Introduction xiii

Volume I: Nominalism and Realism

PART ONE PRELIMINARIES

1 Predicates
- I Predicates as linguistic expressions 1
- II Identity-conditions for predicates 6

PART TWO THEORIES OF UNIVERSALS

2 Predicate Nominalism
- I Nominalism versus Realism 11
- II Varieties of Nominalism 12
- III Can predicates determine properties? 17
- IV Predicate Nominalism and two infinite regresses 18
- V Predicates and possible predicates 21
- VI Predicate Nominalism and causality 22

3 Concept Nominalism 25

4 Class Nominalism 28
- I Class Nominalism is committed to an ontology of classes 29
- II Mereological Nominalism 34
- III Class Nominalism and co-extensive properties 35
- IV Can class-membership determine properties? 36
- V An argument from the identity-conditions for classes 37
- VI Only some classes are natural classes 38
- VII Class Nominalism and two infinite regresses 41
- VIII Class Nominalism and causality 42

5 Resemblance Nominalism
I The Resemblance analysis 44
II Over-determination of the paradigms 48
III The symmetry of resemblance 49
IV Can resemblance to paradigms determine properties? 50
V The possible non-existence of paradigms 51
VI Resemblance Nominalism and two infinite regresses 53
VII Resemblance Nominalism and causality 56

6 Arguments for Realism
I Two statements about colours 58
II Attribute variables 62

7 Transcendent universals
I The nature of the theory 64
II What relation holds between particulars and Forms? 66
III Can Forms determine properties? 68
IV The Forms and two infinite regresses 69
V The Third Man 71
VI The Restricted Third Man 72
VII Transcendent universals and causality 75
VIII Transcendent versus immanent universals 75

8 Properties and relations as particulars 77
I Arguments for Particularism 79
II Particularism and the Problem of Universals 82
III The incoherence of Particularism 86

PART THREE PARTICULARS

9 Are particulars reducible to universals? 89
I The Identity of Indiscernibles 91
II Another argument against the Bundle theory 97
III Two further objections 98

10 The Lockean account of particulars 102
I Unsound criticisms of the Lockean account 103

II What is the relation between substratum and properties? 104
III Another infinite regress 106

11 Particulars and universals
I The properties of a particular are not related to that particular 108
II Are there two senses of the word "identity"? 111
III States of affairs 113
IV Particularizing universals 116
V Particularity and spatio-temporal position 118
VI Particularity and spatio-temporal position (continued) 122

12 A world-hypothesis 126

The argument of Volume II 133
Glossary of terms used and principles formulated 136
Works cited 141
Index to Volume I 145

Volume II: A Theory of Universals
The argument of Volume I 1

PART FOUR PREDICATES AND UNIVERSALS

13 Relations between predicates and universals
I Empiricism and universals 7
II Predicates without universals 9
III Universals without predicates 12
IV Types of predicate 14

14 Rejection of disjunctive and negative universals
I Rejection of disjunctive universals 19
II Rejection of negative universals 23

15 Acceptance of conjunctive universals
I Why conjunctive universals must be admitted 30
II The notions of whole and part 36
III Strictly universal predicates and truth-functions 39

Table of Contents
More information

16 The identification of universals
I Identity-conditions for universals 43
II Where do we start? 47

17 Different semantic correlations between predicates and universals 53

PART FIVE PROPERTIES AND RELATIONS

18 Properties
I Are all monadic universals properties? 61
II Simple and complex properties 67
III Unstructural and structural properties 68
IV Two types of structural property 70
V Numbers and properties 71

19 Relations 75
I Relations and instantiation 76
II Relational properties 78
III Relational Realism 80
IV Internal and external relations 84
V What relations are there? 88
VI Particulars are never reflexively related 91
VII Final remarks on relations 93

PART SIX THE ANALYSIS OF RESEMBLANCE

20 The resemblance of particulars 95
I The resemblance of particulars 96
II An epistemological difficulty 98
III Sense-data and resemblance 99

21 The resemblance of universals (I): criticism of received accounts 101
I Reduction of the resemblance of universals to propositions about particulars 102
II The resemblance of universals as common properties of universals 105

Table of Contents
More information

III The resemblance of universals as the relations of universals 108
IV Determinables and determinates 111
V Scepticism about the resemblance of universals 113

22 The resemblance of universals (II): a new account 116
I Determinables are not universals 117
II A solution in terms of partial identity 120
III The solution extended to colours 124
IV Homogeneous classes of universals 127
V The Laws of Nature as linking homogeneous classes of universals 129
VI Predicates and universals again 130

PART SEVEN HIGHER-ORDER UNIVERSALS

23 Higher-order properties 133
I Second-order properties 134
II The Principle of Order Invariance 141
III Do second-order properties have properties? 143
IV Higher-order relational properties 146

24 Higher-order relations
I Causality and nomic connection 148
II Other second-order relations? 157
III Do second-order relations fall under universals? 159
IV Epistemological problems 162

In conclusion 167
Glossary of terms used and principles formulated 169
Works cited 177
Index to Volumes I and II 183
