

## INDEX

- affine transformation 1, 34  
 almost effective 31  
 almost Kähler 87  
 anti-self-duality 116  
 anti-self-dual homogeneous structures 118  
 anti-self-dual 2-forms 117  
  
 canonical connection 20  
 Cayley Heisenberg group 96  
 commutative space 106  
 complete Killing vector field 2  
 composition algebra 96  
 (-)-connection of Cartan-Schouten 11, 83  
 connection invariant under parallelism 15  
 curvature form 27, 31  
  
 D'Atri space 105  
 divergence-preserving geodesic symmetry 105  
  
 effective 13  
 equations of Ambrose-Singer I  
  
 four-symmetric space 88, 112  
 free action 6  
 fundamental vector field 7  
  
 generalized Heisenberg group 94, 95  
 group of transvections 32  
 group of type H 94,95  
  
 harmonic space 106  
 Heisenberg group 63, 72, 96  
 Hodge star operator 117  
 holonomy algebra 31  
 holonomy bundle 26  
 holonomy group 26  
 homogeneous Riemannian manifold 13  
 homogeneous Riemannian structure 33  
     - of type  $\tilde{J}$  40  
 horizontal curve 6  
 horizontal space 7  
 horizontal vector 6  
 hyperbolic plane 44  
 hyperbolic space 49, 89  
  
 infinitesimal connection 7, 23  
 infinitesimal isometry 2  
 invariant connection 23  
 isometry group 2  
 isomorphic homogeneous Riemannian structure 33  
 isotropy subgroup 14  
  
 Killing form 17  
 Killing vector field 2

- k-symmetric space 85
- Lie algebra of type H 95
- Lie derivative 2
- locally homogeneous 14, 33
- naturally reductive 56
- naturally reductive metric 56
- naturally reductive homogeneous manifold 57
- nearly Kähler 86
- parallel transport 3
- Poincaré half-plane 44
- Poincaré half-space 54
- principal bundle of orthonormal frames 5
- projectively equivalent connections 70, 71
- quadratic invariants 38
- quasi-Kähler 85
- quaternionic Heisenberg group 96
- reductive decomposition 57
- reductive homogeneous space 20, 32, 57
- Riemannian submersion 8
- rigid connection 16, 17
- self-duality 116
- self-dual homogeneous structure 118
- self-dual 2-form 117
- standard horizontal vector field 7
- three-symmetric space 85, 111
- torsion 16
- torsion form 27, 31
- transitive 13
- two-fold vector cross product 98
- unimodular algebra 65
- unimodular Lie group 83
- vertical space 7
- volume of geodesic balls 69, 70
- volume-preserving geodesic symmetry 105
- Weyl tensor 116
