[More information](#)*Growth and income distribution*

- diminishing returns, 6, 73
 law of, 4, 7, 89–91; coming from generalization of particular situation in England, 89–90; not essential to Ricardo's differential theory of rent, 90; nor to Malthus' principle of population, 90
 to changing factors' proportions, 91, 123, 124n
- 'dismal science' (political economy), 90, 102
- distribution of income
 theory of, 103–20; Ricardo's, 4, 5, 8–9, 10; Kaldor's, 97–101, 104–6; marginal productivity, 123
 independent of workers' propensity to save, 109–12, 128
 between wages and profits as against between workers and capitalists, 106–9
- Domar, Evsey D., 93–5, 124–5, 133–4, 137; *see also* Harrod–Domar
- 'dual' or 'anti-Pasinetti' range, 131n, 132n, 138n, 142n
- Duesenberry, James S., 55–9, 67, 70
- economic growth
 theories of: Ricardo's, 6, 15–17; Harrod–Domar's, 93–7; Kaldor's, 97–101
 non-proportional, 73–4
 and fluctuations, 54, 69–75; impossibility of multiplier–accelerator explaining both, 69–70, 70n
- effective demand, 29–53, 56, 59–62, 65–72; Malthus' concern with, 29–31; principle of, 31–3, 41–2; its role in the requirement for long-run full employment, 93, 97–8, 103–4; management of, 41n
- Engel, Ernst, 73
- equilibrium
 in Ricardo's theory: 'natural', 10, 13, stationary, 13, 24
 in trade cycle theory, 56, 66
 Keynes' notion v. traditional notion, 93
- equilibrium *continued*
 of long-run growth, 93–99, 104, 121–45
 Euler theorem, 123–4
 'euthanasia' of the capitalists (very unlikely), 130, 132
- Forsyth, Andrew R., 27n
- Frisch, Ragnar, 10n, 55n, 66
- full employment: and effective demand, 38–41; as a Government goal, 40, 45, 119–20; implications of, with regards to income distribution and rate of profit, 97–9, 103–4; automatically achieved in marginal-productivity models, 123
- Galbraith, John Kenneth, 102n
- Garegnani, Pierangelo, 30n, 146n
- Godwin, William, 88
- Goodwin, Richard M., 51n, 55n, 57n, 66
- Government policy, 40, 41n, 69

- investment: Keynes' theory of, 36–7; accelerator theory of, 48–50, 56; influencing effective demand and productive capacity in different ways, 93; equilibrium growth of, 68, 94–5; determining savings, 44–5, 52–3, 99n; sensitive to entrepreneurial expectations, 71; as an independent variable in the long run, 101, 103
- Kahn, Richard F., Lord Kahn, 40, 104n, 145n
- Kaldor, Nicholas, Lord Kaldor, 10n, 55n, 66, 69n, 97–102, 104–6, 113, 116, 118, 121, 122n, 143n; his theory of income distribution, 97–101, 104–6; his views on capitalist development, 95–7, 100–1; a 'logical slip', 106, 122n; on taxation, 97; and Ricardo, 101–2
- Kalecki, Michal, 35, 55n, 66, 99n; on investment determining profits (and not the other way round), 99n
- Keynes, John Maynard, Lord Keynes, 29–53, 54, 86, 87n, 92–5, 98, 99n, 100n, 102, 103, 134n; his 'general theory' of employment and income determination, 36–40; his methodology, 42–5; on Malthus, 31; and Classical economists, 42–5; and Ricardo, 42–4; distortions of, 45–8
- Laing, Neil F., 140n
- Lauderdale, James Maitland, Earl of, 34
- Leijonhufvud, Axel, 46n
- Leontief, Wassily W., 41–2
- Levhari, David, 146n
- liquidity-preference theory, 37–8; not essential to theory of effective demand, 47
- Lloyd-George, David, 35
- Lundberg, Erik, 50n
- Luxembourg, Rosa, 34
- macro-economic v. disaggregated analysis, 72–5, 118
- McCulloch, John Ramsey, 3, 3n
- Malthus, Thomas Robert, 3, 4n, 21, 29–31, 34, 34n, 43, 86–91, 92, 101, 102; on effective demand, 29–31; on population, 86–9; and Ricardo, 29–31
- Manara, Carlo Felice, 79n
- Mandeville, Bernard, 34n
- Maneschi, Andrea, 122n
- marginal efficiency of capital, 37; and Ricardian theory of rent, 43; v. marginal productivity, 43, 46
- marginal productivity theory, 43, 122–6, 127–31, 132–3, 135n; and Keynes' marginal efficiency of capital, 43, 46
- 'market gluts', 29
- Marrama, Vittorio, 55n, 66
- Marris, Robin L., 143n
- Marshall, Alfred, 17–18n, 35, 46n
- Marx, Karl, 11n, 34, 35, 102, 144; on over-production, 34; on effective demand, 34n
- Matthews, R. C. O., 49n
- Meade, James E., 114n, 123n, 125n, 131n, 145n
- Modigliani, Franco, 47n, 122n, 125n, 131n, 132n, 134, 135–6n, 137, 138, 142n, 143, 143n; *see also* Samuelson–Modigliani
- Morishima, Michio, 135–6n, 137n, 145n
- multiplier: 'instantaneous', 40, 45; 'lagged', 45, 51–3, 56
- multiplier–accelerator interaction, 50, 54–75; limitations of, 50–1, 69–72
- multi-sector models, 18–21, 41, 72–5, 118
- 'natural' prices v. market prices, 2, 4, 5
- necessary (or wage-) goods v. luxury goods, 6, 11, 18–20; and basic v. non-basic commodities, 11n
- Neisser, Hans, 70n
- Ortes, Giammaria, 87n
- over-production theories, 33–4
- 'paradoxes' (or results contrary to marginal productivity theory), 129–130, 129n, 146n
