

## *Index of symbols*

$M^n$	n-dimensional manifold 1	$f^*E$	induced bundle 27
$(h, U)$	chart 2	$\otimes$	Whitney sum 33
$ x $	Euclidean valuation 4	$\otimes^*$	tensor product 34
$[x]$	equivalence class, in particular homogenous coordinates 4	$E^*$	dual bundle 34
$[0, 1], [0, 1),$ $(0, 1)$	unit interval (closed, half-open, open) 7	$\wedge^k$	exterior power 34
+	differentiable sum 8	$\alpha, \alpha_x$	orientation 34
x	differentiable (Cartesian) product 8	$\tilde{X}(E)$	orientation cover 35
$f^*$	induced map 12, 14	$\perp X$	normal bundle 38
$\langle, \rangle$	inner or scalar product 13	$\{\}, \bar{W}$	closure 41
~	equivalence relation 14, 103	$\Delta_M$	diagonal 42, 121
$\bar{f}: (M, p)$ $\rightarrow (N, q)(\mathcal{E})$	germ(s) 14	$ f _K$	seminorm on $C^\infty(M, N)$ 65
$\square$	conclusion of proof 15	$\Phi, \Phi_t$	local flow 74
$[E, \pi, X]$	vector bundle 22	$\alpha$	velocity vector (curve, field) 76, 79
$E_x$	fibre 22	#	connected sum 98
$f_x$	fibre mapping 22	$\cup_\alpha$	identification by means of $\alpha$ 103
$E^\perp$	orthogonal complement 24	$\ddot{\gamma}$	109
$E X$	restriction of a bundle 25	$\partial$	boundary of a manifold 131
		$M/\tau$	quotient manifold 135
		$[f_1] \circ [f_2]$	intersection number 151
