<i>List of contributors</i>	<i>page</i> viii
<i>Preface</i>	xi
1 The supremum of first eigenvalues of conformally covariant operators in a conformal class	1
<i>Bernd Ammann and Pierre Jammes</i>	
1.1 Introduction	1
1.2 Preliminaries	4
1.3 Asymptotically cylindrical blowups	11
1.4 Proof of the main theorem	14
Appendix A Analysis on (M_∞, g_∞)	19
References	22
2 K-Destabilizing test configurations with smooth central fiber	24
<i>Claudio Arezzo, Alberto Della Vedova, and Gabriele La Nave</i>	
2.1 Introduction	24
2.2 The case of normal singularities	29
2.3 Proof of Theorem 2.1.8 and examples	32
References	34
3 Explicit constructions of Ricci solitons	37
<i>Paul Baird</i>	
3.1 Introduction	37
3.2 Solitons from a dynamical system	40
3.3 Reduction of the equations to a 2-dimensional system	44
3.4 Higher dimensional Ricci solitons via projection	48
3.5 The 4-dimensional geometry Nil_4	50
References	55

4	Open Iwasawa cells and applications to surface theory	56
	<i>Josef F. Dorfmeister</i>	
4.1	Introduction	56
4.2	Basic notation and the Birkhoff decomposition	58
4.3	Iwasawa decomposition	59
4.4	Iwasawa decomposition via Birkhoff decomposition	60
4.5	A function defining the open Iwasawa cells	62
4.6	Applications to surface theory	64
	References	66
5	Multiplier ideal sheaves and geometric problems	68
	<i>Akito Futaki and Yuji Sano</i>	
5.1	Introduction	68
5.2	An overview of multiplier ideal sheaves	72
5.3	Direct relationships between multiplier ideal sheaves and the obstruction F	83
	References	90
6	Multisymplectic formalism and the covariant phase space	94
	<i>Frédéric Hélein</i>	
6.1	The multisymplectic formalism	95
6.2	The covariant phase space	110
6.3	Geometric quantization	117
	References	123
7	Nonnegative curvature on disk bundles	127
	<i>Lorenz J. Schwachhöfer</i>	
7.1	Introduction	127
7.2	Normal homogeneous metrics and Cheeger deformations	128
7.3	Homogeneous metrics of nonnegative curvature	130
7.4	Collar metrics of nonnegative curvature	131
7.5	Bundles with normal homogeneous collar	132
7.6	Cohomogeneity one manifolds	139
	References	140
8	Morse theory and stable pairs	142
	<i>Richard A. Wentworth and Graeme Wilkin</i>	
8.1	Introduction	142
8.2	Stable pairs	146
8.3	Morse theory	154
8.4	Cohomology of moduli spaces	174
	References	180

Contents

vii

9	Manifolds with k-positive Ricci curvature	182
	<i>Jon Wolfson</i>	
9.1	Introduction	182
9.2	Manifolds with k -positive Ricci curvature	183
9.3	Fill radius and an approach to Conjecture 1	192
9.4	The fundamental group and fill radius bounds	198
	References	200
