SUBJECT INDEX

- absolute probability, 11
- absorbing state, 221–2, 229, 231–5
- absorption, mean time, 230, 232–5
- addition law, 6, 8–9, 11, 19, (*see also* generalized addition law)
- additive process, 82, 154
- analysis of variance, 124
- aperiodic event, 205
- arithmetic mean, 128–31, 159
- autocorrelation, 116
 - immigration–emigration process, 185
 - Poisson process, 116
- axioms, 7, 31, 37–8
 - probability, 6–14, 34–6
 - absolute probability, 10–11
- backward equations, 234
- barriers (*see under* simple random walk)
- Bayes's theorem, 20, 22–4, 31, 40–1
 - continuous form, 118, 121
- Bernoulli sequence of trials, 16
- bets, 33–6, 56
- bias, 130, 132
- bimodal, 77
- binomial density, 52–3
- binomial distribution, 49–54, 79, 83, 110
 - inverse-sine transformation, 138–9
 - generating functions, 105
 - mean, 54
 - normal limit, 86–90
 - Poisson limit, 73–4
 - variance, 78
- binomial distribution function, 53, 87–90
- binomial variable, 50
- Borel field, 11
- bivariate (*see under nouns*)
- busy period, 192, 201
 - expected length, 192–3, 201
 - expected number of customers, 201
- Cauchy distribution, 159
- central limit theorem, 91, 143, 150, 153–6, 212–13
- characteristic function, 92–4
 - bivariate, 109, 118, 122
 - limits, 152–6, 158
 - of sums, 141, 145–7
- characteristic roots (of a matrix), 27
 - transition matrix, 225–6
- Chebychev's inequality, 75–6, 78–9, 84, 89, 134, 151
- closed set of states, 217–18, 225, 228–31
- clustering, 68–9
- coefficient of variation, 79, 137
- combinations, 49
- combination of observations, 128–33, 135–9
- conditional probability, 11
- conditioning event, 3, 5, 33, 51
- connected states, 217, 220, 229
- consistent behaviour, 36–8
- continuity (of a distribution function), 60, 120
- continuity correction, 88
- converge in probability, 150, 156–7
- converge strongly, 151, 157–8
- converge weakly, 150, 156–7
- convolution, 140, 145–6
- correlation, 109, 113–16, 118, 123–5, 131, 133–4
- covariance, 109, 113–16, 118, 123–5, 127–8, 149
- craps, 46, 98
- critical odds, 34
- cumulant generating function, 93
 - bivariate, 122
 - limits, 152–6
 - of sums, 141, 145–7
- cumulants, 80, 93, 122
- De Moivre's theorem, 86–9
- decision theory, 37–8
- deduction, 1–3, 38–9
- degrees of belief, 29–42, 56, 121
- density (probability), 76, 80–1, 85, 93–4, 119, 125–6, 141
 - conditional (continuous), 118, 120–1
 - conditional (discrete), 108, 110–13
 - continuous (one variable), 58, 60–2
 - continuous (bivariate), 117–19
 - discrete (one variable), 50, 55
 - discrete (bivariate), 107, 110
 - of a function, 139–45
 - of sums, 140, 145–7
- diffusion coefficient, 85

SUBJECT INDEX

- diffusion equation, 84–5, 90, 154
diffusion process, 85–6, 90, 154
dispersion matrix, 109, 114, 118, 124, 129, 149–50
distribution, 76, 125–6 (*see also* density)
 conditional (continuous), 118, 120–1
 conditional (discrete), 108, 110–13, 116
 continuous (one variable), 58–62
 continuous (bivariate), 117–26
 discontinuities, 62
 discrete (one variable), 13, 49–57
 discrete (bivariate), 107–17
 marginal, 108, 110, 117
 mixed, 61, 119, 191
 multivariate, 125–6
distribution function, 76, 120 (*see also* density)
 continuous (one variable), 58, 60–2
 continuous (bivariate), 117, 119–20
 discrete (one variable), 50, 53
 discrete (bivariate), 107
 limits, 150–6
 mixed, 61, 119, 191
drift (diffusion process), 90
- efficiency, 133
elementary event, 6, 10
equilibrium distribution, 178
ergodic, 157, 186, 192, 200–1, 211
 events, 206, 211
 states, 190, 216, 218–19, 223–5, 231
Erlang distributions, 202–3
event, 6, 10
exclusive events, 6, 19
exhaustive events, 6
expectation, 34, 74, 76, 144, 157
 conditional (continuous), 118, 122
 conditional (discrete), 108, 112–13, 116
 continuous (one variable), 59, 62
 continuous (bivariate), 118, 121–2
 discrete (one variable), 50–1, 55–7
 discrete (bivariate), 109, 118
 infinite values, 57, 206
 non-negative variables, 51, 57, 59, 206
 of functions, 134–9
 of sums, 126–33
experimental design, 131–3
exponential distribution, 64, 66, 68–9, 174–5, 179, 187, 197 (*see also* gamma distribution)
queueing time, 189
- factorial function, 66, 74, 91
fair bet, 34
features of distributions, 74–82
Fokker–Planck equation, 85
forward equations, 234
Fourier transform, 94, 146
frequency limit, 3–6, 8–9, 16, 39, 80
 strong convergence, 158
 weak convergence, 156
frequency ratio, 3
- game, 55–6
gamma (Γ -) distribution, 64, 66, 74, 137, 189
 coefficient of variation, 79, 137
 mean, 66
 moment generating function, 105, 202
 normal limit, 154
 square of normal, 142–3
 sum of, 146
 variance, 78
gamma function, 74
Gaussian density, 85
generalized addition law, 20–2, 26, 83, 96, 180–1, 197–8
 continuous case, 72, 118
 Markov chain, 215–16, 224
generalized multiplication law, 20, 24–5
generating functions, 91–7, 146, 199, 205 (*see also special types*)
 bivariate, 109, 122
genetics, 2, 4, 5, 15, 25–9, 52, 226–7
geometric distribution, 57, 69
 generating function, 203
 mean, 57
 queue size, 188, 203
 renewal theory, 209
 sum, 203
grouping, 81
- Hardy's law, 26–7, 29
heat equation, 85
heteroscedastic, 113
histograms, 80–2
homogeneous linear function, 127
homoscedastic, 113, 122
hypergeometric distribution, 99
hypotheses, 30–4
- immigration–emigration process, 174–87
 autocorrelation, 185
 cumulant generating function, 181
 joint distribution, 184–5
