<i>Preface</i>	ix
<b>I Sobolev spaces</b>	<b>1</b>
<b>§1 Notation, basic properties, distributions</b>	<b>1</b>
1.1 <i>Notation</i>	1
1.2 <i>Partition of unity</i>	4
1.3 <i>Regularisation of functions</i>	8
1.4 <i>Distributions</i>	10
1.5 <i>The support of a distribution</i>	12
1.6 <i>Differentiation and multiplication</i>	14
1.7 <i>Distributions with compact support</i>	18
1.8 <i>Convolution</i>	20
1.9 <i>The Fourier transformation</i>	25
<b>§2 Geometric assumptions for the domain <math>\Omega</math></b>	<b>35</b>
2.1 <i>Segment and cone properties</i>	36
2.2 <i>The <math>N^{k,\kappa}</math>-property of <math>\Omega</math></i>	38
2.3 <i><math>(k, \kappa)</math>-diffeomorphisms and <math>(k, \kappa)</math>-smooth <math>\Omega</math>s</i>	47
2.4 <i>Normal transformations</i>	52
2.5 <i>Differentiable manifolds</i>	58
<b>§3 Definitions and density properties for the Sobolev–Slobodeckii spaces <math>W^l_2(\Omega)</math></b>	<b>61</b>
3.1 <i>Definition of the Sobolev–Slobodeckii spaces <math>W^l_2(\Omega)</math></i>	61
3.2 <i>Density properties</i>	64
<b>§4 The transformation theorem and Sobolev spaces on differentiable manifolds</b>	<b>74</b>
4.1 <i>The transformation theorem</i>	75
4.2 <i>Sobolev spaces on differentiable manifolds, and on the frontier <math>\partial\Omega</math> of a <math>(k, \kappa)</math>-smooth region</i>	87
<b>§5 Definition of Sobolev spaces by the Fourier transformation and extension theorems</b>	<b>90</b>
5.1 <i>Sobolev spaces and the Fourier transformation</i>	91
5.2 <i>Extension theorems</i>	95
<b>§6 Continuous embeddings and Sobolev’s lemma</b>	<b>105</b>

<b>§7 Compact embeddings</b>	<b>112</b>
<b>§8 The trace operator</b>	<b>120</b>
<b>§9 Weak sequential compactness and approximation of derivatives by difference quotients</b>	<b>133</b>
<b>II Elliptic differential operators</b>	<b>139</b>
<b>§10 Linear differential operators</b>	<b>139</b>
<b>§11 The Lopatinskiĭ–Šapiro condition and examples</b>	<b>148</b>
11.1 <i>The Lopatinskiĭ–Šapiro condition</i>	148
11.2 <i>Examples</i>	157
<b>§12 Fredholm operators</b>	<b>165</b>
12.1 <i>The Riesz–Schauder spectral theorem (compact operators)</i>	165
12.2 <i>Fredholm operators</i>	168
12.3 <i>A priori estimates, the Weyl lemma and smoothable operators</i>	180
<b>§13 The main theorem and some theorems on the index of elliptic boundary value problems</b>	<b>186</b>
13.1 <i>The main theorems for elliptic boundary value problems</i>	186
13.2 <i>The index and spectrum of elliptic boundary value problems</i>	209
<b>§14 Green’s formulae</b>	<b>213</b>
14.1 <i>Normal boundary value operators and Dirichlet systems</i>	214
14.2 <i>The first Green formula</i>	219
14.3 <i>Adjoint boundary value operators and boundary value spaces</i>	222
14.4 <i>The second Green formula</i>	231
14.5 <i>The antidual operator <math>L'</math> and the adjoint boundary value problem</i>	235
<b>§15 The adjoint boundary value problem and the connection with the image space of the original operator</b>	<b>239</b>
<b>§16 Examples</b>	<b>252</b>
<b>III Strongly elliptic differential operators and the method of variations</b>	<b>261</b>
<b>§17 Gelfand triples, the Lax–Milgram theorem, <math>V</math>-elliptic and <math>V</math>-coercive operators</b>	<b>261</b>
17.1 <i>Gelfand triples</i>	261
17.2 <i>Representations for functionals on Sobolev spaces</i>	268
17.3 <i>The Lax–Milgram theorem</i>	271
17.4 <i><math>V</math>-elliptic and <math>V</math>-coercive forms, solution theorems</i>	273
17.5 <i>The Green operator</i>	275
17.6 <i>The concepts <math>V</math>-elliptic and <math>V</math>-coercive for differential operators</i>	279
<b>§18 Agmon’s condition</b>	<b>280</b>
<b>§19 Agmon’s theorem: conditions for the <math>V</math>-coercion of strongly elliptic differential operators</b>	<b>290</b>
19.1 <i>The theorems of Gårding and Agmon</i>	290
19.2 <i>Examples, including the Dirichlet problem for strongly elliptic differential operators</i>	302

<b>§20</b>	<b>Regularity of the solutions of strongly elliptic equations</b>	<b>307</b>
<b>§21</b>	<b>The solution theorem for strongly elliptic equations and examples</b>	<b>336</b>
<b>§22</b>	<b>The Schauder fixed point theorem and a non-linear problem</b>	<b>361</b>
<b>§23</b>	<b>Elliptic boundary value problems for unbounded regions</b>	<b>370</b>
<b>IV</b>	<b>Parabolic differential operators</b>	<b>376</b>
<b>§24</b>	<b>The Bochner integral</b>	<b>376</b>
24.1	<i>Pettis' theorem</i>	376
24.2	<i>The Bochner integral</i>	384
<b>§25</b>	<b>Distributions with values in a Hilbert space <math>H</math> and the space <math>W(0, T)</math></b>	<b>390</b>
<b>§26</b>	<b>The existence and uniqueness of the solution of a parabolic differential equation</b>	<b>395</b>
<b>§27</b>	<b>The regularity of solutions of the parabolic differential equation</b>	<b>403</b>
27.1	<i>An abstract regularity theorem</i>	404
27.2	<i>Differentiability with respect to <math>t</math></i>	411
27.3	<i>Differentiability with respect to <math>x</math>, respectively <math>t</math></i>	414
<b>§28</b>	<b>Examples</b>	<b>423</b>
<b>V</b>	<b>Hyperbolic differential operators</b>	<b>434</b>
<b>§29</b>	<b>Existence and uniqueness of the solution</b>	<b>434</b>
<b>§30</b>	<b>Regularity of the solutions of the hyperbolic differential equation</b>	<b>442</b>
30.1	<i>An abstract regularity theorem</i>	442
30.2	<i>Differentiability with respect to <math>t</math></i>	445
30.3	<i>Differentiability with respect to <math>x</math></i>	447
<b>§31</b>	<b>Examples</b>	<b>452</b>
<b>VI</b>	<b>Difference processes for the calculation of the solution of the partial differential equation</b>	<b>462</b>
<b>§32</b>	<b>Functional analytic concepts for difference processes</b>	<b>462</b>
<b>§33</b>	<b>Difference processes for elliptic differential equations and for the wave equation</b>	<b>481</b>
33.1	<i>Some important inequalities</i>	481
33.2	<i>Construction of a difference process for the Dirichlet problem</i>	484
33.3	<i>A difference process for the wave equation in several space variables</i>	488
<b>§34</b>	<b>Evolution equations</b>	<b>496</b>
34.1	<i>The time-independent case</i>	498
34.2	<i>The time-dependent case</i>	503
34.3	<i>Stability behaviour of the perturbed process</i>	505
34.4	<i>Several step processes</i>	507
