## INDEX

- added worker hypothesis, 109–11
- Age Discrimination in Employment Act, 103
- aged population
  - in developed countries, 16, 19
- aging, individual
  - recognition of, 70
- Aristotle, 1
- assets, 60
  - and retirement, 115
- attendance at work, 76
- compulsory retirement, 102–4
  - coverage, 102
  - rationales for, 102
- Consumer Price Index, 62–3
- consumption, 79, 80, 83, 144, 150
  - aggregate consumption function, 81
  - health care expenditures, 150
- death, causes of, 21, 22
- demographic techniques, 11
- dependency costs, 32
  - retirement age, 26, 158
  - young vs. old, 26, 38, 142, 158
- dependency ratio, 3, 25, 34, 35, 36
  - age of dependency, 29
  - population growth, 4
- discouraged worker hypothesis, 109–10
- earnings
  - age earnings profiles, 77–9, 82, 83, 145–6
  - growth in, 78
- educational attainment
  - projections for United States, 65
  - and retirement, 117–18
  - and wage, 63–5
- employment of elderly, 32
- farmers, 112
- gross reproduction rate, 11, 12, 13, 14, 28
- Harris Survey, 90
- health
  - objective data, 106
  - and productivity, 105
  - and wage, 63, 105
  - and work, 79, 105–9, 118, 145–6
- health expenditures, 151–2, 160
- Hoover, Herbert, 4
- hours of work, 96, 98, 118
- housing, 152, 160
- human capital
  - investment in, 82, 135, 148
  - models of, 80–4
  - obsolescence of, 83, 117
- immigration, 15
- income
  - and age, 50
- income distribution, 51, 53
  - inequality in, 51, 53
- income levels, 49
  - growth in, 49, 50
- income sources, 29, 54, 56
  - shares by source, 54, 55
