- processes (*cont.*)
 in IP/WP, 108–9, 127–31, 165–9; *see also under* operations
 extent in morpholexics, 108–9, 128, 165–9
 objections to, 29, 36, 63–4, 86, 169, 203
 in suppletive formations, 286–7
 productive *v.* non-productive, 191
 prosodic phonology, *see* Firthian phonology
 prosodies
 argument for, 120
v. phonematic elements, 115, 224
- readjustment component, *see under* morphology *v.* syntax
- realisation
 in IA, 92
 in stratificational grammar, 202, 251
 in WP, 164
 distinguished from exponence, 165 n.
- realisation-component, 253
- realisation *v.* mutation/rewrite rules, 250 n., 252 n.
- redundancy rules
 for canonical formulae, 331–4
 in generative phonology, 228–34, 235, 236 n., 332–3
 lexical, 288, 306
- reference-component, 12, 172–3, 175, 253, 255
 in definition of exponence and focality, 185–9
- regularity *v.* exception, 192, 218 n., 288, 305–6; *see also* exceptions
- replacive (formative, etc.), 57–64
 as type of morph, 59
- representation-component, 175 n.
- residual criteria in evaluation procedure, 294, 303
- Romance, 353 n.
- root (radical element)
v. inflections in traditional theory, 42
v. stem, 63–4, 165–6
 as unit of phonotactics, 233, 234 n., 334 n., 339 n.; *see also* MS-rules/conditions
 in WP rule-systems, 107–9, 165–84 *passim*
- rule-groups, 194–6, 263–4, 279
 ordered *v.* unordered, 283
- rule-schema, 364 n.
- rules/rule-systems, 8–14
 for Priscian, 10–14; *for other systems see under* IA, morphophonemics, derivational rules, etc.
- types of, 212 n., 252–9; *see also* linear *v.* derivational rule-systems, ordering of rules
- Russian, 21 n., 87 n., 105 n., 124 n., 208 n., 221 n., 238 n., 249 n.
- ‘same rule’ *v.* ‘different rule’, 345–54, 358, 365, 383
- sandhi/sandhi-rules, 5 *et passim*
v. alteration, 71–2, 80–1
 as ‘euphony’, 231
 inflectional boundaries in, 184 n., 220
 internal *v.* external, 71 n., 106 n.
 in Pāṇini, 258 n.
 plausibility/naturalness of, *see* phonetic plausibility
 psychological reality of, 21
v. redundancy rules in interpretive phonotactics, 229–34
 rule-systems for, *see* morphophonemics
 types of, *see* assimilation, epenthesis, fusion; *also* automatic s., phonological motivation, phonotactic inferrability
- Sanskrit, 225 n., 373 n.
- ‘sémantème’, 42 n.
- semantic *v.* distributional criteria, 113, 293 n.
- semantic representations
v. phonetic, 200–201
v. syntactic, 142–3
- sememe *v.* episememe, 101
- Semitic, 234 n.
- sequential relations
v. non-sequential, 45, 132–47, 167–9
 for cumulation, 74–6, 125–7
 in deep structure, 140–6
v. order in Firth and others, 120, 127 n.
 in phonology, 48–50, 118
 in syntax, 43–5, 137–47
 within word in IA, 43–4, 48–50, 118–19
 in IP, 127
 rejected in WP, 106, 122
- ‘shapes’ of morphemes, 114
- ‘signals’ (in IA), *see under* morph
- simplicity, ix, 22–6, 192–3, 230, 285 n., 289, 395
v. appropriateness, 27–8
 for IA/IP, 45, 117–20, 131–2, 136
 for stratificational grammar, 203–4
 of descriptions *v.* theories, 22–3, 119–20
 in evaluation procedure, *see* economy formal and derivational, 24, 35–6
 in relationship of morphophonemics to phonotactics, 241, 359–60
