Subject index

- adiabatic elimination, 72
- aggression, 86–9
- algebraic codimension, 40, 126
- 'almost all', 18
- amoebae, 107–14
- amphibian, 102–3
- Augusti model, 77–82

- bacteria, 107–14
- bec-à-bec, 60, 122
- bias factor, 53, 59, 90
- bifurcation point, 80, 81
- bifurcation set, 11, 18, 30, 41–60, 64
- bimodality, 12
- brain modelling, 2, 97
- buckling, 72–82, 127
- butterfly, *see* catastrophe
- butterfly factor, 53, 59, 90–1

- calculus of variations, 2, 64, 75
- catastrophe 3, 25, 30; butterfly, 32, 36, 52–9, 90–3, 119; conic umbilic, 39; cusp, 9, 12, 32, 36, 42–4, 59, 60, 64, 65, 67, 71, 73, 79, 81, 83, 86–90, 95, 97, 100–1, 109–10, 119, 123, 128; cuspid, 32, 36, 39, 56, 68; double cusp, 40, 80–2, 126; dual, 35, 39; dual cusp, 35, 77, 81; elliptic umbilic, 33, 37, 47–9, 60, 65, 119–20; fold, 32, 36, 41, 42, 65, 95, 100, 109, 118; generalized, 123; hyperbolic umbilic, 33, 36, 49–52, 60, 65, 121; parabolic umbilic, 34, 38, 39, 60, 121–2, 125; Riemann–Hugoniot (= cusp), 32; second elliptic umbilic, 39; second hyperbolic umbilic, 39; swallowtail, 32, 36 44–7, 60, 65, 119; symbolic umbilic, 39; wigwam, 38
- catastrophe machine: gravitational (Poston), 13–16, 29; Zeeman, 3–13, 20–1, 97
- caustics, 61–5, 118, 127
- characteristic, 118
- chemostat, 108
- codimension, 26–9, 40
- compromise, 89–93
- conflicting variables, 86
- conic umbilic, 39
- control point, 11
- control space, 10
- control trajectory, 11
- control variable, 2, 28
- convention, 84–6; external, 92–3, 96–7; imperfect delay, 85, 92; Maxwell, 85, 92, 118; perfect delay, 85–6, 91–2, 110–1; saturation, 92, 96
- corank, 25, 28, 29
- critical variable, 106–14
- cusp, *see* catastrophe
- cuspid, *see* catastrophe

- decision making, 88–93, 96
- degeneracy, 20, 22–5, 34, 39, 41, 123
- determined, 31, 38
- determination (biological), 116
- development, 99–104, 106, 115–26
- Dictyostelium discoideum*, 107–14
- diffeomorphism, 30–1, 83, 110
- differential equations, 3, 63, 105, 113; Duffing 66–8, 97; Lotka–Volterra, 107–8, 130–2; ordinary, 2, 3, 118, 127; partial, 2, 118; reaction–diffusion, 104; van der Pol, 68–72; wave, 118
- differentiation (biological), 98–104, 123–6
- divergent behaviour, 12

Subject index

143

- dogs, 86–8
- double cusp, *see* catastrophe
- dual, *see* catastrophe
- dual cusp, *see* catastrophe
- Duffing equation, 66–8, 97
- elastic structures, 72–82, 127
- elliptic umbilic, *see* catastrophe
- empty regime, 42, 49, 118
- envelope, 63
- equilibrium: assumption, 2, 10, 74; paths, 79; surface, 11, 30, 41–60, 79, 85
- Escherichia coli*, 107–14
- essential variable, 25, 28
- Euler arch, 72–4, 79
- Euler strut, 74–7
- explanation, 129–33
- external convention, 92–3, 96–7
- external variable, 2
- factors: bias, 53, 59, 90; butterfly, 53, 59, 90–1; conflicting, 86, 90; normal, 44, 53, 86, 90; splitting, 44, 53, 86, 90
- fast equation, 70–1
- finitely determined, 31, 38
- Fisher figures, 94–6
- fold, *see* catastrophe
- folic acid, 114
- forest, 104–5
- frontier, 98–106, 117–18
- geometrical optics, 62, 65, 118
- generalized catastrophe, 123
- generic, 18, 99–100, 106
- gradient: in dynamics, 2, 61, 68; other, 116–7, 124–6
- hard spring, 66–7
- harmonic oscillator, 65, 69
- Hessian, 25, 28, 41, 123
- homeomorphism, 30, 115
- homeostasis, 98–9
- Hopf bifurcation, 70, 125
- hyperbolic umbilic, *see* catastrophe
- hysteresis, 12
- imperfect delay convention, 85, 92
- imperfection, 75–82; sensitivity, 77–82
- inaccessibility, 12, 91
- inessential variable, 25–6
- internal variable, 2
- jet, 31
- k*-determined, 31
- k*-jet, 31
- Liapounov function, 2, 70, 99, 126
- limit cycle, 2, 68–70, 126
- linear oscillator, 66, 69
- lips, 60, 122
- local results, 13
- Lotka–Volterra equations, 107–8, 130–2
- manifold, 41
- Maxwell convention, 85, 92, 118
- mechanism, 1, 98, 114, 127–30
- metabolic model, 118
- metaphor, 128
- morphogen, 99–104, 117–18
- morphogenesis, 115–26
- multistability in perception, 93–97
- Necker cube, 93
- nephroid, 63
- non-linear oscillations, 65–72, 97
- normal factor, 44, 53, 90
- ‘nowhere dense’, 21
- Ockham’s razor, 128
- ordinary differential equations, 2, 3, 118, 127
- organizing centre, 13, 97
- oscillations, 65–6, 69, 107, 131–2; non-linear, 65–72, 97
- parabolic umbilic, *see* catastrophe
- partial differential equations, 2, 118
- perception, 93
- perfect delay convention, 85–6, 91–2
- phase: change of, 84–5; point, 10; space, 10
- potential, 2, 10, 15–16, 21, 64–5; thermodynamic, 84–6
- predator–prey systems, 106–8
- primary wave, 102–4
- principle of least time, 63
- qualitative results, 12–3, 83, 132
- reaction–diffusion equations, 104

- repeatability, 17, 21, 98–9
resonance, 66
Riemann–Hugoniot, *see* catastrophe
(r , s) stability, 106

saturation convention, 92, 96
secondary wave, 102–3
second elliptic umbilic, 39
second hyperbolic umbilic, 39
shock wave, 1, 32, 118
Siersma’s trick, 36
singularity set, 41–60
slow equation, 70–1
soft spring, 66–7
somites, 104
spectrum of applications, 61, 83, 98, 127–8
splitting factor, 44, 53, 90
splitting lemma, 21–5, 80
stable symmetric point of bifurcation, 80
state variable, 2, 28
statistical mechanics, 85
structural stability, 17–21, 25, 29, 65, 69,
98–9, 107, 126, 127–8, 132

swallowtail, *see* catastrophe
symbolic umbilic, 39

Taylor series, 20–9
theory of transformations, 116
thermodynamics, 84–6
topological codimension, 40, 126

umbilic, *see* catastrophe
unfolding, 19–20, 35–9; parameter, 27
universal unfolding, 20, 27, 35–9, 127
unstable symmetric point of bifurcation,
81

van der Pol equation, 68–72
van der Waals equation, 84–6
versal unfolding, 20, 35, 82

war, 89–93
wave, 104; breaking of, 1, 121; equation,
118; primary and secondary, 102–4;
shock, 1, 32, 118
wigwam, 38
