CONTENTS

| | |
|--|-----|
| CHAPTER ONE - PRELIMINARIES..... | 1 |
| 1. Topological vector spaces..... | 1 |
| 2. Metric linear spaces..... | 2 |
| 3. Locally bounded spaces..... | 6 |
| 4. Linear operators and the closed graph theorem..... | 8 |
| 5. Bases and basic sequences..... | 12 |
| CHAPTER TWO - SOME OF THE CLASSICAL RESULTS..... | 15 |
| 1. Introduction..... | 15 |
| 2. The L_p spaces..... | 16 |
| 3. The ℓ_p spaces..... | 20 |
| 4. The Banach envelope..... | 27 |
| 5. Orlicz function spaces and sequence spaces..... | 28 |
| CHAPTER THREE - HARDY SPACES..... | 33 |
| 1. Introduction | 33 |
| 2. Linear topological properties of H^p , $0 < p < 1$...37 | |
| 3. The Banach envelope of H^p | 40 |
| 4. PCWD subspaces of H^p | 47 |
| CHAPTER FOUR - THE HAHN-BANACH EXTENSION PROPERTY..... | 59 |
| 1. Introduction..... | 59 |
| 2. Basic sequences and the Hahn-Banach extension property..... | 63 |
| 3. The construction of PCWD subspaces..... | 74 |
| 4. Containing Banach spaces..... | 76 |
| CHAPTER FIVE - THREE SPACE PROBLEMS..... | 81 |
| 1. Introduction; K-spaces..... | 81 |
| 2. Quasi-linear maps and K-spaces..... | 85 |
| 3. The spaces ℓ_p and L_p for $0 < p < 1$ | 91 |
| 4. The Ribe space..... | 95 |
| 5. The space ℓ_p for $1 < p < \infty$ | 98 |
| CHAPTER SIX - LIFTING THEOREMS..... | 109 |
| 1. Introduction..... | 109 |
| 2. Lifting theorems for L_0 | 110 |
| 3. Lifting theorems for L_p when $0 < p < 1$ | 115 |
| 4. Applications..... | 118 |

| | |
|---|-----|
| CHAPTER SEVEN - TRANSITIVE SPACES AND SMALL OPERATORS..... | 122 |
| 1. Introduction..... | 122 |
| 2. Transitive spaces..... | 123 |
| 3. Strictly singular endomorphisms..... | 132 |
| 4. Compact operators on spaces with trivial dual..... | 140 |
| 5. Operators on L_p | 147 |
| 6. A rigid space..... | 155 |
| CHAPTER EIGHT - OPERATORS BETWEEN L_p SPACES, $0 < p < 1$ | 164 |
| 1. Introduction..... | 164 |
| 2. Operators between L_0 spaces..... | 165 |
| 3. Operators between L_p spaces, $0 < p < 1$ | 179 |
| CHAPTER NINE - COMPACT CONVEX SETS WITH NO EXTREME POINTS. | 198 |
| 1. Preliminary remarks..... | 198 |
| 2. Needle point spaces contain compact convex sets with no extreme points..... | 203 |
| 3. Needle point spaces..... | 207 |
| 4. Open questions..... | 216 |
| CHAPTER TEN - NOTES ON OTHER DIRECTIONS OF RESEARCH..... | 220 |
| 1. Vector measures..... | 220 |
| 2. Operators on spaces of continuous functions..... | 222 |
| 3. Tensor products..... | 223 |
| 4. The approximation problem..... | 223 |
| 5. Algebras..... | 223 |
| 6. Galbs..... | 224 |
| LIST OF REFERENCES..... | 226 |
| GLOSSARY OF TERMS..... | 238 |
