## Contents

Preface *page xi*

### **PART I Perspectives**

- |   |   |    |
|---|---|----|
| 1 | Context in archaeology                                  | 3  |
|   | Introduction  |    |
|   | Context and ecology                                     |    |
|   | Scales and dimensions of contextual archaeology         |    |
|   | Archaeology as archaeology                              |    |
| 2 | Environmental systems: spatial and temporal variability | 14 |
|   | Space and scale in ecology                              |    |
|   | Biomes as environmental systems                         |    |
|   | Equilibrium properties                                  |    |
|   | Scales of environmental variability                     |    |
|   | Models for ecosystemic change                           |    |
|   | Unique character of human ecosystems                    |    |

### **PART II Foundations**

- |   |                                       |    |
|---|---------------------------------------|----|
| 3 | Geo-archaeology I: basic principles   | 35 |
|   | Objectives                            |    |
|   | Study components                      |    |
|   | Techniques and procedures             |    |
|   | Ultimate collaborative goals          |    |
| 4 | Geo-archaeology II: landscape context | 43 |
|   | Sedimentary matrix                    |    |
|   | Point depositional environments       |    |
|   | Linear depositional environments      |    |
|   | Areal depositional environments       |    |

Table of Contents

[More information](#)

viii	<i>Contents</i>	
	Geo-archaeological synthesis of microenvironments	
	Topographic matrix	
	Terrain, soils, and biota	
	Regional matrix	
	Environmental shifts	
5	Geo-archaeology III: stratigraphic context	67
	Stratigraphic nomenclature	
	Lithostratigraphy: site and setting	
	External correlations	
6	Geo-archaeology IV: site formation	77
	Archaeological sediments	
	A Pleistocene prototype: cave sediments	
	An example of cave geo-archaeology: Cueva Morín	
	A Holocene prototype: village mounds	
	Examples of urban geo-archaeology: Giza and Axum	
7	Geo-archaeology V: site modification and destruction	98
	Cultural transformation of archaeological residues	
	Preburial dispersal	
	Postdepositional disturbance	
	Geobiochemical modification	
	Site destruction and artifact dispersal	
	Environmental modification of archaeological residues	
8	Geo-archaeology VI: human impact on the landscape	123
	Human activity and the soil-sediment system	
	Geo-archaeological indicators of soil erosion	
	Soil erosion in the geo-archaeological record	
	A case study of accelerated soil erosion:	
	Axum, Ethiopia	
	Land use and soil fertility	
	Geo-archaeological landscape features	
	Landscape productivity and degradation	
9	Archaeometry: prospecting, provenance, dating	157
	Scope and purpose of archaeometry	
	Subsoil prospecting	
	Materials identification, provenance, and technology	
	Chronometric dating	
10	Archaeobotany: vegetation and plant utilization	171
	The archaeobotanical record	

Cambridge University Press

Karl W. Butzer

Table of Contents

[More information](#)

	<i>Contents</i>	ix
	Retrieval of archaeobotanical information	
	Paleobotanical interpretation	
	Dendroecology and dendroclimatology	
	Human utilization of plants	
11	Zoo-archaeology: faunas and animal procurement	191
	Issues in archaeozoology	
	Taphonomy	
	Ecological evaluation of fossil assemblages	
	Hunters and their prey	
	Domestication and faunal change	
<b>PART III Synthesis</b>		
12	Spatial integration I: quantitative models for pattern analysis	211
	Components, subsystems, and human ecosystems	
	Spatial archaeology	
	Gravity models	
	von Thünen's model	
	Central-place theory	
	Resource-concentration models	
13	Spatial integration II: socioecological models for settlement analysis	230
	Scale settlement analysis	
	Large-scale mobility models for hunter-gatherers	
	Subsistence-settlement generalizations for hunter-gatherers	
	Spatial determinants for agricultural settlement	
	Real versus perceived environments	
14	Spatial integration III: reconstruction of settlement systems	258
	Site location	
	Archaeological site survey	
	A landscape approach to settlement survey	
	Reconstruction of settlement patterns: hunter-gatherers	
	Reconstruction of settlement patterns: agricultural communities	
15	Diachronic systems I: cultural adaptation	279

Table of Contents

[More information](#)

x	<i>Contents</i>	
	Temporal integration	
	Cultural adaptation	
	Dynamic modes of adaptive systems	
16	Diachronic systems II: continuity and change	295
	Adaptive transformation in the Pleistocene record: hominization	
	Holocene adaptive transformations: taming the environment	
	Modifications of regional adaptive systems: historical periodicities	
	Overview and prospect	
	References	321
	Index	359
