978-0-521-29932-9 - Chemistry Through Models: Concepts and Applications of Modelling in Chemical Science, Technology and Industry

Colin J. Suckling, Keith E. Suckling and Charles W. Suckling

Index

[More information](#)**INDEX**

- Abstraction 1, 29, 35, 42, 45  
   in screening 290, 294  
 Academic research 245  
 Action research 59, 245  
 Aerial photographs 8  
 Aeroplane  
   instruments as a model 15  
 Alkaloids  
   biogenetic-type synthesis 203  
   biosynthesis 155, 197, 204  
   synthesis 167, 171  
 Alkene synthesis 162, 164  
 Anaesthesia 291–5  
 Annotinine synthesis 171  
 Annulenes 154  
 Arrhenius equation 100  
  
 Bar charts 249  
 Benzene  
   structural formulae 45–6, 110  
 Biogenetic-type synthesis 158, 203  
 Biological evolution 34, 231  
 Biological systems 191ff  
   chemical analogy in 193  
   conceptual basis for models 192  
   control systems 242  
   development of models 244  
   scope of models of 191  
 Biosynthesis  
   of alkaloids 155, 197, 204  
   isotopic labelling 197  
   mechanism of reactions 208  
   nucleotide 193  
 Bipyridyls 297–301  
 Black box 61  
 Blocks for construction industry 295  
 Boron hydrides, structural formulae 111  
 Brønsted relationships 129  
  
 Camptothecin synthesis 188  
 Canonical forms 110  
 Carbenium ions 74  
 Carbocations 74  
  
 Carbonic anhydrase 229  
 Carbonium ions, 'non-classical' 74  
 Carboxypeptidase 227  
 Cash flow 247, 277  
 Catalysis  
   acid–base 129  
   as an environmental effect 127  
   enzymic 198, 240  
   heterogeneous 50, 129  
   homogeneous 128  
 Check lists 15  
 Chemical business, model of 246–8  
 Chemical evolution 231  
 Chemical plant  
   defects in 16, 250–1  
   design of 19, 23, 35, 260  
   semi-technical 19  
 Chemical processes, models of 53  
 Chemical reactors, design of 48–9  
 Chemists  
   in interdisciplinary teams 3  
   responsibility of 3  
   role of 2  
 Chymotrypsin 210  
   active-site models 212  
   binding-site models 215  
 Classical mechanics, models based upon  
   51, 80, 139  
 Classical thermodynamics 34  
 Closed systems 17, 34  
 Coenzymes 233  
   B<sub>12</sub> 22, 236; *see also* vitamin B<sub>12</sub>  
   synthesis  
   folate 193  
   nicotinamide 234  
   pyridoxal 235  
 Colchicine, biosynthesis 155  
 Collision theory 98  
 Computers  
   analogue 264  
   assistance for synthesis 160  
   in plant control 262  
 Control mechanisms in biology 242

318 *Index*

- Control systems 13, 28  
 Cost-benefit analysis 274  
 Critical examination 38  
 Critical path analysis 249  
 Curly arrows 117  
 Cyclobutadiene synthesis 159  
 Cyclopropanes  
   molecular orbitals 88  
   ring opening 105  
   synthesis 157  
 Cytochrome-c 223
- Data, provision of 258, 264–5  
 Decoupling in a system 35  
 Delphi technique 281  
 Design 20, 43  
   fitness in 43  
   misfit in 37, 43  
   objectives of 268  
   in primitive societies 43  
 Diagrams, use in design 45  
 Dimensional similarity 253–4  
 Dimensionless numbers 253–4  
 Discovery, definition of 267  
 Distillation column, design 44  
 Dreams 10  
 Drugs  
   design 155  
   screening 22  
 Ductile tungsten, discovery of 269
- Economics 246, 274  
   marginalist theories 13  
 Effects 67, 72  
   electronic 72, 95  
   inductive 72  
   in inorganic compounds 95  
   pattern from a product 289  
   quantification of 73, 125  
   resonance 72  
   solvent and salt 121–4  
   steric 72, 80, 97  
   validity of empirical models of 81  
 Electrolytes  
   and salt effects 124  
   and solvation 123  
   theory of 90, 151  
 Environment 18  
   disturbance of 248  
   and effects 68, 69  
   and enzymes 200, 222, 226  
   external 20–1  
   in factory 255  
   internal 20–1  
   misfits in 250  
 Enzymes 22, 39, 198  
   active site 199  
   catalysis by 240  
   chemical modification of 200  
   environment 200, 222, 226  
   hydrolytic 200, 210, 227  
   metal containing 225  
   specificity of 200  
   spectroscopic studies of 201, 225  
 Evolutionary operation 53  
 Experimentation  
   exploratory 39  
   targetted 37, 38  
 Extrapolation  
   dangers of 203  
   developments of biological models 244  
   in time 15, 23
- Feedback 9, 10, 14  
   control of biological systems 242  
 Fish hooks 184  
 Flow charts 8, 9  
 Flow sheet 257  
 Forecasting  
   economic and technological 274  
   technological change 281  
 Free radicals and phytotoxicity 299  
 Functional groups 46, 47, 65, 70  
   analogy 65, 71  
   structural formulae 108
- Gas chromatography 294  
 Gas law 17  
 Gatekeepers 248  
 Golf balls 296–7  
 Griseofulvin synthesis 163
- Haemoglobin 218  
   environment of haem 222  
   oxygen-carrying models 219  
   spectra and models 219  
 Haemoproteins 217  
 Halothane 268, 291  
 Hammett equation 77, 127  
 Hammond's hypothesis 131  
 Hard and soft acids and bases 81, 122  
 Hazard and operability studies 252  
 Hazards 250–1  
 Hierarchies 42, 44–8
- Ideality 17, 18  
 Imprecise results 54  
 Industrial toxicology 39  
 Innovation 267ff, 284  
   constraints on 271  
   definition of 267  
   diffusion of 282–3  
   model of 267  
   pattern of needs 289  
   process of 3  
   rejection rate in 270

