

## CONTENTS

## Volume 2

Introduction .....	ix
Algorithms for matrix groups	
<i>E. A. O'Brien</i> .....	297
Residual properties of 1-relator groups	
<i>Mark Sapir</i> .....	324
Words and groups	
<i>Dan Segal</i> .....	344
The modular isomorphism problem for the groups of order 512	
<i>Bettina Eick &amp; Alexander Konovalov</i> .....	375
Recent progress in the symmetric generation of groups	
<i>Ben Fairbairn</i> .....	384
Discriminating groups: a comprehensive overview	
<i>Benjamin Fine, Anthony M. Gaglione, Alexei Myasnikov, Gerhard Rosenberger &amp; Dennis Spellman</i> .....	395
Extending the Kegel Wielandt theorem through $\pi$ -decomposable groups	
<i>L. S. Kazarin, A. Martínez-Pastor &amp; M. D. Pérez-Ramos</i> .....	415
On the prime graph of a finite group	
<i>Behrooz Khosravi</i> .....	424
Applications of Lie rings with finite cyclic grading	
<i>E. I. Khukhro</i> .....	429
Pronormal subgroups and transitivity of some subgroup properties	
<i>Leonid A. Kurdachenko, Javier Otal &amp; Igor Ya. Subbotin</i> .....	448
On Engel and positive laws	
<i>O. Macedońska &amp; W. Tomaszewski</i> .....	461
Maximal subgroups of odd index in finite groups with simple classical socle	
<i>N. V. Maslova</i> .....	473

Some classic and nearly classic problems on varieties of groups <i>Peter M. Neumann</i> .....	479
Generalizations of the Sylow theorem <i>Danila O. Revin &amp; Evgeny P. Vdovin</i> .....	488
Engel groups <i>Gunnar Traustason</i> .....	520
Lie methods in Engel groups <i>Michael Vaughan-Lee</i> .....	551
On the degree of commutativity of $p$ -groups of maximal class <i>A. Vera-López &amp; M. A. García-Sánchez</i> .....	560
Class preserving automorphisms of finite $p$ -groups: a survey <i>Manoj K. Yadav</i> .....	569
Symmetric colorings of finite groups <i>Yuliya Zelenyuk</i> .....	580
