutative subring	40
Γ -module	33	Mazur–Gelfand Theorem	123
General Merkur'ev-Suslin Theorem	121	Merkur'ev-Suslin Theorem	119
global field	123	General -	121
Grunwald Theorem	125	metabelian field extension	65
Grunwald-Wang Theorem	125	module	8
		Artinian -	8
$H^{-1}(\Gamma, M)$	161	bi -	22
$H^0(\Gamma, M)$	34	flat -	21
$H^1(\Gamma, M)$	34	Γ - -	33
$H^2(\Gamma, M)$	93	Galois -	36
Hasse-Schilling-Maaß Theorem	165	Noetherian -	8
Hilbert's "Satz 90"	35	projective -	16
Hochschild-Serre spectral sequence	62	Noetherian module	8
Hochschild's Theorem	110	Noether's Equations	34
ideal	8	norm (of a Γ -module)	33
idempotent	14	norm (of an algebra)	143
index (of an algebra)	59	reduced -	145
index reduction factor	67	norm residue class group	34
inflation (in cohomology)	97	norm residue homomorphism	83
involution (of a ring)	112	opposite ring	27
inverse ring	27	ordinary quaternions	3
irreducible module	8	Ostrowski's Second Theorem	123
Jančevskii's Lemma	172	p-algebra	106
$K_1(A)$	137	perfect group	140
$K_2(K)$	82	permutation matrix	9
Köthe's Theorem	64	PI-algebra	122
		power norm residue algebra	78
Laurent series	5	projective module	16
linear extension	27	Pythagorean field	105
local field	123	quadratic form	105
Matsumoto's Theorem	83	quaternion	3

			182
quaternion algebra	78, 84	Tate's Reciprocity Lemma	88
quaternion group	3	tensor product (of modules)	18
		tensor product (of algebras)	25
real quaternions	3	tower formulae	144
reasonable field	163	reduced -	150
reduced degree	59	trace (of an algebra)	143
- norm	145	reduced -	145
- norm residue group	155	$UK_1(A, I)$	172
- tower formulae	150	unitary Whitehead group	172
- trace	145	$USK_1(A, I)$	172
- unitary Whitehead group	172	Vaserstein's Lemma	171
- Whitehead group	155	Wang's Theorem	166
relative Brauer group	61	Wedderburn's Main Theorem	15
restriction (in cohomology)	99	Wedderburn's Theorem	73
Riehm's Theorem	118	Whitehead group	137
Rosset's Theorem	90	reduced -	155
Rosset-Tate Theorem	89	Whitehead Lemma	137
Scharlau's Criterion	116	Witt's Theorem	110
Scharlau's Lemma	115		
Scharlau's Theorem	116		
semisimple ring	11		
$SH^0(A)$	155		
similar	60		
simple module	8		
simple ring	11		
$SK_1(A)$	155		
skew field component	59		
K-skew field	29		
Skolem-Noether Theorem	38		
soluble field extension	65		
splitting field	61		
strict Bruhat normal form	128		
supernatural number	67		
symbol (in K-Theory)	83		
Tannaka-Artin Problem	167
