

Index

- acids
 halogen hydracids 167–9, 171
 oxyacids, strength of 172
 strength of inorganic 167–72
 successive ionisation constants of 171–2
- alkali metal halides
 enthalpies of formation of 84–7
 formation of gaseous molecules by 62–4
 Gibbs free energies of formation of 84–7
 lattice energies of 73, 74
 sodium halides, solubility of 143–9
- aluminium halides
 bond enthalpies in 113, 114
 fusion and vaporisation data for 125–6
- aqueous solution 142 *et seq.*
 complex ion formation in 172–7
 electrode potentials in 158–65
 entropy changes in 25
 solubility of electrolytes in 143–9
 standard states in 142–3
 strength of acids in 167–72
 thermodynamic data for ions in 143
- atomic orbitals
 crystal field splitting of 92–4
 3d, spatial distribution of 92
- boiling point
 of ionic substances 94–6
 of metals 37–9
 of metals, Table of 40–1
 of molecular substances 94–5, 121–6
- Boltzmann expression 5
- bond-dissociation energy 7, 64, 103–5
 of diatomic molecules 103–4
 of polyatomic molecules 104
 relation to bond-dissociation enthalpy 104
- bond energy 4, 102
- bond enthalpy 10, 20, 66
 average values of 105
 dependence of bridging systems 113–15
 dependence on oxidation state 111–12
 dependence on stereochemistry 112–13
 effect on acid strength of 167–9, 171–2
 estimation of 119–20
 in carbonyls 105, 106, 128–32
 in complex ions 110–11
 in group 5 elements 127, 128
 in group 5 trichlorides 127, 128
 in organo-metallic compounds 105, 106
 intrinsic 116, 131
 of diatomic molecules 104
 of metal-metal bonds 111, 131, 132–5
 of multiple bonds 109–10
 of polyatomic molecules 105
 of single bonds 107–9
 of single bonds, Table of 108
 relation to electronegativity 117–21
 systemisation of 117–21
- Born equation for solvation energy 153
- Born exponent 69
 Table of 69
- Born-Haber cycle 66
- Born-Landé expression 68–70
- Born-Mayer expression 70
- caesium difluoride 100–1
- carbon dioxide
 entropy of 23
- carbon monoxide
 energy transitions in 4
 entropy of solid 25
 in metallurgical processes 29–32
- carbon tetrachloride
 hydrolysis of 16

- carbonyls, metallic
 binuclear 131–2
 bond enthalpies in 105, 106, 128–32
 enthalpies of formation of 128–32
- characteristic energy of ions 71, 74
- chelate effect 175, 176
- cohesive energy, *see* lattice energy
- complex ions
 enthalpy of formation of gaseous 79, 80, 96–7
 entropies of 99, 100
 formation of, in solution 172–7
 lattice energy of crystal containing 75
 stability of, in solution 172–7
 thermochemical radii for 77–9
- configurational entropy 25, 177
- covalent compounds 102 *et seq.*
 boiling points of 94–5, 121–6
 enthalpy of fusion of 95, 123–5
 enthalpy of vaporisation of 95, 123–5
 entropy of fusion of 95, 123–5
 entropy of vaporisation of 95, 123–5
 melting points of 94–5, 121–6
- crystal energy, *see* lattice energy
- crystal field stabilisation energy 92–4, 176
 and enthalpy of hydration 154, 155
- dispersion energy, *see* London energy
- electrode potentials 158–67
 in non-aqueous solvents 165–7
 in non-aqueous solvents, Table of 166
 limitations of standard 163–5
 standard 159
 thermodynamic factors influencing 157–63
- electron affinity, *see* electron-attachment energy
- electron-attachment energy 55–9
 of molecules 60
 of molecules, Table of 61
 of second electron 80
 relation to electron-attachment enthalpy 55
 Tables of 57, 58
- electronegativity 117–21
 Mulliken scale, Table 121
 Pauling scale, Table 118, 121
 relation to bond enthalpy 117–21
- electronic energy 3–8, 22
- Ellingham diagrams 29
- enthalpy change ΔH 9, 14
 estimation of 32
 in metallurgical processes 29–32
 relation to ΔU of 9
 standard 11
- enthalpy of atomisation 34
 of carbonyls 129–32
 of covalent molecules 106
 of group 5 elements 129–30
 of lithium halides 86
 of metals 34–8
 of transition metals 36, 37, 133
- enthalpy of formation ΔH_f° 11
 estimation of, covalent compounds 135–41
 estimation of, ionic compounds 96–101, 135
 of alkali metal halides 85
 of aqueous ions 143
 of aqueous ions, Table of 144–5
 of caesium difluoride 100
 of carbonyls 138–32
 of gaseous monatomic anions 59–60, 97
 of gaseous monatomic anions, Table of 57
 of gaseous monatomic cations 54, 96
 of gaseous monatomic cations, Table of 56
 of gaseous polyatomic ions 60, 67, 79, 96
 of gaseous polyatomic ions, Tables of 61, 80, 97
 of group 5 trichlorides 126–8
 of transition metal dichlorides 87–94
 periodic trends in, covalent compounds 126–32
 periodic trends in, ionic compounds 96–101, 135
- enthalpy of fusion
 of ionic substances 95
 of ionic substances, Table of 95
 of metals 42, 43
 of metals, Table of 40–1
 of molecular substances 94, 95, 123–5
 of molecular substances, Tables of 95, 123
- enthalpy of hydration
 absolute values 151–7
 absolute values, Tables of 152
 calculated values 155–6
 of transition metal cations 154, 155
 relation to ionic size 153–5
 relative values 149–51
 relative values, Table of 151
- enthalpy of reaction 11
- enthalpy of sublimation
 of metals, Table of 40–1
- enthalpy of vaporisation
 of ionic substances 94–6
 of ionic substances, Table of 95
 of metals 38, 39
 of metals, Table of 40–1
 of molecular substances 94, 95, 123–5
 of molecular substances, Tables of 95, 123

- entropy S 13
 configurational 25, 177
 estimation of S_{298}^{\ominus} 99–100, 136–8, 158, 169
 molecular interpretation of 20–7
 of anions in compounds, Table of 99
 of aqueous ions 25, 143
 of aqueous ions, estimation of 158
 of aqueous ions, Table of 144–5
 of aqueous molecules, estimation of 169
 of elements, S_{298}^{\ominus} , Table of 98
 of gaseous polyatomic molecules, Table of 137
 of ideal gas 22
 of liquids 24
 of metals in compounds, Table of 99
 of solids 23
 of solutes 25, 143
 rotational 23, 24, 26, 85, 137, 169
 spatial 25, 177
 standard 14
 thermal 25
 translational 23, 24, 26, 85, 137, 157, 169
 vibrational 23, 24, 27, 137
- entropy change ΔS 13, 20
 and chelate effect 175, 176
 and macrocyclic effect 176, 177
 effect on acid strength 169–70
 effect on electrode potential 160, 161, 163
 effect on $\Delta G_{\text{f}}^{\ominus}$ for alkali metal halides 85
 effect on $\Delta G_{\text{f}}^{\ominus}$ for group 5 trichlorides 126–7
 effect on $\Delta G_{\text{f}}^{\ominus}$ for transition metal dichlorides 87
 effect on solubility 148–9
 effect on stability of oxidation states 83
 estimation of 32, 101, 136–40
 in adiabatic processes 27
 in aqueous solutions 25
 in complex ion formation 174, 175–7
 in metallurgical processes 29–32
 sign of 20
 standard 13, 14
