

INDEX

- addition theorem in probability, 115, 158–9
- ages of males at marriage, 73
- annuity, 5
- antibiotics, 145–6
- arbitrary origin for mean, 82–4
- arithmetic average, *see* mean
- ash content in coal, 173
- asymmetrical distributions, 73–6
- averages, 78 *et seq.*
- Babington-Smith, B., 225
- ball bearings, 152
- bar diagram, 43
- Baten, W. D., 92
- Bayes' theorem, 159 *et seq.*
- Bayley, N., 93
- bell-shaped distributions, 69
- Beveridge, Lord, 61
- biased sampling, 202
- Binet intelligence tests, 275
- binomial distribution, 128 *et seq.*
- accuracy of approximation, 143
 - approximation with normal, 140–3
 - calculation of terms, 131–2
 - comparison of observed and expected results, 144
 - continuity correction, 143–4
 - expansion of, 132
 - mean of, 142
 - shape of, 139
 - standard deviation of, 142
 - validity of approximation, 144
- birth certificate, 10
- bivariate tables, 35–6
- block diagram, 43–4, 48
- Board of Trade Journal*, 17
- book club sales, 161
- Brunt, D., 229
- Bryant, A., 37
- carbon content, 104
- census, 10–11, 200
- central tendency, comparison of measures, 89–90
- central values, 30 *et seq.*
- chart, pie, 44–5
- χ^2 distribution, 183–4
- approximation for, 187
 - graph of, 183
 - significance levels of, 184
 - as test for standard deviation, 185–8
- Clarke, R. D., 152
- clearing bank deposits, 230
- cloudiness, distribution of, 60, 71–2
- Cochran, W. G., 93, 236
- coefficient of correlation, *see* correlation
- coefficient of variation, 106–7
- computer program, 226
- concave series, 240
- constructed time-series, 234–5
- continuity correction for binomial, 143
- convex series, 240
- correlation coefficient, 261 *et seq.*
- calculation from regression lines, 261
 - and causation, 272
 - definition, 261
 - direct calculation, 262–4
 - from bivariate table, 264–7
 - illustrations, 262
 - limits of, 261
 - significant values, 268
- cost-of-living index, 249
- Crawford, J. R., 111
- cuckoos' eggs, 174–5
- cumulative frequency distribution, 86–7
- curvature, 242–3
- cyclical oscillations, 233, 244
- Davis, F. C., 93
- decisions, 172
- defectives, 136
- dispersion, measures of, 95 *et seq.*
- dot diagrams, 47, 65
- e*, 164
- Economic Trends*, 17
- egg prices, 232
- England and Wales population, 228–9
- estimates
- of population standard deviation, 186–7
 - of proportion, 188–92
- expectation, 155
- exponential function, 151
- factorial, 131
- flying bombs, 152
- forms, design of, 11–14

INDEX

 Gauss, J. F. C., 140, 215
 Goulden, C. H., 273
 government, 2
 graphical representation, 51–5
 group frequency, 64
 group interval, 64, 82
 grouping of data, 28 et seq., 66–8
 unequal intervals for, 33–4, 48–51
 grouping error, 70
- Hald, A., 274, 286
 Heady, J. A., 63
 heights of schoolboys, 28–32, 35–6,
 78–83, 85–7
 Hill, A. Bradford, 38, 286
 histogram, 66 et seq., 215
 Hoel, P. G., 286
 hypergeometric distribution, 155
- incomes, distribution of, 49–51
 independence, 117
 industry, 3
 insurance, 5
 insured persons absent from work,
 233
 inter-quartile distance, 96–7
- J-shaped distributions, 75
- Kendall, M. G., 225, 286
- Laplace, P. S., 215
 level of significance, 173
 Lindley, D. V., 286
 line diagram, 42, 45–6
 linear relationship, 254, 270–1
 location, comparison of measures,
 89–90
 London Transport, 17
London Travel Survey 1949, 17
 long-term trend, 233, 245
 lottery sampling, 204
 lower quartile, 96
- marginal distribution, 35
 market research, 6
 Mather, K., 58
 mean, 78 et seq.
 calculation from grouped data, 80–3
 experimental sampling distribution,
 122–5
 standard deviation of sample, 125
 test for comparison of, 169 et seq.
 theoretical sampling distribution,
 166–8
 mean deviation, 97
 calculation of, 98
 calculation from grouped data,
 98–100
 median, 85
 calculation from grouped data, 86–7
 Mendel, G., 133
 Mendelian theory, 133–4
 mental defectives, 52–3
 Miller, J. C. P., 286
Ministry of Labour Gazette, 17
 mode, 87–8
 Monte Carlo methods, 216
Monthly Bulletin of Statistics, 17
Monthly Digest of Statistics, 2, 17, 244
 Mood, A. M., 286
 Morris, J. N., 59
 moving averages, 238 et seq.
 for curves, 240–3
 multinomial distribution, 153
 multiplication theorem in probability,
 117, 158–9
 multi-stage sampling, 207
 mutually exclusive, 114
 Myers, R. J., 92
- National Opinion Polls, 210
New Survey of London Life and Labour,
 92
 normal distribution, 140 et seq.
 conversion of, 221
 equation, 164
 significance levels, 173
 simulation exercise, 220
 tabulation, 141
 varying shape, 165
- observations, 9
 only possible categories, 135
 ordering of variables, 96–7
 oscillations, 234, 236, 239, 243 et seq.
 limits about, 269
 variance about, 269
- parabolic relationship, 271
 parameter, 226
 Pearce, G. E., 60
 percentages, 43
 pictorial representation, 56–7
