

Index

- a 66, 77, 86
 Adams conjecture 73-6, 86, 117
 Adams operations 73, 81, 85-6, 112, 117-8
 Adams-Toda operators 78-81
 Adams vector field theorem 82-3
 antipodal involution 2
- b 29, 66
 Barratt-Mahowald theorem 84
 Bott periodicity 98-9
- C^* -algebra 101
 chain complex 97, 113
 classifying space of a group with involution 76, 106
 Clifford algebra 64
 Clifford element 83
 cohomology, equivariant 49
- $D(V)$, disc 7
 d-invariant 78-9
 \mathcal{D}_E 103
 de Rham invariant 114
 difference class 7, 47
 direct image see index
 double-point invariant 56
 doubling operation 2, 4, 20, 117
 duality 10-1, 37-8
- EHP-sequence 61
 e-invariant 35, 82
 embedding, obstruction to 57-8
 Euler characteristic 75, 92-4, 118; $\mathbb{Z}/2$ 91; KO 92
 Euler class 6, 47, 67; relative 7; of vector bundle with antipodal involution 13, 23, 68, 113-4
- F 26, 70
 fibre-homotopy equivalence 1, 21, 23, 90-1, 117
 finite covering 14, 57-8, 118-9
 finite field 112, 118-20
 fixed point map 19, 20, 26, 28-9, 60, 116
 flat vector bundle 94, 115
 framed bordism 40
 framed Lie group 42, 86-7
 framing, twisted 41-2, 52
- free ideal, summand 26, 69, 70, 74, 119
 free spherical fibration theory 20, 69
- Gersten-Wagoner method 108-11
 group with involution 75-6, 105
 Gysin sequence 14
- H, Hopf line bundle 10
 $H(V)$ 17, 69
 Hermitian form 103
 homotopy derivative 90
 Hopf invariant 35, 51, 61-3, 92
 Hurwitz-Radon number 78
 hyperbolic map 96, 99, 104
- i 4
 i^* see restriction, transfer
 i_* see induction
 immersion 55-6, 58
 index 37-9
 induction 3, 29, 38
- $J(X)$ 2
 J-homomorphism 22, 27, 41, 43; complex 70; Hermitian 116
 J^* cohomology theory 85-6
- $K_{**}(R; E)$ 108, 110
 KO_{**} 66
 Kahn-Priddy theorem 21, 24, 31-2, 41, 46, 85
 Karoubi periodicity 111-2
 Karoubi-Quillen K-theory 103-14
 Karoubi-Segal theorem 64
 Kervaire-Arf invariant 51-2, 63
 KR-theory 68
- L 1
 $L(G)^*$ 69
 L-class, Hirzebruch 68, 113-4
 linking number 48
 Lin's theorem 87-8
 local coefficients 5
 local obstruction, θ 9, 15; as J-homomorphism 27; complex 70-1; discrete 118-20; Hermitian 116; Real 72

- Mahowald's theorem 82
 manifold over B 38
 maximal tori, space of 73, 75
- Nishida's theorem 34
 non-singular bilinear form 85
- $O(V)$, orthogonal group 9
 $O(\infty)$ 15
 $O(V, U \oplus V)$, Stiefel manifold 9
- p , odd prime 25, 30, 88
 P^2 32, 44, 50, 66, 101, 109
 \bar{P}^2 33, see Hopf invariant
 $P(V)$, real projective space 10
 $P(\infty)$ 15
 P_n^∞ 30
- periodicity 65, 98-9, 100, 104, 111-2
- quadratic form 49; on framed manifold 50; and double cover 54
 quasi-projective space 70-1
 Quillen construction 105, 108
- R 10, 12, 15, 71, 119
 r -field 5, 9, 13-4
 Reality 68, 72, 97
 reflection map see R
 restriction, i^* 16, 20, 28
- $S(V)$, sphere 7
 S^1, S^3 16, 42, 86
 S^2 see doubling operation
 \bar{S}^2 21, 117
 Segal's theorem on stable homotopy of complex projective space 71
 semicharacteristic 92-4, 114
 signature 93
 Smale invariant 56
 spherical fibration theory 19, 24
- splitting
 of spherical fibration theory 18, 20, 24, 69;
 of stable cohomotopy 26, 61
- squaring operation see P^2
 Steenrod squares 50, 52-3;
 χSq 52
- Stiefel manifold 9
 symmetric form 50, 96-7
 symmetric spaces 87
- t 28
 Thom class 7
 Toda bracket 79
 transfer 14, 38, 55, 58; as i^* 16, 31
 transversality 47
- V_k 4
- Witt cohomology theory 99, 100, 113-4
 Witt group 101, 113
- $\mathbb{Z}/2$ -ANR 107
 $\mathbb{Z}/2$ -homotopy equivalence, criterion for 107
- γ see Euler class
 δ see difference class, and 26-7, 30
 ζ 17, 70
 η 22-3
 θ see local obstruction
 θ^2 35, 57
 μ_i 78, 86
 ρ see fixed point map
 σ 3, 19, 20, 26
 τ , tangent bundle 37-9;
 involution in KO_{**} 65
 ω , stable cohomotopy 5
 ω_{**} 29
- $+$, compactification 6
