<i>Preface</i>	<i>page xi</i>
1 INTRODUCTION	
1.1 The nature of algebra	1
1.2 Abstract algebra	1
1.3 The axiomatic approach to mathematics	2
1.4 Logic in mathematics	3
1.5 Historical summary	7
2 SETS	
2.1 The idea of a set	9
2.2 Notation for sets	11
2.3 Subsets	16
2.4 Equivalence relations	17
Worked exercises	20
Exercises 2A	21
Exercises 2B	23
3 ELEMENTARY SET THEORY	
3.1 Abstract sets	24
3.2 Methods of proof in set theory	25
3.3 Venn diagrams	28
3.4 Simple algebra of sets: the basic rules	32
3.5 Simple algebra of sets: some theorems	38
3.6 Applications to logic: the algebra of statements	41
3.7 Syllogisms	44
Worked exercises	46
Exercises 3A	47
Exercises 3B	49
4 THE SET OF INTEGERS	
4.1 The natural numbers	51
4.2 The complete set of integers	53
4.3 Induction	59
4.4 Divisibility	61

CONTENTS

4.5	Highest common factor	<i>page</i> 62
4.6	Prime factorisation	65
4.7	Lowest common multiple	67
	Worked exercises	68
	Exercises 4A	69
	Exercises 4B	70
5	OTHER SETS OF NUMBERS	
5.1	The rationals	72
5.2	The real numbers	77
5.3	Complex numbers	79
5.4	Subsets of the set of complex numbers	81
5.5	Quaternions	81
	Worked exercises	83
	Exercises 5A	83
	Exercises 5B	85
6	RESIDUE CLASSES	
6.1	Congruences	86
6.2	Residue classes	89
6.3	Division of residues	92
6.4	Addition and multiplication tables: some particular finite arithmetics	94
6.5	Congruence equations	96
6.6	Some results in the theory of numbers	98
6.7	Divisibility tests	99
	Worked exercises	101
	Exercises 6A	102
	Exercises 6B	103
7	POLYNOMIALS	
7.1	Definition and algebra of polynomials	105
7.2	The coefficients of a polynomial	108
7.3	Divisibility and irreducibility	109
7.4	Highest common factor	112
7.5	Prime factorisation of polynomials	115
7.6	Lowest common multiple	116
7.7	Zeros of a polynomial: the remainder theorem	116

Cambridge University Press

Table of Contents

[More information](#)

CONTENTS		vii
7.8	Gauss's theorem	<i>page</i> 117
7.9	Various sets of coefficients	121
7.10	Rational functions	123
	Worked exercises	125
	Exercises 7A	126
	Exercises 7B	128
8	VECTORS	
8.1	Introduction	129
8.2	Definition and algebra of vectors in two dimensions	131
8.3	The algebra of vectors illustrated geometrically	133
8.4	Vectors in three dimensions	135
8.5	The use of vectors in Cartesian geometry	136
8.6	Projective geometry	140
8.7	n -dimensional vectors	141
8.8	Multiplication of vectors	141
8.9	More examples of vectors	144
	Worked exercises	145
	Exercises 8A	148
	Exercises 8B	149
9	FUNCTIONS AND MAPPINGS	
9.1	The idea of a function	151
9.2	Transformations in geometry	152
9.3	Mappings	156
9.4	1-1 correspondence	160
9.5	Isomorphisms	163
9.6	Products of mappings	165
	Worked exercises	167
	Exercises 9A	167
	Exercises 9B	168
10	THE FUNDAMENTAL LAWS OF ALGEBRA	
10.1	The algebra of numbers: the four rules	169
10.2	The laws of addition	171
10.3	Subtraction and the zero	173
10.4	The laws of multiplication	176
10.5	The distributive law	178

Cambridge University Press

viii

CONTENTS

10.6	Division and the unity	<i>page</i> 181
10.7	The laws for sets other than numbers	184
10.8	The similarity between sum and product	187
10.9	Algebraic structures	188
10.10	Some types of structures	189
	Worked exercises	190
	Exercises 10A	191
	Exercises 10B	193

11 GROUPS

11.1	The idea of a group	195
11.2	The abstract definition of a group	200
11.3	Elementary consequences of the definition	201
11.4	The order of a group	202
11.5	Abelian groups	203
11.6	The multiplication table	204
11.7	The inverse of a product	208
11.8	Powers of an element	210
11.9	Latin squares	213
	Worked exercises	214
	Exercises 11A	215
	Exercises 11B	216

12 EXAMPLES OF GROUPS

12.1	Examples from sets of numbers	218
12.2	Residue classes: the cyclic groups	221
12.3	Groups of polynomials	225
12.4	Vectors	226
12.5	Transformations of polygons: the dihedral groups	226
12.6	Permutations	230
12.7	Transformations of solid figures	239
12.8	Some other groups	244
12.9	Direct products	248
12.10	Generators and relations	250
	Worked exercises	251
	Exercises 12A	253
	Exercises 12B	257

CONTENTS		ix
13	SUBGROUPS	
13.1	Definition of a subgroup	<i>page</i> 259
13.2	The subgroup of powers of an element	260
13.3	Examples of subgroups	261
13.4	Frobenius notation for subsets of a group	270
13.5	Cayley's theorem	273
13.6	Cosets	276
13.7	Lagrange's theorem	279
13.8	Subgroups of cyclic groups	280
13.9	Classification of groups to order 6	281
	Worked exercises	283
	Exercises 13A	284
	Exercises 13B	286
	<i>Answers to Exercises</i>	288
	<i>Index</i>	295
