

CONTENTS

	Preface	vii
0	Sets and groups	1
1	Background: metric spaces	6
2	Topological spaces	11
3	Continuous functions	16
4	Induced topology	20
5	Quotient topology (and groups acting on spaces)	27
6	Product spaces	39
7	Compact spaces	44
8	Hausdorff spaces	50
9	Connected spaces	58
10	The pancake problems	63
11	Manifolds and surfaces	68
12	Paths and path connected spaces	92
	12A The Jordan curve theorem	100
13	Homotopy of continuous mappings	110
14	'Multiplication' of paths	118
15	The fundamental group	124
16	The fundamental group of a circle	135
17	Covering spaces	143
18	The fundamental group of a covering space	151
19	The fundamental group of an orbit space	154
20	The Borsuk-Ulam and ham-sandwich theorems	157
21	More on covering spaces: lifting theorems	162
22	More on covering spaces: existence theorems	170
23	The Seifert-Van Kampen theorem: I Generators	176
24	The Seifert-Van Kampen theorem: II Relations	187
25	The Seifert-Van Kampen theorem: III Calculations	194
26	The fundamental group of a surface	202
27	Knots: I Background and torus knots	209
28	Knots: II Tame knots	221
	28A Table of knots	234
