

# Contents

Foreword by <i>J. A. Barnes</i>	<i>page</i> ix
Acknowledgments	xiii
<b>1 Graph theory and anthropology</b>	<b>1</b>
Graphs informally	3
Advantages of graphical models	9
Implicit and explicit structural models	12
<b>2 Graphs</b>	<b>14</b>
Basic definitions	16
Trees	19
Blocks	26
Centrality	30
<b>3 Signed graphs</b>	<b>40</b>
Coloring of a graph	41
Coloring of a signed graph	42
Structural balance	44
“Positive and negative relations”	53
Clustering	56
<b>4 Digraphs</b>	<b>65</b>
Definitions	68
Relations	70
Axiomatization of relations	74
Acyclic digraphs	80
Semilattices	85
Cyclic structures	89
Connectedness	92
<b>5 Graphs and matrices</b>	<b>93</b>
The adjacency matrix	95
Matrix operations	101

*Contents*

The reachability matrix	106
The distance matrix	109
<b>6 Structural duality</b>	<b>114</b>
Duality	116
Structural duality	117
Marked graphs	129
<b>7 Networks</b>	<b>132</b>
Networks and matrices	133
Reachability in networks	134
Flows in networks	139
Markov chains	145
<b>8 Graphs and groups</b>	<b>151</b>
Group models	153
Groups	154
Klein groups	157
“Multiplicative groups”	162
Larger groups	166
Conclusion	170
Appendix: Axiomatics	171
References	183
Index	195
