INDEX

- A**pproximate unit 134
 arbitrarily small subgroup 4
 Ascoli's theorem 7
- B**ounded measures 134
 Burnside's th. (5.2) 41
- C**antor group 5
 Cayley-Klein parameters 96
 central functions 63
 character (1-dim. rep.) 60
 - of a representation 63
 central character 64
 Clebsch-Gordan th. (10.5) 105
 closed operator 145
 convolution 53
 - algebra $L^1(G)$ 54, 72
- D**ecomposition th. (7.8) 67
 discrete series rep. (16.1) 151
 - - of a group : Ω 156
 disintegration 180
 disjoint representations 44
 dual \hat{G} (5.10) 50
 duality (Tannaka) 90
- E**nveloping algebra 41
 essentially self-adjoint op. 146
 Euler angles 95
- F**actor rep. (20.1) 188
 Fell group 158
 finiteness th. (5.8) 46,
 (7.9) 69, (8.5) 81
 formal dimension of rep. 153
 fundamental lemma (5.4) 44
 Fourier inversion 58
 Frobenius-Weil recip. (8.9) 86
- G**-action 13
 Galois group 6
 G-morphism 14
 group : Cantor - 5
 Fell - 158
 Heisenberg - 113
 metrizable - 4
 orthogonal - 3
 p-adic - 6
 profinite - 6
 rotation - $SO_3(\mathbb{R})$ 95
 symplectic - 4
 tot. discontinuous - 5
 type I - 187
 unimodular - 119
 unitary - 3
 group algebras (table) 75
- H**aar measure 7, 10, 117
 Heisenberg group (Cor.4) 113
 Hilbert algebra 75, (21.6) 196
 Hilbertian integrals 185
 Hilbert-Schmidt op. (8.1) 78
- I**nduction of rep. 82
 integrable representation 151
 intertwining operator 14
 invariant function 63
 involution $f \mapsto f^*$ (14.2) 133
 isotypical components
 $L^2(G, \pi)$ 40, 41
 V_π (7.8) 67
- K**akutani's theorem 7
 kernel operator 29
- L**egendre polynomials 26

Matrix coefficients 32
 metrizable group 4
 model of a class $\varpi \in \hat{G}$ 50
 moderate function (21.3) 195
 modular function Δ_G 118

Negligible set 7
 non-degenerate rep.
 (of an algebra) 136
 normal operator 146

Operator :
 closed - 145
 essentially self-adjoint - 146
 Hilbert-Schmidt - (8.1) 78
 intertwining - 14
 kernel - 29
 normal - 146
 self-adjoint - 146
 symmetric - 146

Peter-Weyl th. 29, (4.2) 32
 Plancherel th. 58
 - measure 156

Quasi dual \hat{G} (20.9) 191
 quasi-equivalent rep. (20.9) 191
 quasi-invariant measure 122

Reciprocity (Frobenius) (8.9) 86
 reduced dual 200
 relatively invariant measure 122
 representation 13, (13.1) 128
 completely reducible - 15
 discrete series - (16.1) 151
 disjoint -s 44
 equivalent -s 14
 factor - (20.1) 188
 faithful - 16
 globally continuous - 13
 integrable - 151
 irreducible - 14, 130
 non-degenerate - of alg. 136
 quasi-equivalent -s (20.9) 191
 regular -s 17
 simple spectrum - (21.1) 194
 square summable - (16.1) 151
 unitary - 13
 Rodrigue's formula 27

Schur's lemma Ex.5, 20, (8.6) 81
 (15.11) 148, (15.12) 149
 Schur's orthogonality relations
 (5.6) 45, (16.3) 153
 simple spectrum (21.1) 194
 square summable rep. 151
 stellar algebra (= C^* -alg.) 73
 stereographic projection 98
 symmetric operator 146
 symplectic group 4

Tannaka duality 90
 Tchebycheff polynomials 102
 totally discontinuous group 5
 type I group 187

Unimodular group 119
 unitary group 3
 - representation 13

Vector integration 55

Weyl's theorem (7.10) 70

MAIN THEOREMS

Burnside (5.2) 41
 decomposition (7.8) 67
 finiteness (5.8) 46 (Banach spaces)
 (7.9) 69 (general), (8.5) 81
 Fourier inversion 58
 fundamental lemma (5.4) 44
 Frobenius-Weil (8.9) 86
 Peter-Weyl 29, (4.2) 32
 Plancherel 58
 Schur's lemma Ex.5, 20
 (8.6) 81, (15.11-12) 148-149
 Tannaka 93
 Weyl (for characters) (7.10) 70
