978-0-521-27853-9 - Representation of Rings over Skew Fields

A. H. Schofield

Table of Contents

[More information](#)

CONTENTS

Preface	vii
Part I: Homomorphisms to simple artinian rings	
1 Hereditary rings and projective rank functions	3
2 The coproduct theorems	22
3 Projective rank functions on ring coproducts	41
4 Universal localisation	50
5 Universal homomorphisms from hereditary to simple artinian rings	68
6 Homomorphisms from hereditary to von Neumann regular rings	89
7 Homomorphisms from rings to simple artinian rings	94
Part II: Skew subfields of simple artinian coproducts	
8 The centre of the simple artinian coproduct	137
9 Finite dimensional divisions subalgebras of skew field coproducts	143
10 The universal bimodule of derivations	166
11 Commutative subfields and centralisers in skew held coproducts	178
12 Characterising universal localisations at a rank function	185
13 Bimodule amalgam rings and Artin's problem	196
References	219
Index	222
