PREFACE

This second volume continues the plan outlined in the first, the commentary itself being somewhat denser. Attention is increasingly drawn to typical motifs and themes, which become more marked from book 5 on. At the same time vol. 1's emphasis on poetics, especially at the level of rhythm and diction, is maintained; and the analysis of character and motivation, as well as of divine involvement, becomes somewhat fuller than before. The four introductory chapters continue the progressive examination of the background to the *Iliad*; they will be complemented here and there in subsequent volumes, not least chapter 1 on Homeric religion. Reference to modern secondary literature, which some critics have found too slight, has been increased. Subsequent volumes will go further in this respect, although the principle stated in the editorial introduction to vol. 1 still applies, that neither complete bibliographical coverage nor a generally doxographical approach to Homeric interpretation is sought after.

Two amendments have been made to the list of essential aids (cf. vol. 1, xxi). First, Dr Stephanie West's elucidation of *Odyssey* bks 1–4, in the revised, English version of the *Odissea* commentary overseen by Alfred Heubeck, is of exceptional value for many Homeric matters and is cited with corresponding frequency. Second, Ameis–Hentze's commentary, though obviously outmoded in certain respects, still contains much that is both acute and relevant, and in the present volume is cited on a par with Leaf. Other references to works in German are too few, but the influence of Burkert, Erbse, W. H. Friedrich, Latacz, Leumann, Meister, Trümpy and others (not to mention Dörpfeld and Korfmann), if not of Neoanalysis except at its broadest level, is plain enough. In French, the quality and frequency of the guidance provided by Chantraine are equally obvious. Yet the 'commentary for Europe for the 1990s' desiderated by one friend is obviously not to be found in these pages – if it could, or should, be found anywhere. I have also continued to maintain a certain reserve over the ultimate intentions and attitudes, both moral and literary, of the *Iliad*'s monumental composer. That may be frustrating to some, but a commentator's first aim should be, not to provide ready-made answers to all possible questions at whatever level of generality, but to help his users make their own attempts to do so. Meanwhile (as a visit to the recent F.I.E.C. congress in Pisa served to remind one), on many points of Homeric interpretation, not least over questions of religion, a distinctly personal, not

to say visceral response is still preferred by many scholars. That is perhaps as it should be; but it gives the author of a commentary like this one a distinct hope that here and there, at least, and even to non-English-speaking scholars, he can offer a certain counter-balancing judgement based on close study (albeit sometimes imperfect) of the Greek text.

My particular thanks are due to Professor R. M. Frazer, of Tulane University, for reading the typescript and saving me from many errors. He had already pointed out a number of corrigenda in vol. 1; a list of these, together with vol. II's new crop, are enclosed with the next volume to appear (v). Meanwhile certain corrections have already been incorporated in the second printing, 1987, of vol. 1. The more substantial ones affect the following comments: on 2.92–3 *ad init.*, on 2.103 *ad init.* (this I owe to the late Professor Heubeck), on 2.813–14 *ad fin.*, on 3.422, and on 4.228. Owners of the first printing of vol. 1 may find it worthwhile to compare the second printing at these points and amend accordingly.

Dr Neil Hopkinson has once again generously read through the proofs for surface errors, with his accustomed skill. S. Morris, H. von Staden, J. N. Postgate and R. Hägg helped over specific points. R. M. Cook read chapter 4, and my four collaborators have also, of course, made valuable comments. The members of two Yale seminars in the spring of 1988 provided a welcome stimulus; I would thank in particular Shirley Werner, William Johnson, Zlatko Plše and George Chukinas. Finally Professor Ruth Scodel made me aware, through her paper at the Pisa congress, that more remains to be said about imagined epitaphs in bk 6; we await her published observations with great interest.

Bath and Mauzens, October 1989

G. S. K.

NOTE

‘*Il.*’ means ‘the *Iliad*’, ‘*Od.*’ ‘the *Odyssey*’.

The numbers of occurrences of words and formulas (in the form e.g. ‘10 × *Il.*, 6 × *Od.*’) are provided for ostensive purposes only, see vol. I, xxiii. The abbreviation ‘(etc.)’ after a Greek word in such a reference indicates that the total is given of all relevant terminations; ‘*sic*’ in such circumstances means ‘in that position in the verse’; ‘2/11 ×’ means ‘twice out of a total of eleven occurrences in all’. In any case, the ‘Ibycus’ computer and compact disc offer new standards of word-count accuracy to which the ‘ostensive’ figures just mentioned do not, and perhaps need not, aspire.

| is used to mark the beginning, or the end, of a verse; occasionally, too, the central caesura. ‘v.’, ‘vv.’ means ‘verse’, ‘verses’, with ‘v-e’ meaning ‘verse-end’.

On ‘Arn/bT’ (etc.) references see vol. I, 41f. Σ signifies ‘scholium’ or ‘scholiast’.
