CONTENTS

The asymptotic speed and shape of a particle system 1
D. ALDOUS and J. PITMAN

On doubly stochastic population processes 24
M.S. BARTLETT

On limit theorems for occupation times 46
N.H. BINGHAM and J. HAWKES

The Martin boundary of two dimensional Ornstein-Uhlenbeck processes 63
M. CRANSTON, S. OREY, U. RÖSLER

Green's and Dirichlet spaces for a symmetric Markov transition function 79
E.B. DYNKIN

On a theorem of Kabanov, Liptser and Širjaev 99
G.K. EAGLESON, R.F. GUNDY

Oxford Commemoration Ball 112
J.M. HAMMERSLEY

Invariant measures and the q-matrix 143
F.P. KELLY

The appearance of a multivariate exponential distribution in sojourn times for birth-death and diffusion processes 161
J.T. KENT

Three unsolved problems in discrete Markov theory 180
J.F.C. KINGMAN

The electrostatic capacity of an ellipsoid 192
P.A.P. MORAN

Stationary one-dimensional Markov random fields with a continuous state space 199
F. PAPANGELOU

Table of Contents
More information

A uniform central limit theorem for partial-sum processes indexed by sets 219
R. PYKE

Multidimensional randomness 241
B.D. RIPLEY

Some properties of a test for multimodality based on kernel density estimates 248
B.W. SILVERMAN

Criteria for rates of convergence of Markov chains, with application to queueing and storage theory 260
R.L. TWEEDIE

Competition and bottle-necks 277
P. WHITTLE

Contributors 285
