

INDEX

- base ring 22
- basic module 23
- basic transfer map 23
- bound module 18
- brick 111
  
- dominion 122
- doubly transitive 155
  
- enveloping algebra 174
  
- factor closed 82
- factor ring 22
- faithful R-ring 22
- faithful projective rank function 5
- fir 4
- free transfer map 23
- full map 10
  
- generating number 10
- generating spartial splitting skew field 159
- geometrically regular 39
- Grothendieck group 3
  
- honest 81
  
- induced map 23
- induced module 23
- inner projective rank function 10
  
- law of nullity 11
- left bound modules 18
- left full map 10
- left hereditary ring 3
- left nullity 10
- left semihereditary ring 3
- lower multiplicatively closed 39
  
- maximal epic subring 122
- minimal factorisation 14
  
- n-transcendental 158
  
- partial projective rank function 5
- perfect ring 77
- pointed cyclic bimodule 196
- pre-injective 192
- pre-pre-rank 115
- pre-projective 192
- pre-rank 115
- prime matrix ideal 95
- projective rank function 5
  
- regular field extension 143
- regular skew field extension 159
- ring coproduct 22
- R-ring 22
  
- saturated 55
- saturation 55
- semifir 4
- simple artinian coproduct 81, 101
- singular kernel 94
- species 215
- stably associated 16
- stably free skew field 203
- stably isomorphic 4
- standard u.t. rank function 199
- Sylvester domain 11
- Sylvester map rank function 97
- Sylvester matrix rank function 97
- Sylvester module rank function 96
- Sylvester projective rank function 11
- Sylvester rank function 97
  
- tensor ring 79
- torsion left modules 16
- totally algebraically closed 158
- totally transcendental 158
- trace ideal 7
- transpose 18
- transvection 23
- tree coproduct 153
- tree of rings 153
