

## INDEX

- absolute point 16,183
- affine geometry 21
- arc 71
- automorphism 8
  - numerical 128
- automorphism group 8
  - semistandard 98
  - standard 98
- Baer configuration 105
- bilinear form 250
  - alternating 250
  - equivalent 252
  - isotropic 251
  - nondegenerate 251
  - nonsingular 251
  - orthogonal 250
  - symplectic 250
  - totally isotropic 251
- biplane 77
- block 1
  - exterior 71
  - tangent 71
  - secant 71
- Bruck-Ryser-Chowla Theorem 42
- Cauchy-Frobenius Lemma 79
- character 274
  - group 274
  - principal 274
  - table 276
  - trivial 274
- characteristic function 13
- closed configuration 105
- code(s) 47
  - chain of 59
  - dual of a 47
  - G- 135
  - extended Golay 56
  - length of a 47
  - of a symmetric design 47
  - quadratic residues 139
  - Reed-Muller 73
  - reversible 137
  - self-dual 47
  - self-orthogonal 47
- complementary design 4
- composition factor 92,271
- contraction 102
- cyclotomic field 284
- Dembowski-Wagner Theorem 16,25
- design
  - affine 21
  - block 18
  - complementary 4
  - derived 20-21
  - dual 4
  - H- 11
  - Hadamard 5
  - order of a 3
  - residual 20-21
  - symmetric 1
  - t- 17
  - trivial 2
- difference set 120
  - abelian 125

- central 226
- cyclic 125
- contraction of a 142
- development of a 120
- equivalent 127
- dual design 4
- extended block 52
- extension class of ovals 54
  - of Fano planes 55
- Feit-Thompson Theorem 208
- Fisher's inequality 19
- generating matrix 59
- group ring 267
- Hadamard
  - matrix 5
  - matrix of Paley type 8
  - (symmetric) design 5
  - 3-design 18
- Hensel's Lemma 290
- Higman-Sims group 89
- homogeneous 249
- idempotent 276
- incidence matrix 3
- incidence structure 1
- intersection triangle 33
- invariant factors 58,262
- isometry 254
- isomorphism 4
- Jacobsthal matrix 6
- lattice 59
  - a-modular 60
  - dual of a 60
- Legendre symbol 6
- line 15
- Maschke's Theorem 271
- Mathieu group 56
- matrix
  - G- 146
  - representation 265
- multiplier 127
  - G/H- 143
  - numerical 128
  - weak 226
- order 3
- orthogonal group 257
- oval 51,72
- p-adic field 288
  - integer 286
  - unit 287
- partial spread 178
- permutation group 246
  - degree of a 246
  - homogeneous 249
  - k-homogeneous 248
  - k-transitive 249
  - orbit of a 246
  - rank of a 248
  - regular 249
  - semiregular 249
  - transitive 247
- perp 251

- polarity 16,183
- projective geometry 11
- projective plane 12
  
- quadratic form 253
  - nondegenerate 253
  - singular 253
  - totally singular 253
- quadratic space 254
  
- representation(s) 265
  - absolutely irreducible 271
  - contragredient 269
  - direct sum of 268
  - equivalent 268
  - extension of a 268
  - indecomposable 271
  - irreducible 270
  - left regular 266
  - module 265
