

TABLE OF CONTENTS

Chapter 1. Abstract spectral theory in Hilbert spaces	1
1.1. Unbounded linear operators on Banach and Hilbert spaces	1
1.2. Self-adjoint extensions of hermitian operators	6
1.3. On the spectral theorem for self-adjoint operators.	12
1.4. Proof of the spectral theorem	17
1.5. A result on powers of positive operators	24
1.6. On HS-chains	29
Chapter 2. Spectral theory of differential operators	35
2.1. Linear differential operators on a subdomain of \mathbb{R}^n	35
2.2. Generalized boundary problems; ordinary differential expressions	41
2.3. Singular endpoints of a $2r$ -th order Sturm-Liouville problem	49
2.4. The spectral theorem for a second order expression	53
Chapter 3. Second order elliptic expressions on manifolds	59
3.1. 2-nd order partial differential expressions on manifolds; Weyl's lemma; Dirichlet operator	60
3.2. Boundary regularity for the Dirichlet realization	67
3.3. Compactness of the resolvent of the Friedrichs extension	71
3.4. A Green's function for H and H_d , and a mean value inequality	78
3.5. Harnack inequality; Dirichlet problem; maximum principle	87
3.6. Change of dependent variable; normal forms; positivity of the Green's function	93
Chapter 4. Essential self-adjointness of the Minimal Operator	103
4.1. Essential self-adjointness of powers of H_0	104

Cambridge University Press

978-0-521-28443-1 - Spectral Theory of Linear Differential Operators and Comparison Algebras

H. O. Cordes

Table of Contents

viii

4.2. Essential self-adjointness of H_0	109
4.3. Proof of theorem 1.1	111
4.4. Proof of Frehse's theorem	118
4.5. More criteria for essential self-adjointness	123
Chapter 5. C^* -Comparison algebras	125
5.1. Comparison operators and comparison algebras	127
5.2. Differential expressions of order ≤ 2	132
5.3. Compactness criteria for commutators	137
5.4. Comparison algebras with compact commutators	144
5.5. A discussion of one-dimensional problems	150
5.6. An expansion for expressions within reach of an algebra C	155
Chapter 6. Minimal comparison algebra and wave front space.	161
6.1. The local invariance of the minimal comparison algebra	162
6.2. The wave front space	169
6.3. Differential expressions within reach of the algebra J_0	175
6.4. The Sobolev estimate for elliptic expressions expressions on a compact Ω	181
Chapter 7. The secondary symbol space	186
7.1. The symbol space of a general comparison algebra	189
7.2. The space $M \setminus W$, and some examples	193
7.3. Stronger conditions and more detail on $M \setminus W$.	200
7.4. More structure of M_s , and more on examples	210
Chapter 8. Comparison algebras with non-compact commutators	218
8.1. An algebra invariant under a discrete translation group	220
8.2. A C^* -algebra on a poly-cylinder.	228
8.3. Algebra surgery	239
8.4. Complete Riemannian manifolds with cylindrical ends	246
Chapter 9. H_s -Algebras; higher order operators within reach	250
9.1. Higher order Sobolev spaces and H_s -comparison algebras	251
9.2. Closer analysis of some of the conditions (l_j) and (m_j)	258

Cambridge University Press

ix

9.3. Higher order differential expressions within reach of \mathcal{C} or \mathcal{C}_S	262
9.4. Symbol calculus in H_S	267
9.5. Local properties of the Sobolev spaces H_S	272
9.6. Sobolev norms of integral order	279
9.7. Examples for higher order theory; the secondary symbol	283
Chapter 10. Fredholm theory in comparison algebras	291
10.1. Fredholm theory in $\mathcal{C} \subset L(H)$	292
10.2. Fredholm properties of operators within reach of \mathcal{C}	296
10.3. Systems of operators, and operators acting on vector bundles	303
10.4. Discussion of algebras with a two-link ideal chain	309
10.5. Fredholm theory and comparison technique in Sobolev spaces	315
Appendix A. Auxiliary results concerning functions on manifolds	320
Appendix B. Covariant derivatives and curvature	322
Appendix C. Summary of the conditions (x_j) used	324
List of symbols used	327
References	328
Index	340