*Index*

319

- Inorganic chemistry**  
 and biological systems 218, 225  
 conceptual model in 92  
 effects in 95  
 Input–output analysis 280  
 Intermediate technology 273  
 Inter-personal relationships 7  
 Inventions  
 definition of 267  
 enabling 269  
 Ion atmosphere 91, 125  
 Isoprenoids synthesis 205  
 Isotope effects 5  
 Isotopes, radioactive 23  
 Isotopic labelling 25  
 in biosynthesis 197  
 in synthesis 155, 168
- Judgement** 29, 55, 275
- Kinetic theory** 98
- Labels**  
 isotopic 25; in biosynthesis 197; in synthesis 155, 168  
 radioactive 5
- Learning curves** 250
- Ligand field theory** 94, 123
- Light bulb, design of** 44
- Line diagram** 256
- Linear free energy relationships** 77, 129
- Lycopodine synthesis** 167
- Managers, task of** 13
- Mannerism** 57
- Manufacturing processes** 246
- Maritidine synthesis** 205
- Materials of construction** 252, 259
- Mechanism**  
 control 242  
 reaction 74, 107, 124, 198, 208, 240
- Medicine, diagnosis** 16
- Memory** 24
- Metal chelates**  
 conformation of 178  
 effects in 95  
 as enzyme models 217, 225
- Metalloenzymes** 225  
 carbonic anhydrase 229  
 hydrolytic 227  
 oxidising 224  
 spectroscopic studies of 226
- Method**  
 and mediocrity 57  
 subservience to 56
- Methyl chloride, chlorination of** 256
- Michael reaction** 161
- Misfits** 43–5  
 in environment 245
- Model compounds**  
 in biological systems 192  
 for functional groups 71  
 in spectroscopy 180  
 in synthesis 166, 170  
 in vitamin B<sub>12</sub> synthesis 152, 173
- Models**  
 classification 7  
 and communication 25  
 of competitors' performance 14  
 conceptual 3, 7, 9; biological systems 192; development of 68; inorganic chemistry 92; organic chemistry 64; physical chemistry 89  
 constructing 41, 149, 189  
 in decomposing complex problems 24  
 definition of 17  
 descriptive 9  
 as design tools 7  
 dynamic 9, 10, 52, 117, 260–1, 264  
 economic 272, 276  
 empirical 48–50, 77, 81, 107, 129, 131, 134, 262, 300  
 enactive 8, 10, 26, 31, 108, 174  
 in their environments 21; *see also* Environment  
 in evaluating hazards 54, 56  
 faulty 259  
 historical 14, 15  
 iconic 8, 26, 43, 50, 108, 174  
 imaginative 16  
 and lateral thinking 58  
 in the learning process 10  
 input–output 246  
 macro-economic 272  
 made-to-measure 170  
 mathematical 48–50, 82, 104, 251, 259, 260  
 molecular 2, 174–6  
 off-the-peg 14, 51, 170  
 physical 2, 7  
 pictorial 84, 104, 108, 117, 184  
 planning 16  
 reference 27, 73–4, 77, 125  
 static 9, 52, 174  
 steady state 9  
 stochastic 265  
 symbolic 9, 26, 108  
 theoretical 48–50, 82, 89, 110, 123, 134, 151, 300  
 uses of 11, 251  
 and 'what if' 25
- Molecular orbital theory** 87  
 MO following 120  
 semi-empirical 134
