Contemporary or near contemporary engraving of Dutch or German origin of the execution of Charles I: *Most abominable unbeard of execution . . . of . . . Charles Stuart King of Great Britain . . . before the palace of Whitehall 30 January . . . 1649 . . . in the afternoon between 2 and 3 . . .* The king's neck remains on the block while the executioner displays his head to the crowd. The portrait insets are the parliamentary generals Fairfax and Cromwell left and right flanking the king in the center (see ch. 12). (Courtesy of the Ashmolean Museum, Oxford.)

## *Preface*

---

Volume Two of this work completes the examination of early modern revolution begun in Part III of the preceding volume. Although the two volumes are best used in conjunction with one another, this second volume may also be read relatively independently should need require. Those readers in particular whose primary interest may be limited to the great revolutionary civil wars of the period will find separate accounts of each of them in four successive chapters. The latter are designed, in accordance with the general plan of the book, to provide a synoptic view of these conflicts that explains their inception and overall development and aligns them in comparative perspective.
