 salt and water balance in, 180, 182
 skin of, 109
 teloreceptors, 236, 262
 temperature control
 in amphibians, 113
 in climatic extremes, 114–15
 in endotherms vs. ectotherms, 113–14
 in fishes, 112–13
 in man, 115–18
 mechanisms of, 115
 in reptiles, 113
 tendon organ, 288
 tensor patagii muscles, 221
 testis, 288, 315, 316, 317, 318, 320
 testosterone, 8, 288–9, 309, 312, 320
 tetanus of muscle, 206
 tetrapods, 212
 thalamus, 271–2
 thiamine (vitamin B1), 15–16
 thoracic duct, 147
 thoracic pressures, 70, 71
 thoracic vertebrae, 71, 192
 thrombin, 142–3
 thymus and T cells, 153–4
 thyroid, 116, 284–5, 292
 see also thyroxine
 thyroid stimulating hormone, 282–3, 292
 thyrotropin releasing factor, 116
 thyroxine
 mechanism of action, 292–3, 295
 and metabolism, 116, 282–3, 290
 and metamorphosis, 298, 299
 tibia, 196, 197
 tidal volume, 73, 74
 tissue matching, 159–60
 tissue respiration, 90–103
 toad, walking of, 214
 touch receptors *see under* receptors
 toxoids, 157
 trabeculae of bone, 186

Index

- trachea, 67, 68
 transferases, 29
 transplant of tissues, 160
 transverse processes of vertebrae, 191, 192, 193, 194
 tricarboxylic acid (TCA) cycle, 96, 97
 tricuspid valve, 118, 120
 tri-iodothyronine (T3), 284
 tropomyosin, 202
 trypsin, 48, 49
 trypsinogen, 48, 50
 T-system in muscles, 204–5
 tuberculum of rib, 194
 tubules of kidney, 172–5
 tuna
 respiration of, 85, 86
 temperature control in, 113
 tympanic membrane, 244, 245, 246
 ubiquinone (coenzyme Q, CoQ), 98, 99
 ulna, 194
 ultra-microtome, 201
 umbilical artery and vein, 328
 urea
 as excretory product, 143, 179, 181, 182, 183, 184
 as protein building block in sheep, 13
 ureter, 167, 315
 urethra, 167, 315
 uric acid, 184, 308
 urine
 of amphibians, 184
 of birds, 184
 concentration of, in various mammals, 175 (Table 7.5)
 of fishes, 181–2
 formation of, 174
 human, composition of, 175 (Table 7.6)
 of reptiles, 184
 uropygial gland, 110
 uterus, 314, 321, 323, 327, 328
 utriculus, 241
 vagina, 314
 vagus
 and digestion, 38, 39
 and heart beat, 125
 and parasympathetic system, 260
 and respiration, 75, 266
 vane of feather, 220
 vasa recta, 169, 173, 174
 vas deferens, 315
 vasopressin, *see* antidiuretic hormone
 vasotocin, 281, 298
 ventilation
 of gills, 83–5, 90
 of lung, 70–4
 ventricles of heart, 120
 vertebrae (of rabbit), 191–4
 vertebral column, structure of, 191–4
 vertebralarterial canal, 191, 192
 vibrissae, 106, 237
 villi, 34, 39, 47, 53, 54
 viruses, 149–50
 and interferon, 156
 visceral nervous system, 227, 256, 260, 262
 vital capacity, 73
 vitamins
 A, 13–15
 antivitamins, 20
 B1, 15–16
 B2, 16
 B3, 16–17
 B6, 17
 B12, 18–19
 biotin, 17
 C, 19
 D, 19–20, 179
 E, 20
 folic acid, 18
 K, 20
 micro-organisms and, 20
 pantothenic acid, 17
 viviparity, 303
 water
 balance, 164–5, *see also* kidney
 in diet, 21–2, 164
 effects of dehydration, 22
 regulation in non-mammalian
 vertebrates, 180, 181–5
 Weberian ossicles, 243
 whales
 echolocation in, 248
 lung of, 73
 white blood corpuscles, 140–1
 white matter, 255, 267
 wing
 forces acting on, 223
 muscles of, 215
 structure and function, 220–1, 221
 Wolffian duct, 305, 307
 wound healing, 292
 xerophthalmia, 15
 yolk in eggs
 of birds, 309
 of fishes, 302, 303, 304
 of reptiles, 308
 zygomatic arch, 40
 zygopophyses (pre- and post-), 191, 192, 193
 zymogen cell, 44, 45
