

Contents

Preface	xi
Acknowledgments	xv
1. Development in the vascular plants	1
<i>References/4</i>	
2. Embryogenesis: beginnings of development	6
<i>Patterns of embryo development/6</i>	
<i>Cellular changes during embryogenesis/20</i>	
<i>General comment/24</i>	
<i>References/25</i>	
3. Analytical and experimental studies of embryo development	26
<i>The environment of the embryo/26</i>	
<i>The role of the suspensor/36</i>	
<i>The completion of embryogeny/39</i>	
<i>General comment/41</i>	
<i>References/44</i>	
4. The structure of the shoot apex	46
<i>Morphology/47</i>	
<i>Histology/47</i>	
<i>General comment/59</i>	
<i>References/60</i>	
5. Analytical studies of the shoot apex	62
<i>Growth of the shoot apex/62</i>	
<i>Distribution of cell division in the shoot apex/63</i>	
<i>Cytohistological studies/70</i>	
<i>Developmental changes in zonation/75</i>	
<i>Clonal analysis/76</i>	
<i>General comment/80</i>	
<i>References/83</i>	
6. Experimental investigations on the shoot apex	86
<i>Apical autonomy/86</i>	
<i>Organization and integration in the shoot apex/91</i>	
	vii

	<i>General comment/97</i>	
	<i>References/98</i>	
7.	Organogenesis in the shoot: leaf origin and position	100
	<i>Leaf initiation and early development/101</i>	
	<i>Analysis of early leaf development/106</i>	
	<i>Questions of leaf development/108</i>	
	<i>Leaf position – phyllotaxy/109</i>	
	<i>General comment/121</i>	
	<i>References/122</i>	
8.	Organogenesis in the shoot: determination of leaves and branches	124
	<i>Leaf determination/124</i>	
	<i>Dorsiventrality/134</i>	
	<i>Branching/135</i>	
	<i>General comment/144</i>	
	<i>References/145</i>	
9.	Organogenesis in the shoot: later stages of leaf development	147
	<i>Development of fern leaves/147</i>	
	<i>Development of angiosperm leaves/150</i>	
	<i>Analysis of leaf development/160</i>	
	<i>General comment/172</i>	
	<i>References/174</i>	
10.	Determinate shoots: thorns and flowers	176
	<i>Determinate meristems – thorns/176</i>	
	<i>Reproductive morphology/178</i>	
	<i>Development of the floral apex/179</i>	
	<i>Analysis of floral transformation/185</i>	
	<i>Experimental analysis of floral meristems/188</i>	
	<i>General comment/198</i>	
	<i>References/200</i>	
11.	The development of the shoot system	203
	<i>Patterns of shoot expansion/203</i>	
	<i>Regulation of shoot expansion/208</i>	
	<i>Periodicity of shoot growth/214</i>	
	<i>The components of the shoot system/217</i>	
	<i>The ontogeny of the shoot system/218</i>	
	<i>Trees, shrubs, and herbs/224</i>	
	<i>General comment/225</i>	
	<i>References/226</i>	

Contents	ix
12. The root	229
<i>The root apex</i> /232	
<i>Experimental investigation of root development</i> /240	
<i>Root branching</i> /245	
<i>Associations with microorganisms</i> /248	
<i>General comment</i> /250	
<i>References</i> /252	
13. Differentiation of the plant body: the origin of pattern	255
<i>Genetic correlates of differentiation</i> /255	
<i>Methods for the study of differentiation</i> /259	
<i>Early stages of differentiation in roots</i> /260	
<i>Early stages of differentiation in shoots</i> /266	
<i>General comment</i> /282	
<i>References</i> /283	
14. Differentiation of the plant body: the elaboration of pattern	285
<i>Cellular changes during differentiation</i> /285	
<i>Later stages of differentiation in roots</i> /290	
<i>Later stages of differentiation in shoots</i> /298	
<i>Experimental studies of vascular differentiation</i> /301	
<i>General comment</i> /307	
<i>References</i> /309	
15. Secondary growth: the vascular cambium	311
<i>The initiation of cambial activity</i> /311	
<i>The organization of the vascular cambium</i> /313	
<i>The dynamic state of the cambium</i> /318	
<i>Changing patterns in the cambium</i> /325	
<i>The question of cambial initials</i> /326	
<i>Terminology</i> /329	
<i>General comment</i> /329	
<i>References</i> /331	
16. Secondary growth: experimental studies on the cambium	333
<i>Cambial initiation</i> /333	
<i>Cambium cultures</i> /335	
<i>The physical environment</i> /336	
<i>Orientation in the cambium</i> /340	
<i>General comment</i> /345	
<i>References</i> /346	
17. Alternative patterns of development	348
<i>Developmental potentialities of isolated cells</i> /348
